1 Business Process Overview

There are two processes that will be mentioned in this document, they are Move-Out and Transfer process.

The Handle Customer Move-Out - Contract End will define how a Business Partner's (BP) contract will be ended within SCE SAP environment.

The Move-Out process contains the processes that manage all Move Out related activities for a BP that are executed within Hybris C4C and S/4HANA and can be extended to SCE.COM and IVR. The Contract is an agreement between SCE and the BP for the supply of service at a specific location at a specified point in time.

The Manage Transfer process will define how service for the BP will be ended at one location and service will be activated at another location within SCE SAP environment. These processes will also integrate with the process for the creation of field work requests and remote disconnect, refer to the BPD [DF-WM-02 - Handle Field Orders - Manage Field Orders](#) and [DF-WM-03 - Handle Remote Orders - Manage Remote Orders](#) document for additional details.

Overall, the move-out manages the following processes:

- New Contract, or Move-In – discussed in BPD document [CIM-CS-02 - Handle Customer Move-in/Out - Contract New](#)
- Move-In Adjustment – discussed in BPD document [CIM-CS-02 - Handle Customer Move-in/Out - Contract New](#)
- Move-In Reversal – discussed in BPD document [CIM-CS-02 - Handle Customer Move-in/Out - Contract New](#)
- End Contract, or Move-Out – mentioned within this document
- Move-Out Adjustment – mentioned within this document
- Move-Out Reversal – mentioned within this document
- Transfer – mentioned within this document

Not all move out scenarios are triggered through Hybris C4C, other scenarios include:

1. SCE.COM: Move Out can be done by a BP via SCE.COM. Refer to BPD document [CIM-CS-10 Manage Customer Self-Service](#) for more details.
2. Dunning triggered Move Out: Dunning Move Out will be automatically generated by the collections process once a customer's service has been dunning disconnected after 14 days. This process is defined in the BPD document [CC-FI-04 – Manage Collection \(Dunning\) – Manage Credit and Collections](#).
3. IVR: Move Out requested from IVR will have integration with S/4HANA and be able to perform a Move Out. Refer to BPD document [CIM-CS-13 - Manage Inbound Telephone Call – IVR](#) for more information.

Finally, all utility specific functions of the S/4HANA landscape, in concert with the Hybris C4C components referred to in this document as the SAP Customer Relationship and Billing solution, or simply CRB.

1.1 Current Pain Points for Southern California Edison

- Forwarding Addresses – Currently adding foreign forwarding addresses isn't easy for agents and requires back-office intervention
- In the case of force out, the forwarding address is not captured from the current resident
- Online Move Out for non-residential BP generates a manual back office process
- Tracking non-residential orders is a manual process

- Exception queue is worked first in first out and changes made to orders that are still pending in the queue cannot be worked until the order is picked by queue
- Visibility of Added facilities is lost between move out and move in if the new customer does not sign up (assumption agreement) for the Added Facility
- Visibility of streetlight transfer is lost between Move Out and Move In if the new customer does not sign up for the streetlight.
- If a move-out is reversed today, the programs the customer is enrolled in are not automatically re-established causing a lot of manual research and effort to put them back on the programs. There are also many instances where employee didn't address the program re-enrollment and subsequently the customer calls about the issue.
- Today, our Energy Advisors have limited ability/permission to process move-out reversal/adjustment. They must send the request to RSO which can delay the process for the customer.
- Non-residential customers cannot complete a move out on SCE.com
- When a CCA customer moves out, the final bill from SCE may be missing the final charges from the CCA. When the CCA charges are received by SCE, a second final bill is sent to the customer for the CCA charges. This is a timing issue as we need to receive the final charges from the CCA before sending the final bill to the customer. It would be best to have only 1 final bill sent to the customer.

1.2 Responsible Parties

Contact	Contact Person
Southern California Edison Business Process Owner	Janet Covington
Southern California Edison Lead	Christine Evans
HCL Functional Lead	Adrian Halim
Solution Architect	Pedro Costa

1.1	Added Control tag in process flow	05/03/2018	Tuan Howe Yap

1.4 Terminology

Term/Acronym	Definition and SAP Equivalent (if applicable)
APSE	Accelerated (or Axon) Project Support Environment
BBP	Budget Billing Plan, equivalent to Level Pay Plans in SCE CSS
BDEX	SAP add-on functionality to support the processing of BPEM Cases
Billing Cycle	Is a group of contracts to be billed together via date-driven or regional criteria, it controls the billing cycle and is linked to the Meter Reading Unit. SAP equivalent term is the Portion.
Billing Document	A document that outlines the charges incurred for energy consumption for a specific contract. During the process of Billing, a billing document is generated for each contract on a contract account.
BMD	Business Master Data. The customer information which includes personal details, payment terms, dunning levels, billing rates and rate categories. The business master data objects are Business Partner, Business Agreement/Contract Account and Contract.
BP	Business Partner
BPD	Business Process Design (or Document)
BPEM	Business Process Exception Management
BWR	Basic Work Request. SAP equivalent is BPEM.
CA	Contract Account
CCRP	Customer Champion Recognition Program

Term/Acronym	Definition and SAP Equivalent (if applicable)
Channel	Data object in SAP that holds the interval data. Intervals can be kwh, price, factor, etc. SAP equivalent is Profile.
CIMS	Customer Information Management System in SharePoint
Clarification	A list of payments that could not be processed and require additional work in order to be posted.
Connection Object	Link between installation and postal regional structure. Usually a building, but can also be a piece of property or other facility, such as a fountain or construction site. The connection object corresponds to the functional location in plant maintenance (PM).
Customer	Any entity with a relationship with SCE. This term is usually used in reference to customers (both individuals and organizations) This can include employees and third-party suppliers (banks and payment partners). SAP Equivalent is Business Partner (BP)
CRB	SAP Customer Relationship & Billing system. This is what is being implemented with the CSRP program.
CSR	Customer Service Representative
CVD	Customer Verification Department
EAM	SAP Enterprise Asset Management
ERP	SAP Enterprise Resource Planning
IMG	SAP Implementation Guide - where configuration is performed
Level Pay Plans	SAP equivalent term is Budget Billing. Budget Billing allows customers to pay regular equal amounts over a yearly period.
MDT	Master Data Template, is used to create Contract and Move Out Document in S/4HANA
NMS	Network Management System
PoD	Point of Delivery, an object in Installation
RSS	Remote Service Switch
SCE	Southern California Edison
SPI	Same Party In
Summary Billing	Standard SAP functionality that enables the invoicing of multiple Contract Accounts under one Parent Contract Account (Consolidated Summary Billing). SAP equivalent is Collective Billing.
S/4HANA	SAP ERP Central Component (SAP) – The core SAP modules (FICO, WM, SD, EAM, HR). This term is commonly used to refer to the existing SAP modules implemented at SCE
TMD	SAP Technical Master Data e.g. Connection Object, Premise and Device Location

Additional terms may be found in APSE [General Document # 32 CSRP Glossary](#)

2 Business Process Design

The **End Contract** functionality of SAP is used to end a Contract Account's (CA) association with the supply of service (installation) at a location, or to perform a Move Out. This most commonly occurs when a BP indicates that they are moving out of the location where they are currently being billed for service. This functionality will be executed by users within Hybris C4C upon request. The End Contract functionality is applicable to residential and non-residential BPs. It is also applicable to CCA/DA contracts.

When the Move Out process has been successfully completed in Hybris C4C and the terminated contract gets updated in S/4HANA, a Move Out document will be created in S/4HANA. If there is no new party moving in on the calendar day after the end contract effective date, a Move Out (remote disconnect) Service Order will be created with an effective date being the next calendar day after the end contract effective date is reached. The Move Out document contains the information about the BP, CA, and Premise, as well as the final meter reading information used to generate the final bill for the BP.

The **Transfer** functionality of SAP is used to terminate service at one location and initiate service at another location; i.e. performing a Transfer of Service. This occurs when a BP has indicated that they are moving out of the location where they are currently being billed for service and are moving to another location where they will be billed for service. This functionality will solely be executed within Hybris C4C. The Transfer process utilizes the Move Out and Move In process to streamline and simplify this move. Whenever the Move In portion of a Transfer is executed for a Premise which is still occupied, this will create a force out for the current BP at that Premise. The defined processes in the BPD [CIM-CS-02 - Handle Customer Move-in/Out - Contract New](#) is applicable for the Move In process unless otherwise specified.

When the Transfer process successfully completes in Hybris C4C, a Move Out document for the terminated location and a Move In document for the initiated location will be created in S/4HANA. Both Move Out and Move In documents contain the information about BP, CA, and premise, as well as the meter reading data that will be used to generate the final charges at the Move Out location along with the starting point for charges at the Move In location. The creation of the Move Out and Move In documents will also trigger the creation of the Service Orders to collect the associated meter readings/ interval data.

2.1 Move Out Details

The SAP Contract End functionality is used to terminate service(s) at a location or perform a Move Out. The SAP Contract that represents an agreement between the BP and SCE for the service(s) such as Electricity, Water, or Gas to be delivered at the identified Premise will be terminated after Move Out is executed. This functionality will be executed within Hybris C4C upon customer's request.

When the Move Out process has successfully been completed in Hybris C4C, a Move Out document will be created in S/4HANA. The Move Out document contains the information about BP and CA. The creation of the Move Out document will also trigger the creation of the RSS Request for Smart Meter with RSS capability or Service Order for premise having non-smart meter to collect the move out (final) read.

Move Out that is triggered via SCE.COM and Dunning will update the existing Contract with an End Date and a new Move Out document will be created. They will apply the same business rules that are built in Hybris C4C.

Move Out creation functionality can be executed by CCC, GC Services, RSO, BCD and Consumer Affairs. Refer to [Action # 339 Execution of Move-in/out by Other Departments](#) for more information.

2.1.1 Move Out Guiding Procedure

The Move Out process is managed as part of the guided procedure framework within Hybris C4C. This guided procedure helps users navigate through each step of this process, the four steps of this process are:

1. Customer & Premise
2. Services
3. Contract Account & Billing
4. Review

Once the BP or Contract Account or Premise data have been loaded into context in Hybris C4C, the user will authenticate and validate that the requestor is authorized to request the Move Out

Authorized Requester

For a requester to be authorized to request a Move Out, they must be the sold-to-party BP, a BP who has been defined as authorized by the sold-to-party BP (e.g. authorized contact relationship to the BP) or we must have received documentation that authorizes the requester (e.g., BP becomes deceased and caller is the executor or they have a power of attorney for the BP).

Authenticated Requester

By phone authentication - Caller must provide full customer name as it appears on the bill AND full address for Move Out or Contract Account number or Contract number.

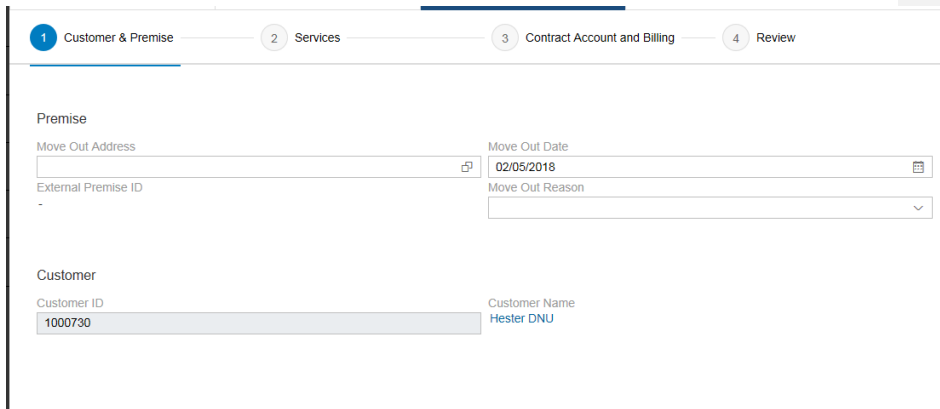

By IVR and SCE.com authentication is described in their respective BPD's, see [CIM-CS-10 - Manage Customer Self-Service](#) and [CIM-CS-13 - Manage Inbound Telephone Call – IVR](#).

The user will initiate the Move Out process, by selecting the Move Out button from the view. If the Contract has already been moved out, i.e. Move Out Date is populated in the Move-Out Date field, the Move Out button will not be visible on the view.

The following are the detail process for each Guiding Procedures:

A) Move Out Guiding Procedure 1 - Customer & Premise

Once Move Out process is initiated, the steps of the Move Out guiding procedure are displayed (Figure 1: Guiding Procedure – Customer & Premise). If the BP or Premise data is not loaded into context in Hybris C4C, user is able to select the BP or Premise via the drop-down search field in this view. Other information available on the view are Move Out Date and option to create a new BP. They are documented in detail in this section of the document.

The screenshot shows a guided procedure interface with four steps: 1. Customer & Premise, 2. Services, 3. Contract Account and Billing, and 4. Review. The 'Customer & Premise' step is active. It contains two main sections: 'Premise' and 'Customer'. The 'Premise' section has fields for 'Move Out Address', 'Move Out Date' (set to 02/05/2018), 'External Premise ID' (set to -), and 'Move Out Reason'. The 'Customer' section has fields for 'Customer ID' (set to 1000730) and 'Customer Name' (set to Hester DNU).

Figure 1: Guiding Procedure - Customer & Premise

Move Out Date

The 'Move Out Date' field is the date when the BP wants to terminate service(s) with SCE. When establishing a Move Out, this date will be defaulted to the System Date (or the current date) but can be changed to any date in the past or in the future without any restriction, subject to the following conditions:

- There is no NMS (Network Management System) or RSS (Remote Service Switch) system limitation on volumes of Move Outs that can be processed per day nor the day of week to be completed. SCE's normal operating days for Move Outs is week days that are not company defined holidays. We will only accept a Move Out request for a weekend day or holiday, on an exception basis, and only after we have validated we have sufficient field resources to complete the service disconnect request, in the event remote service switch does not work OR the meter is not equipped with the remote service switch. We will revisit this policy during the Process, Procedures & Policy phase of the program.
- Move Out Date cannot be equal to or greater than a Move In Date of the same Installation. This is standard SAP validation. If the Move In Date of the existing Contract is January 3rd, then the Move Out Date can be January 2nd or prior.
- IVR and SCE.com Move Out processing is covered in [CIM-CS-13 - Manage Inbound Telephone Call – IVR](#) and [CIM-CS-10 - Manage Customer Self-Service](#).
- There is no limit to the total number of Move Outs that can be processed by the NMS for Remote Service Switch. This is mentioned in Action # 343 [CIM-CS-02 Number of As Of Turn-On created](#).
- Based on business rules, SCE does not backdate Move Out unless it is a SCE error or the Move In BP takes responsibility with an as-of date. Backdated Move-Out date on a Contract that has been billed will not be successfully completed if the existing active contract at the premise has already been billed. Reversal of the bill is required in order for the backdated Move Out to be successfully completed in back office system (S/4HANA). To automate the bill reversal process, the System will automatically reverse the bill of the active contract via enhancement [E-CIM-CS-03 - Move Out /Change/Reversal - Invoice Reversal](#). C4C Hybris will enable a user to complete a Move Out reversal or Move Out Date change. If needed, the front office user can also create a BPDM called 'Move Out - Bill Reversal' in C4C manually and it will be routed to RSO Billing to complete the request. Refer to [Action # 335 Move-in Reversal by X months](#).

- If there are multiple services at the Premise, the users will have the ability to enter different Move Out Dates for each individual line item, providing these dates do not conflict with the Move Out date for that individual line item.

SCE will not final bill the BP before the Move Out effective date.

The Move Out date will sync up with the actual completion date of the Move Out Service Order or Move Out Service Request completion date if the actual completion date is different than original Move Out Date. This will be done via enhancement *E-DF-WM-03-Reconnection for Move-Out*.

Move Out Reason can be captured by the user (optional):

- Moving within state
- Moving out of state
- Vacation / Seasonal
- Remodeling home
- Unsafe condition / Damaged
- Bankruptcy
- Going out of business
- Sold business/New owner
- Natural Disaster
- Credit
- Other

B) Move Out Guiding Procedure 2 - Services

Figure 2: Guiding Procedure – Services

Move Out

The available SAP utility standard services are Electricity, Water, and Gas. Premises that offer more than one service such as Catalina area will have three line items appear on the screen for majority of the Move Out cases. All the services are automatically selected via individual checkbox. User needs to manually un-select the service(s) that the BP does not wish to terminate.

Premise with metered or unmetered residential streetlight will also have additional service line item(s) appearing on the screen. For metered streetlight, user will submit the Move Out for all services including metered streetlight and Move Out process as per normal. For Move Out involving unmetered streetlight, user will not proceed with the move out. User will create a BPEM Case category 'Move Out - Unmetered Streetlight' would be issued to RSO Billing to update contract term and create the Move Out when ready.

A customized check box 'Remove Meter' is introduced. There are some instances where BP requests to terminate service and remove meter. This is applicable when BP owns the meter or meter needs to be removed due to demolition/ natural disaster or temporary power pole. User will select Remove Meter check box in Move Out Guiding Procedure 2. Upon submitting the Move Out request, system will create a Meter Removal Service Order and sub type of Move Out. Field personnel will go to the site to remove meter and capture final meter read. Remove Meter check box and a Remove Meter Service Order creation will be done via enhancement *E-CIM-CS-02 - Create Work Order during Move-In/Move-Out/Transfer*.

If the BP is requesting to remove the meter but not terminating the service, user will create a Service Order via Service Order functionality in Hybris C4C and not submitting a Move Out. Refer to BPD [CIM-CS-05 - Handle Request - Process Field Work Request](#) for more information on Service Order

Create Service Order

There should be only 1 Service Order to be created by Move Out process and sent to the field at any point of time. A Service Order created by Move Out process could have multiple sub types that reflect the type of work to be carried out at the site such as remove meter, meter replacement and capture final read.

The standard SAP Create Service Order checkbox and Description field will be hidden as the user does not need to decide if a Service Order or RSS Request needs to be created.

If the premise has a RSS capable smart meter and requires de-energize, a Move Out RSS Request will be created automatically using enhancement *E-CIM-CS-02 - Create Work Order during Move-In/Move-Out/Transfer*, followed by sending request to RSS at the end of Move Out process. The RSS Service Request Start Date will be the Move Out Date.

If the premise has a non-smart meter which is a Register Read, a Move Out Order will be created automatically to get the final read using enhancement *E-CIM-CS-02 - Create Work Order during Move-In/Move-Out/Transfer*. Catalina premises use mechanical meters which require Register Read and field visit to go to the site to get the read. Appointment scheduling is not required for Move Out Meter Reading

If the premise has a smart meter that is not RSS capable or a non-smart meter (Interval Read), a Move Out Service Order is not required. A Billing Order will be created by the system in S/4HANA automatically and the meter reading will be provided by MDMS and populated in the Billing Order where the final bill will be created. Refer to BPD document [UB-DM-03 - Process Meter & Device Data - Output MRO/MDMS Request](#) for more information on MDMS.

Below is a summary of the kind of Service Order to be created for Move Out:

Scenario 1 : Premise has smart meter and is RSS capable
- If de-energized is not required, Service Order creation is not required. - If de-energized is required, Disconnection Order will be created and a RSS request will be sent.
Scenario 2: Premise has smart meter and meter is not RSS capable:
- If de-energized is not required, Service Order creation is not required. - If de-energized is required, create a Disconnection Order with subtype of 'Move Out'.
Scenario 3: Premise has no smart meter
1. Customer has ESC Opt Out: - If de-energize is not required, create a Move Out Service Order with sub type of Opt In to change out the meter. Final read will be obtained. The new meter will be set to on. - If required to de-energize, create Disconnection Order with sub type of Opt In to change out meter. Final read will be obtained. The new meter will be set to off. 2. Current customer has no ESC Opt Out: - If de-energize is not required, create a Move Out Service Order to get final read. - If de-energize is required, create Disconnection Order with sub type Move Out to get final read.

Meter Reading

Previous or last meter reading will be displayed in the Meter Reading section, however these readings are for non-smart meter only. This section will be hidden. Capturing of meter reading will be done during the final bill schedule after Move Out is completed.

C) Move Out Guiding Procedure – Contract Account and Payment

In this section, additional information such as Contract Account and mailing address is shown (Figure 3: Guiding Procedure – Contract Account & Billing).

Figure 3: Guiding Procedure - Contract Account & Billing

Contract Account

The CA (Contract Account) is SAP master data object used to manage all Contracts and financial data. CA for the Contract is shown on this view. The management of the CA is detailed further in the BPD document [CC-FI-01 - Business Master Data - Manage Contract Account document](#).

Mailing Address

The user will have the ability to update an existing mailing address or create a new mailing address. Such update will be reflected in the Business Partner master data.

Premise address will be defaulted as the Standard mailing address on the screen. If the BP does not want the premise address to be the standard mailing address, user can enter another address as standard mailing address. Refer to [Decision # 39 Use service \(premise\) address as BP standard address](#).

The final bill will be sent to the mailing address currently set for the Contract Account. If the user needs to update the address for the Contract Account and if it doesn't exist for the BP, the address must be added to the BP record first. If the Contract Account has a fixed address it is an SAP best practice to update the mailing address after the Move Out is completed.

D) Review

The Summary view is the final step of the guiding procedure (Figure 4: Guiding Procedure 4 – Review) where the user can recap and review the details of the elements that they have entered during the Move Out process before they proceed with the submission of the Move Out. The review of the details include:

- The BP and Contract Account participating in the Move Out.
- Mailing address and billing information.
- Premise and service(s) selected for Move Out along with their respective Move Out date(s).

Figure 4: Guiding Procedure – Review

If mandatory data is missing during this process, the Move Out process will not be completed and the user will need to review the information and correct and / or enter the data before completing the Move Out process. Upon successful completion of the Move Out, several outputs are created in S/4HANA and they are as follows:

- Move Out Document is created,
- Contract's Move Out Date will be updated,
- Contract will be updated directly in S/4HANA (no replication is involved)

Contract

When the Move Out has been submitted via Hybris C4C, the Contract will get updated in S/4HANA directly. Contract contains information such as the Contract Account number, Move Out Date and Installation number.

Move Out Document

Move Out document is created in S/4HANA. The Move Out document stores all data from this process including the BP and Contract data, the mailing address, bank data and consumption data. This Move Out

document will also have a status field that indicates if the final meter reading has been entered, customer billed, and invoiced. The creation of the Move Out document will also trigger the creation of the Service Order for non-smart meter to complete the field activity or the RSS Request for RSS eligible smart meter for the Move Out request. The creation of Move Out Document is transparent to the user.

2.1.2 Security Deposit

All security deposits associated with the contract are to be released at the final billing step of the Move Out process. The Security Deposit amount will be settled during the final bill and the financial impact will be visible to the user on the Account History view, as seen in Hybris C4C. For additional details about this process and how the security deposit will be applied to the charges for the final bill, refer to the BPD document [CC-FI-03 - Manage Credit - Manage Security Deposit](#).

As part of the Move Out process, user will ask if BP wants to receive the security deposit refund electronically or through a check (if there is still any deposit left after applied to the final bill). If customer opts for a check, user does not need to do anything. If BP opts for electronic refund using new or existing bank account, user will add the new bank account in BP master if BP gives a new bank account and then update the payment method at Contract Account.

2.1.3 Installation Plan

All active installment plans associated with the contract account will remain active until the Installment Plan end date. Refer to the BPD [CC-FI-08 - Manage Collections \(Dunning\) - Manage Payment Arrangements](#) document.

2.1.4 Budget Billing Plan

Any active Budget Billing Plan (BBP) associated with the Contract will be terminated by the system automatically during the final billing step of the move-out process (after Move Out is submitted). The true-up, which is the difference between the BPP and actual amount owed, is performed at final invoicing, and is detailed in the BPD [UB-BI-10 - Produce Invoice - Collective and Joint Invoicing](#) document.

2.1.5 Final Bill

The final bill is created via a regular batch job in S/4Hana and this is managed by the Usage & Billing team.

If a premise has multiple services and the BP is not ending all services from SCE, the remaining services that are active for the premise will still continue to get the consumption bill amount from SCE while the terminated service will get a final amount.

2.1.6 Owner Allocation

If an active Owner Allocation agreement exists at the location where a Move Out has been completed for the tenant, the system will automatically create a Move In for the landlord. The process is detailed in BPD [CIM-CS-14 - Manage Owner Allocation](#) document.

2.1.7 Program and Services

Programs & Services that are enrolled for the BP will be de-enrolled during Move Out process. Programs and Services that are stored in Installation Facts will be end-dated upon Move Out completion by system

automatically if they are configured as Contract-relevant (configuration is at contract level as defined by UB). Special Programs that are stored outside of Installation Facts will not be end-dated upon Move Out completion and will need to be end dated by agent manually via the customized screen developed by Product & Program. Refer to BPD document [PP-02 - Program Enrollment and Delivery, De-Enrollment & Decommission Programs](#).

2.1.8 Capturing of notes

User will capture notes during Move Out process as an Activity in Hybris C4C manually. The detail information will be documented in the Activity's long text. The user will list the requester's first and last name, relationship to the account holder and call back phone number or email address as the first entry in the free form notes field. This applies if it is the account holder that is calling or if an authorized caller calls on behalf of BP. A customer contact will be created automatically when the Move Out is initiated from IVR or SCE.COM. This will be handled and documented in BPD document [CIM-CS-10 - Manage Customer Self-Service](#) and [CIM-CS-13 - Manage Inbound Telephone Call – IVR](#).

2.1.9 Meter Access Information

It is important to capture meter access information such as locked gate and number of dogs for every Move Out. This information will be captured outside of the Move Out process. After Move Out is submitted, user will go to Service Order view and enter the meter access information in the Service Order note (Figure 5: Service Order note) via Hybris C4C. Information captured will be shown on the Service Order note. Refer to BPD document [DF-WM-02 – Handle Field Orders – Manage Field Orders](#) for more information.

The screenshot displays the Hybris C4C interface for managing service orders. At the top, there is a navigation bar with tabs for UTILITIES 360, TICKETS, UTILITIES CONTRACTS, UTILITIES FINANCIALS, UTILITIES SERVICE ORDERS (selected), ADDRESSES, and RELATIONS. Below the navigation bar, a table titled 'Service Orders (1)' lists a single service order with ID 70000320, description 'replace meter is needed to fulfill. Dog', service order number SM01, created on 03/01/2018, and status 'Initial Status'. A modal form titled 'Edit Service Order' is open, showing details for service order ID 70000320, service address 110 Alcovy Road San Diego US 92108, and initial status. The form includes fields for Start Date (03/01/2018) and End Date (03/01/2018), both set to 1:29 PM. A text area for Description contains the note 'replace meter is needed to fulfill. Caution the 2 dogs in premise.' A 'Start Date' button is also visible.

Figure 5: Service Order note

2.1.10 Refer Move Out to Offline Support

User may create a Ticket when the Move Outs to be executed for the BP exceeds the limit as defined by the business (e.g., 6) or call volumes are high. This is to better utilize user time in serving other BPs and allowing the Offline Support team (OLS) to handle the Move Outs. User will create a Ticket category 'Move Out Exceeds Number of Transaction' manually in Hybris C4C and Ticket will route to an offline support team. The offline support team will attend to the Ticket and contact the BP to carry out the Move Out.

2.1.11 Added Facility

If the move out premise has Added Facility, BP will usually contact CCC/ BCD Account Executive when requesting a Move Out. Added Facility identifier resides as a Division in an Installation. Added Facility can be easily seen as an additional line item along with other division such as Electric, Gas and Water in Move Out view as seen in Figure 2: Guiding Procedure – Services. User will advise the BP that it will take up to 10 business days to research the contract and identify if any termination charges apply. BP will also be advised that termination of Added Facility can occur no earlier than 30 days from the notice.

User will submit the Move Out. User will create a billing block for the contract (Figure 6: Set Billing Block) and create a BPEM case category 'Move Out – Added Facility' in Hybris C4C. The BPEM case will be routed to T&D to modify the agreement and reassign to BCD if needed. T&D will then assign the BPEM case to RSO Billing. RSO Billing attends the BPEM case and decide if the Added Facility can be removed from the premise by flagging and determine the termination charges. RSO Billing will remove billing block and mark Added Facility Installation as deleted in S/4HANA if applicable. The Move Out will not create a Service Order or RSS Request for the Added Facility Contract.

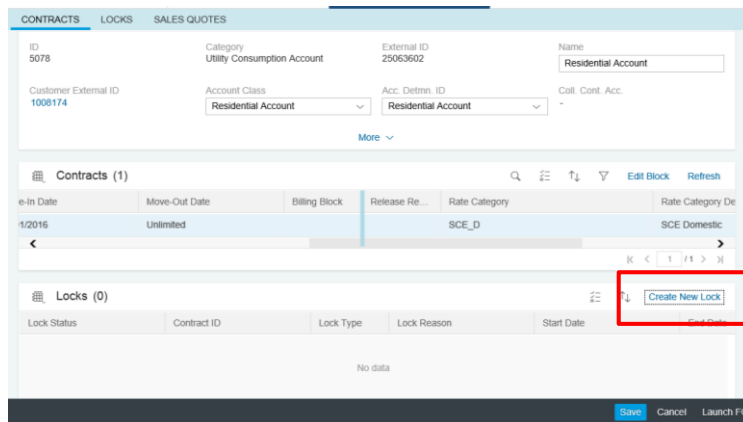

Figure 6: Set Billing Block

2.1.12 CCA/DA

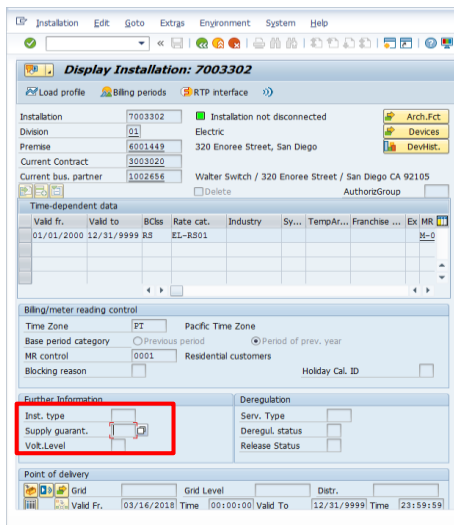

User is able to do Move Out for CCA/DA contract, there is no restriction. CCA/DA contract will be dropped via IDEX process, refer to BPD [UB-ID-02 Process EDI Contracts – Drop](#) for more information.

2.1.13 Meter Replacement

If the premise has a non-smart meter, a Meter Change Out Service Order will be created automatically to change out the non-smart meter to smart meter after the Move Out effective date. SCE has 15 days to change out the meter via enhancement *E-CIM-CS-02 - Create Work Order during Move-In/Move-Out/Transfer*. If a new BP moves in prior to the meter being changed to a smart meter, the BP will get billed with consumption on the day BP moved in and not the date the meter is changed out. Refer to BPD document [DF-WM-02 - Handle Field Orders - Manage Field Orders](#) for more information.

2.1.14 Self-Certified Sensitive

Self-Certified Sensitive is identified using BPEM Case and Supply Guarantee in Installation. If Move Out is on a premise that was identified as Self-Certified Sensitive, User needs to remove the Supply Guarantee flag (Figure 7: Supply Guarantee) from Installation prior submitting the Move Out. User will also close out the Self Certified BPEM case manually. Alternatively, the BPEM case will appear in the BDEx report for RSO to close out the BPEM case when it reaches 90 days.

Figure 7: Supply Guarantee

2.1.15 Disconnection

A Disconnection Document may be created automatically after Move Out is submitted. A Disconnection Document is needed in order to disconnect the service at the premise.

Disconnection Document will be created based on the business rules below:

- When there is no active Owner Allocation agreement found for the Installation,
- When there is no pending Move In Contract found for the same Installation on the next calendar day. For example, if the Move Out is requested for Friday and pending Move In is requested for Monday, or after, then a Disconnection Document will be created.

Disconnection Document will not be created on the business rules below:

- If there is an OA agreement for the premise and the Move Out is requested then the service remains on and owner will move in automatically. No Disconnection Document will be created.
- If the power is already off due to Credit Disconnection (Dunning) then Disconnection Order is not required

For more information about Disconnection Document, refer to BPD document [DF-WM-03 - Handle Remote Orders - Manage Remote Orders](#). The enhancement to create Disconnection Document is identified by DF-WM-03 using *E-DF-WM-03 – Disconnection for Move Out*.

2.1.16 OBF (On Bill Financing)

When a customer has an active OBF loan and move out is initiated, the customer will be billed-in-full. Please refer to BPD, [CC-FI-15 Handle Account Adjustments – Manage Miscellaneous Postings](#).

2.1.17 SB 120 – Rental Property

If the premise is identified as a rental property, user needs to remove the rental property setup from BP record if required. To identify if premise is a rental property, user locates the landlord or tenant BP record in Hybris C4C (Figure 8: BP Relationship). If there is a 'Landlord-Tenant' relationship setup between the landlord and tenant BP, user needs to delete the BP relationship via Hybris C4C (Figure 6: BP Relationship) during or after Move Out is submitted. Refer to BPD [CIM-CS-01 - Business Master Data - Manage Business Partner](#) for steps to end date a BP Relationship.

2.1.18 NEM Aggregation

If the Move Out contract is NEM Aggregation, user will not proceed with the Move Out request and create a BPEM case 'NEM Aggregation' manually issued to NEM Interconnection team to verify NEM Aggregation Eligibility (Parcel Contiguity). NEM Interconnection team will work on the BPEM case and submit the Move Out request manually via Hybris C4C. NEM Aggregation can be identified by navigating to Billing Parameter (Installation Facts) at Utilities Rate Change in Hybris C4C view (Figure 9: Billing Parameter).

Figure 10: Move Out Date Change

The conditions below must be met for Move Out Date Change to occur are:

- The new Move Out Date is greater than the Move In Date of the Contract. If the customer requests the move out date to be after the date of the move in.
- The new Move Out Date should not fall in a period that has already been billed. However, an enhancement will make this Move Out Date change possible by reversing the bill(s) automatically from the new Move Out Date onwards via *E-CS-CIM-03 Move Out /Change/Reversal - Invoice Reversal*.
- The new Move Out Date does not overlap with the previous contract
- Changing of the Move Out date will not automatically adjust the Move In date of the new/ force out contract. User will need to check if there is any pending Move In and adjust the Move In date of the pending Move In accordingly. Additionally, the following conditions also apply during the Move Out Date Change process:
 - If the Move Out Service Order is in pending status, the Move Out Service Order start date will be updated. This will be done via enhancement *E-CIM-CS-02 - Align New Move-In date to Service Order*.
 - New Move Out date will be updated to RSS, this will be done via enhancement *E-CIM-CS-02 - Align New Move-In date to Service Order*.
 - Change of Move Out date is not allowed if the Move Out Service Order is in completed status and service to the premise has ended. An error message will be shown in Hybris C4C informing the Move Out Date Change is not allowed. This will be done via enhancement *E-CIM-CS-02 - Align New Move-In date to Service Order*.

Any associated Service Order Start Date with the end contract process will be updated automatically to reflect the change of the Contract End Date. This will be done via *E-CIM-CS-03 Sync up Service Order and RSS Request due to Contract End Date change*.

In the case that the end date is changed or cancelled the user should be aware that the mailing address needs to be considered. Neither of these standard screens include the mailing address, therefore, the user will need to validate the customer's mailing address manually after performing an adjustment to an existing move out.

2.2.1 Capturing of notes

User will capture any notes during Move Out Date Change Process as an Activity in Hybris C4C manually. The detail information will be documented in the Activity's long text. The user will list the requester's first and last name, relationship to the account holder and call back phone number or email address as the first entry in the free form notes field. This applies if it is the account holder that is calling or if an authorized caller calls on behalf of BP.

A BP Contact will be created automatically when the Move Out Date Change is initiated from IVR or SCE.COM. This will be handled and document in BPD document [CIM-CS-10 - Manage Customer Self-Service](#) and [CIM-CS-13 - Manage Inbound Telephone Call – IVR](#).

2.2.2 Programs & Services

End date of the programs & services enrolled by BP will be adjusted automatically after Move Out Date Change is completed. Refer to BPD document *PP-02 - Program Enrollment and Delivery, De-Enrollment & Decommission Programs* for more information.

2.2.3 CCA/DA

If the Contract is CCA or DA user will not execute the Move Out Date Change. User will create a BPEM Case category 'Move Out Adjustment - CCA/DA' manually and BPEM case will be routed to RSO. An EDI Contract Data Update process will be executed by RSO. RSO will execute the Move Out Date Change. If there is any usage, RSO will do a bill reversal and rebill manually. In addition, RSO will send a maintenance transaction to CCA/DA informing them about the change.

Refer to BPD [UB-ID-03 Process EDI Contracts – Data Changes](#) for more information.

2.2.4 RSS Request & Service Order

Changing of the Move Out date will not automatically adjust the RSS Request or Service Order end date within SAP Standard. An enhancement has been identified to update RSS Request and Move Out Meter Read Order start date if Service Order status is not 'In route', 'On site', 'Completed'. This will be done using enhancement *E-CIM-CS-02 - Align New Move-In date to Service Order*.

Disconnection Document date will get updated as well if applicable so that date is aligned with new Move Out date.

If system is not able to update the new Move Out date to Service Order due to status, a message will be shown in Hybris C4C that Move Out Date Change is successful but new Move Out date failed to be updated to Service Order. User will need to create a new Reconnect Order with today's date followed by a new Disconnect Order with actual Move Out date.

2.2.5 Appointment Scheduling

There is no appointment scheduling required with CLICK for Move Out Date Change.

2.3 Move Out Reversal Details

Should the BP desire to cancel the Move Out request, the user will execute the Move Out Reversal process (Figure 11: Move Out Reversal) to reinstate the Contract and choose a cancel reason, presuming the following conditions exist:

- The utility Contract has yet to receive a final bill.
- No subsequent utility Contract exists at that location for the same Installation.

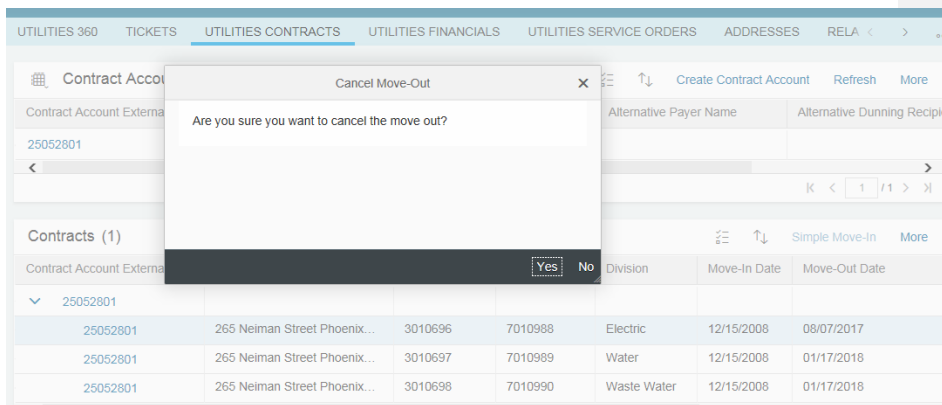

Figure 11: Move Out Reversal

If the contract has been final billed, the final bill and billing documents must be reversed before the contract end date can be changed. System will reverse the final bill and billing documents automatically from the new Contract End Date onwards via *E-CS-CIM-03 Move Out /Change/Reversal - Invoice Reversal*. Installation Facts operand that has been end dated by Move Out process automatically will be re-activated by Move Out process. When applicable, the user will need to manually reinstate the following that may be deactivated during final bill or Contract End process. Design is pending completion of input from other BPDs:

- Budget Billing Plan
- Installment Plan
- Installation Facts operand that has been end dated
- On Bill Financing
- Contract level preferences

Additionally, the following conditions also apply during the Move Out Reversal process:

- A user will be allowed to Cancel Contracts for a BP who is enrolled with a CCA/DA
- If a future dated Move In exists for the premise, the Move In will need to be canceled first before the Move Out reversal can be executed.

2.3.1 RSS Request & Service Order

By reversing the Move Out request, the system will cancel the Move-Out RSS Request and Move Out Service Order for the premise automatically if the Service Order status is not 'In route', 'On site' or 'Completed' using *E-CIM-CS-03 Reversal of Work Order during Move-Out Reversal*. If the Service Order status is 'In route', 'On site' or 'Completed', system will show message about Move Out Reversal is successful but Service Order not able to be canceled and user will create a new Service Order manually to connect the service to the premise.

The Disconnection Document needs to be canceled. If the Disconnection Order in the Disconnection Document is already completed, system will create a Reconnection Order for the Disconnection Document to reconnect the service at the premise. This enhancement will be done using *E-DF-WM-03 – Disconnection for Move-Out*.

2.3.2 Capturing of notes

User will capture any notes during Move Out Reversal Process as an Activity in Hybris C4C manually. The detail information will be documented in the Activity's long text. The user will list the requester's first and last name, relationship to the account holder and call back phone number or email address as the first entry in the free form notes field. This applies if it is the account holder that is calling or if an authorized caller calls on behalf of BP.

A Customer Contact will be created automatically when the Move Out Reversal is initiated from IVR or SCE.COM. This will be handled and document in BPD document [CIM-CS-10 - Manage Customer Self-Service](#) and [CIM-CS-13 - Manage Inbound Telephone Call – IVR](#).

2.3.3 Programs & Services

User needs to manually re-enroll the Programs & Services that BP previously enrolled with before the Move Out. Refer to BPD document *PP-02 - Program Enrollment and Delivery, De-Enrollment & Decommission Programs* for more information.

2.3.4 CCA/DA

If the Contract is CCA or DA, user will not create the Move Out Reversal. User will create BPEM Case Category 'Move Out Reversal – CCA/DA' and BPEM case will be routed to RSO. RSO will send a maintenance transaction to CCA/DA informing them about the reversal.

Refer to BPD [UB-ID-03 - Process EDI Contract Data Changes](#) for more information.

2.3.5 Security Deposit

A Security Deposit that has been canceled or refunded to the BP after Move Out process will need to manually be reinstated. Move Out Reversal functionality does not reinstate the deposit automatically. User will reinstate the deposit using Hybris C4C FOP functionality where S/4HANA Deposit creation screen (Tcode FPSEC1) will be shown. This will be done using enhancement *E-CIM-CS-02 Transaction Launcher*.

2.3.6 Appointment Scheduling

There is no appointment scheduling required with CLICK for Move Out Reversal.

2.3.7 NEM

If the Contract is NEM, Move Out reversal will reverse the Move out and BP will return to the NEM month where BP was last billed before Move Out occurred. The detail information of reinstatement of the NEM Contract to the last bill in the event of Move Out reversal is documented in BPD [UB-BI-12 - Calculate Energy Bill - Net Metering](#).

2.4 Transfer Details

The Transfer process is managed as part of the guided procedure within Hybris C4C. This will lead to termination of Contract in a premise and starting of a new Contract in a different premise. Transfer process consists of six guiding procedures that help users navigate through each step of this process. The guiding procedures are actually made up of Guiding Procedures of Move Out process and Move In process. The six guiding procedures of Transfer process are:

- Move Out Premise
- Move Out Services
- Move In Premise
- Move In Services
- Contract Account and Billing
- Review

Validation and logic mentioned in Move Out process are applicable to Transfer Guiding Procedure 1 - Move Out Premise and Guiding Procedure 2 - Move Out Services, unless it is specifically mentioned otherwise in this document.

Validation and logic mentioned in Move In process are applicable to Transfer Guiding Procedure 3 – Move In Premise, Guiding Procedure 4 – Move In Services and Guiding Procedure 5 – Contract Account and Billing, unless it is specifically mentioned otherwise in this document.

Transfer Guiding Procedure captures Move Out information followed by Move In information. The details of each Guiding Procedures are documented below.

A) Transfer Guiding Procedure 1 – Move Out Premise

In this Guiding Procedure, Move Out information is captured first. User needs to locate the Contract before initiating the Transfer Process. When the Transfer is initiated, Guiding Procedure – Move Out Premise view will be shown (Figure 12: Guiding Procedure – Move Out Premise). If the premise is not already identified before initiating the Transfer, user is able to select the Move Out Address from the Move Out Address drop down selection field. User will ask the BP for the Move Out Date and enter the date into Move Out Date field.

Figure 13: Guiding Procedure - Move Out Services

Move Out

List of Services that customer signed up for will be available and shown in the Move Out section. Functionality is the same as the Move Out Process.

Create Service Order

Create Service Order functionality is the same as the Create Service Order functionality in Move Out Process. The Create Service Order checkbox and Description field will be made hidden as the user does not need to decide if a Service Order or RSS Request needs to be created.

Meter Reading

Meter Reading section will be made hidden as capturing of customer read is not applicable to SCE and meter reading will be done during the final bill schedule after Move Out is completed.

C) Transfer Guiding Procedure 3 – Move In Premise

Move In information is being captured in the next couple of Guiding Procedures. In this Guiding Procedure, the user will select the Move In address and the Move In date (Figure 14: Guiding Procedure 4 – Move In Premise). Validation and functionality is the same as the Move In Process. Move In Date selected does not have any dependency with the Move Out Date selected in Transfer Guiding Procedure 1 – Move Out Premise. Both dates can overlap as both dates are not referring to the same Contract.

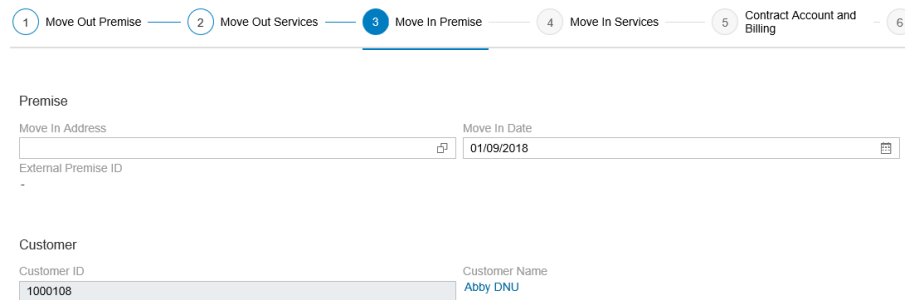

Figure 14: Guiding Procedure 4 - Move In Premise

D) Transfer Guiding Procedure 4 – Move In Service

In this Guiding Procedure (Figure 11: Guiding Procedure 5 – Contract Account and Billing), user will identify the service(s) the BP would want to enroll in. List of the applicable Rate Category's will be available for user to select. User will be able to select ESC Opt Out if required. The deleted check box is always in display mode. If Installation is marked deleted, the Deleted checkbox will be checked and the Select Service checkbox will be set to disabled. User will not able to select the line item where Deleted checkbox is checked. This will be done using enhancement *E-CIM-CS-02 - Capture Opt Out, Inspection Required and service fees*.

Notes for Move Out ⌵

Notes For Move In ⌵

Figure 17: Guiding Procedure - Review

2.4.1 Paperless Billing (e-Bill)

If the BP has signed up for e-Bill at the old premise, BP will continue to receive e-Bill at the new premise. The e-Bill indicator is stored in the Contract Account and the Contract Account will be reused during Transfer process, hence the continuance of BP receiving e-Bill at the new contract.

If the BP did not sign up for e-Bill at the old premise, user will need to enable e-Bill in Hybris C4C via FOP. This will be done via *E-CIM-CS-02 Transaction Launcher*.

2.4.2 Programs & Services

Depending program eligibility, Programs and Services that BP has signed up for in the old premise will be transferred automatically to the new premise after Transfer is completed. Refer to BPD document *PP-02 - Program Enrollment and Delivery, De-Enrollment & Decommission Programs* for more information.

2.4.3 CCA

When BP has opted out of CCA from the moving out premise and transferring within the same CCA territory, customer does not need to opt out CCA again.

When BP has opted out of CCA from the moving out premise and transferring to a different CCA territory, customer does need to opt out CCA if desired.

When BP has opted out of CCA from the moving out premise and transferring to a Non-CCA territory, no CCA opt in or opt out required.

2.5 Process / Performance Improvement

- Ability to navigate away from Move Out or Transfer View view without cancelling the transaction
- Increase visibility and improve overall process efficiency by reducing hands off by allowing BCD to execute Contract End functionality

2.6 Prerequisites and Inputs

A request to create or change Move Out and Transfer may originate via the following channels or systems:

- SAP systems & SCE.COM need to be available for Web Self Service
- IVR system needs to be available for IVR
- Contract must exist in S/4HANA
- Move-Out date is determined
- Contract is active and moved out is not carried out to the Contract
- BP, Contract Account, old and new premise must exist before Transfer process is initiated

2.7 General Assumptions

- CCC, BCD, RSO CBO, RSO CAPS, and other front office users will be executing Move Out, Move Out adjustment and Move Out reversal.
- Some Programs & Services will be stored in SAP as a Rate Category or Installation Facts.
- In the event of Move In Date Change and Reversal, the Program & Service will be updated by Program and Product's program automatically. This is with the assumption that PP RICEFW items associated with these functionalities are approved in their BPD
- All users are advised to issue a move-out (e.g. bankruptcy situations) via Hybris C4C.
- T&D will accept BPEM
- If there is a Smart Meter, there is no need to create a RSS Service Order to obtain a final read as the interval data will be used. The Final bill will use the meter reading from the last Interval read of the day of move out.

2.8 Business Process Hierarchy

This Business Process Hierarchy provides a listing of all scenarios/business processes, sub-processes, and SAP Transaction codes identified to support this process.

Level 1	Level 2	Level 3	Level 4
FO	Handle Customer Move-In/Out	Contract End	Create Move Out
FO	Handle Customer Move-In/Out	Contract End	Change Move Out Date
FO	Handle Customer Move-In/Out	Contract End	Move Out Reversal
FO	Handle Customer Move-In/Out	Contract End	Transfer

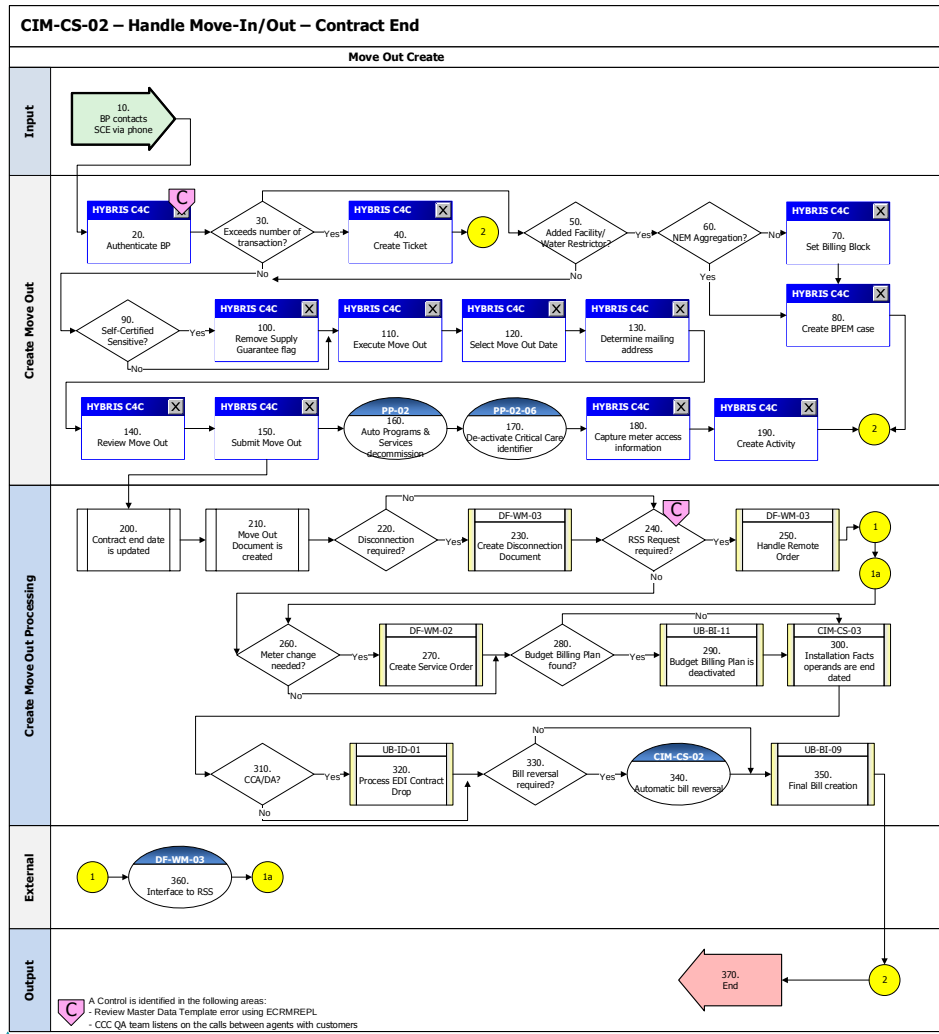

2.9 Process Flows

This BPD will cover four processes, including Create Move Out, Move Out Date Change, Move Out Reversal and Transfer processes. Each subsection where the process is detailed will have a process flow diagram for that process and a table detailing the steps that are taken within that process including processes handled outside of SAP.

2.9.1 Create Move Out

This process flow describes the process of create Move Out.

Process Flow Diagram

Process Flow Steps

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
10	Customer contacts SCE via phone BP calls CCC or BCD to request for Move Out.	N/A	N/A	
20	Authenticate BP Validate Requestor is authorized to request Move out Date Change	Hybris C4C	Front Office User Create Move Out	Control identified
30	Exceeds number of transaction? If number of Move Out to be executed exceeds the number defined by SCE, go to step 40. Otherwise, go to step 50.	N/A	Create Move Out CCC/BCD	
40	Create Ticket Ticket is created and routed to the respective group to work on. Proceed to step 370.	Hybris C4C	Create Move Out CCC/BCD	
50	Added Facility/Water Restrictor? If the move out is for Added Facility or Water Flow Restrictor, go to step 60. Otherwise, go to step 70.	Hybris C4C	Create Move Out Front Office User	
60	NEM Aggregation? If Contract is NEM Aggregation, go to step 80. Otherwise, go to step 70.	Hybris C4C	System	
70	Set Billing Block Update Contract with Billing Block.	Hybris C4C	Create Move Out Front Office User	
80	Create BPEM case User creates a BPEM case manually.	Hybris C4C	Create Move Out Front Office User	
90	Self-Certified Sensitive? If Installation is tagged as Self-Certified Sensitive, go to step 100. Otherwise, go to step 110.	Hybris C4C	Create Move Out Front Office User	
100	Remove Supply Guarantee flag Remove the Self-Certified flag from Supply Guarantee field in Installation.	Hybris C4C	Create Move Out Front Office User	
110	Execute Move Out Execute Move Out process in system.	Hybris C4C	Create Move Out Front Office User	

Formatted Table

Formatted Table

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
120	Select Move Out Date Choose a Move Out date.	Hybris C4C	Create Move Out Front Office User	
130	Determine Mailing address Option to capture forwarding address or use existing mailing address as forwarding address.	Hybris C4C	Create Move Out Front Office User	
140	Review Move Out Review the information captured during Move Out process before submitting the request.	Hybris C4C	Create Move Out Front Office User	
150	Submit Move Out Click Submit button to submit Move Out	Hybris C4C	Create Move Out Front Office User	
160	Auto Programs & Services decommission Programs & Services are decommissioned automatically	Hybris C4C	System	
170	De-activate Critical Care identifier Critical Care identifier will be de-activated by system automatically if applicable	Hybris C4C	System	
180	Capture meter access information Capture meter access information in Service Order note	Hybris C4C	Create Move Out Front Office User	
190	Create Activity Create an Activity Record and document the information in the long text. Proceed to step 370.	Hybris C4C	Create Move Out Front Office User	
200	Contract End Date is updated Contract End Date is updated with Move Out Date	S/4HANA	System	
210	Move Out Document is created Move Out Document is created	S/4HANA	System	
220	Disconnection required? If Disconnection Document is required to be created, go to step 230. Otherwise, go to step 240.	S/4HANA	System	
230	Create Disconnection Document Disconnection Document and Disconnection Order (for the Disconnection Document) is created.	S/4HANA	System	

Formatted Table

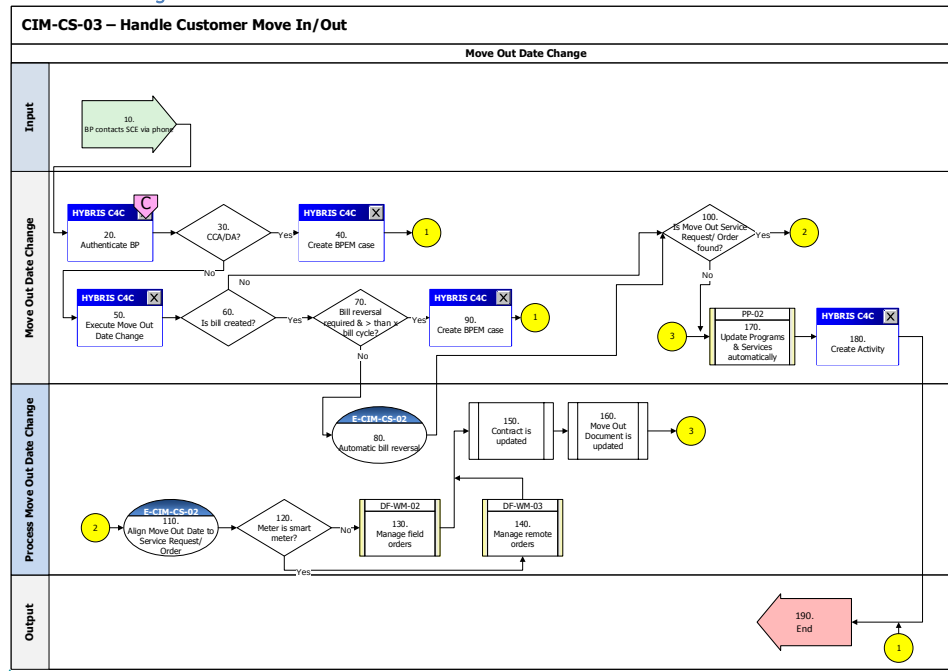

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
240	RSS Request required? If RSS Request is required, go to step 250. Otherwise go to step 260.	S/4HANA	System	Control Identified
250	Handle Remote Order RSS Request is created.	S/4HANA	System	
260	Meter change needed? If meter needs to be changed to smart meter or legacy meter, go to step 270. Otherwise, go to step 280.	S/4HANA	System	
270	Create Service Order Meter Change Out Service Order to change out to smart meter/legacy is created.	S/4HANA	System	
280	Budget Billing Plan found? If Budget Billing Plan is active for the Contract, go to step 290. Otherwise, go to step 300.	S/4HANA	System	
290	Budget Billing Plan is deactivated Budget Billing Plan is deactivated.	S/4HANA	System	
300	Installation Facts Operands are end dated Installation Facts Operands end date is updated with Move Out date.	S/4HANA	System	
310	CCA/DA? If Contract is CCA or DA, go to step 320. Otherwise, go to step 330.	S/4HANA	System	
320	Process EDI Contract Drop The process of EDI Contract Drop.	S/4HANA	System	
330	Bill Reversal required? If bill reversal is required (applicable for backdated Move Out), go to step 340. Otherwise, go to step 350.	S/4HANA	System	
340	Automatic Bill Reversal Bill(s) are automatically reversed.	S/4HANA	System	
350	Final Bill creation Final bill is created.	S/4HANA	System	

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
360	Interface to RSS RSS Request is routed to RSS.	S/4HANA	System	
370	End			

2.9.2 Change Move Out Date

This process flow describes the process of Move Out Date Change.

Process Flow Diagram

Field Code Changed

Process Flow Steps

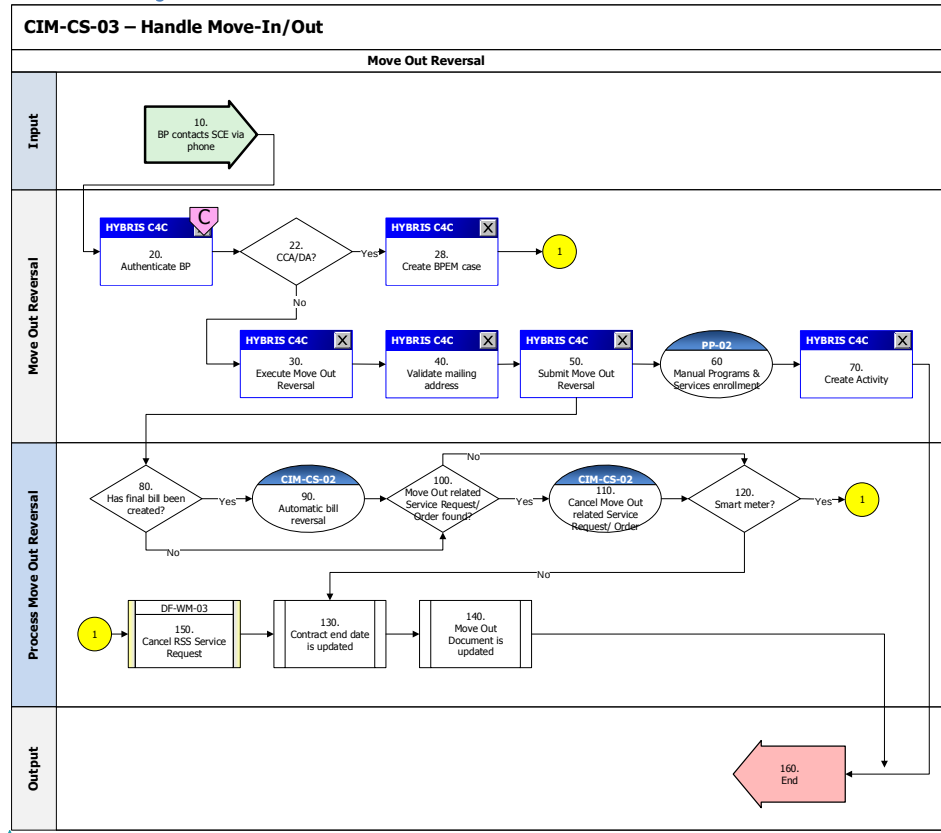

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
10	BP contacts SCE via phone BP calls CCC or BCD to request for Move Out Date change.	N/A	N/A	
20	Authenticate BP Validate Requestor is authorized to request Move out Date Change	Hybris C4C	Front Office User	Control identified
30	CCA/DA? If Contract is CCA or DA, go to step 40. Otherwise, go to step 50.	Hybris C4C	Front Office User	
40	Create BPEM case Create BPEM case manually.	Hybris C4C	Front Office User	
50	Execute Move Out Date Change User execute Move Out Date Change functionality	Hybris C4C	Front Office User	
60	Is bill created? If bill is created for the contract, go to step 40. Otherwise, go to step 50.	N/A	N/A	
70	Bill reversal required & > than x bill cycle? If bill reversal is required and more than x billing cycle, go to step 90 to create BPEM. Otherwise go to step 80.	Hybris C4C	Front Office User	
90	Create BPEM Create Move Out Bill Reversal BPEM case.	Hybris C4C	Front Office User	
80	Automatic bill reversal Bills are automatically reversed via enhancement.	EA20	System	
100	Is Move Out Service Request / Service Order found? If Move Out Service Request / Service Order found, go to step 110. Otherwise, go to step 170.	N/A	N/A	
110	Align Move Out Date to Service Request / Service Order Enhancement to update new Move Out Date to Service request / Service Order.	S/4HANA	System	
120	Meter is smart meter? If meter is a smart meter, go to step 140. Otherwise go to step 130.	N/A	N/A	

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
130	Manage Field Orders DF-WM-02 process handles process after Service Order start date is updated.	S/4HANA	N/A	
140	Manage Remote Orders DF-WM-03 process updates Service Request to RSS.	S/4HANA	N/A	
150	Contract is updated New Move Out Date is updated to Contract.	S/4HANA	System	
160	Move Out Document is updated New Move Out Date is updated to Move Out Document	S/4HANA	System	
170	Update Programs & Services Programs & Services are updated automatically by system	Hybris C4C	System	
180	Create Activity User creates an Activity documenting the information in the long text	Hybris C4C	Front Office user	
190	End	N/A	N/A	

2.9.3 Move Out Reversal

This process flow describes the process of Move Out Reversal

Process Flow Diagram

Field Code Changed

Process Flow Steps

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
10	BP contacts SCE via phone. BP calls SCE to request to Move Out Reversal	N/A	N/A	
20	Authenticate BP Verify requestor is authorized to change the Move out Date	Hybris C4C	Front Office User Move Out Reversal	Control identified

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
22	CCA/DA? If Contract is CCA or DA, go to step 28. Otherwise, go to step 30.	Hybris C4C	Move Out Reversal Front Office User	
28	Create BPEM case Create BPEM case manually.	Hybris C4C	Move Out Reversal Front Office User	
30	Execute Move Out Reversal User executes Move Out Reversal functionality	Hybris C4C	Move Out Reversal Front Office User	
40	Validate mailing address Validate mailing address in case it was changed during Move Out process	Hybris C4C	Move Out Reversal Front Office User	
50	Submit Move Out Reversal User submits Move Out Reversal.	Hybris C4C	Move Out Reversal Front Office User	
60	Manual Services & Programs enrollment Services & Programs need to be manually enrolled by user	Hybris C4C	Move Out Reversal Front Office User	
70	Create Activity An Activity Record is created and information is documented in the long text.	Hybris C4C	Move Out Reversal Front Office User	
80	Has final bill been created? If bill is created for the Contract, go to step 90. Otherwise go to step 100.	S/4HANA	System	
90	Automatic bill reversal Enhancement to have bill(s) for the contract automatically reverse.	EA20	System	
100	Move Out related Service Request/ Order found? If Service Request or Service Order created by Move Out process, go to step 110. Otherwise go to step 120.	S/4HANA	System	
110	Cancel Move Out related Service Request/Order. Service Request and Service Order status is canceled.	S/4HANA	System	
120	Smart meter? If meter is a smart connect meter, go to step 150. Otherwise, go to step 130.	S/4HANA	System	

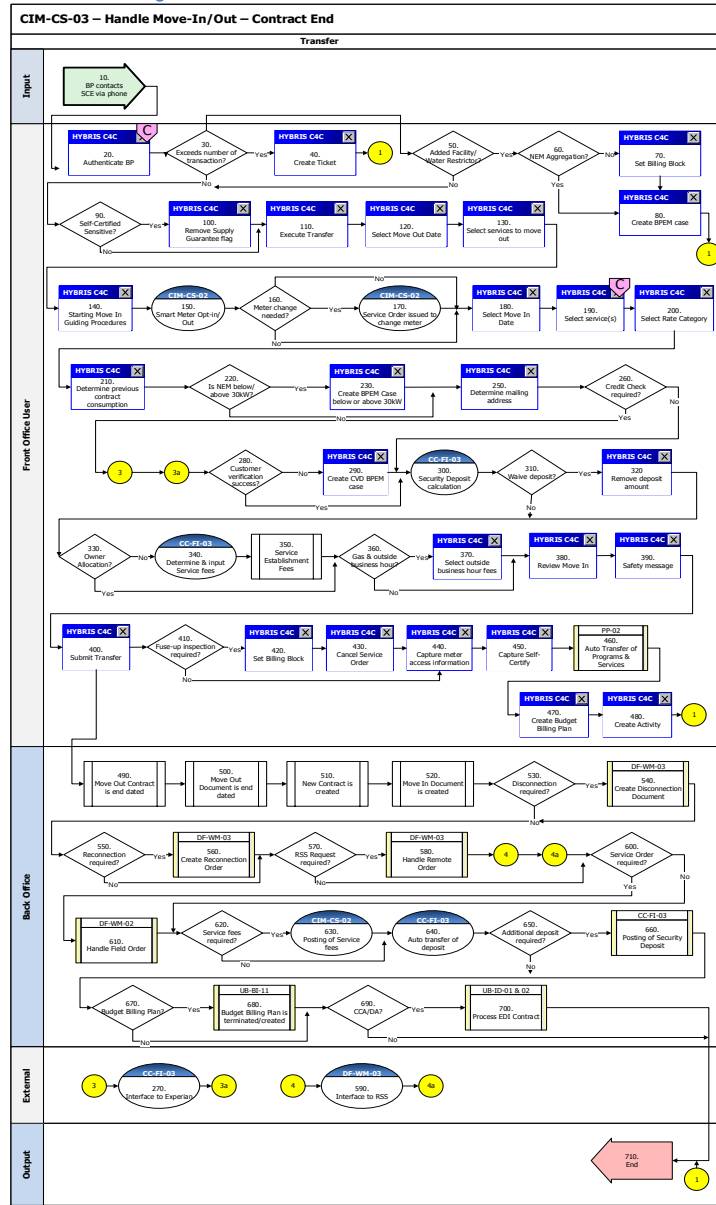

Formatted Table

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
130	Contract is updated Move Out date is removed from Contract End date	ES21	System	
140	Move Out Document is marked deleted Move Out Document is updated	EC56E	System	
150	Cancel RSS Service Request A cancel Service Request is sent to RSS.	S/4HANA	System	
160	End			

2.9.4 Transfer

This process flow describes the Transfer process.

Process Flow Diagram

Field Code Changed

Process Flow Steps

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
10	BP contacts SCE via phone BP calls CCC/BCD via phone call.	N/A	N/A	
20	Authenticate BP Verify the requestor is authorized to Transfer service	Hybris C4C	Front Office User Transfer	<u>Control identified</u>
30	Exceeds number of transaction? If number of Move Out to be executed exceeds the number defined by SCE, go to step 40. Otherwise, go to step 50.	N/A	Transfer CCC/BCD	
40	Create Ticket BPEM case is created and routed to the respective group to work on. Proceed to step 370.	Hybris C4C	Transfer CCC/BCD	
50	Added Facility/Water Restrictor? If the move out is for Added Facility or Water Flow Restrictor, go to step 60. Otherwise, go to step 70.	Hybris C4C	Transfer Front Office User	
60	NEM Aggregation? If Contract is NEM Aggregation, go to step 80. Otherwise, go to step 70.	Hybris C4C	System	
70	Set Billing Block Update Contract with Billing Block.	Hybris C4C	Transfer Front Office User	
80	Create BPEM case User creates a BPEM case manually.	Hybris C4C	Transfer Front Office User	
90	Self-Certified Sensitive? If Installation is tagged as Self-Certified Sensitive, go to step 100. Otherwise, go to step 110.	Hybris C4C	Transfer Front Office User	
100	Remove Supply Guarantee flag Remove the Self-Certified flag from Supply Guarantee field in Installation.	Hybris C4C	Transfer Front Office User	
110	Execute Transfer Execute Transfer functionality.	Hybris C4C	Transfer Front Office User	

Formatted Table

Formatted Table

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
120	Select Move Out Date Choose a Move Out date.	Hybris C4C	Transfer Front Office User	
130	Select Services to move out Select the services (electricity, gas, water etc.) to terminate service.	Hybris C4C	Transfer Front Office User	
140	Starting Move In Guiding Procedures Guiding Procedures for Move In is shown.	Hybris C4C	Transfer Front Office User	
150	Smart Meter Opt In/ Opt Out Capture the Opt In/ Opt Out for Smart Meter	Hybris C4C	Transfer Front Office User	
160	Meter change needed? If meter required to be changed, go to step 100. Otherwise, go to step 110.	Hybris C4C	System	
170	Service Order issued to change meter Service Order will be created to change out the meter to smart meter	Hybris C4C	System	
180	Select Move In Date Choose a Move In date.	Hybris C4C	Transfer Front Office User	
190	Select Service(s) Select the services (electricity, gas, water, added facility) for Move In.	Hybris C4C	Transfer Front Office User	<u>Control identified</u>
200	Select Rate Category Select a Rate Category.	Hybris C4C	Transfer Front Office User	
210	Determine previous contract consumption Check the kw of the previous contract	Hybris C4C	Transfer Front Office User	
220	Is NEM & below/above 30 kw? If Move In is NEM and previous contract kw is below or above 30kW, go to step 230. Otherwise, go to 250.	Hybris C4C	Transfer Front Office User	
230	Create BPEM Case below or above 30kw Create BPEM case for T&D Interconnection Agreement assessment for below or above 30kW.	Hybris C4C	Transfer Front Office User	

Formatted Table

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
250	Determine mailing address Option to capture new mailing address or use premise address as mailing address.	Hybris C4C	Transfer Front Office User	
260	Credit Check required? If BP requires credit check, go to step 270. Otherwise, go to step 300.	Hybris C4C	System	
270	Interface with Experian. Interface with Experian to get the credit score of BP.	Experian	System	
280	Customer Verification failed? If BP failed customer verification go to step 290. Otherwise, go to step 300.	Hybris C4C	Transfer Front Office User	
290	Create BPEM BPEM case is created and routed to the respective group to work on.	Hybris C4C	Transfer Front Office User	
300	Security Deposit calculation Security Deposit amount is derived based on business rule.	Hybris C4C	System	
310	Waive Deposit? If Security Deposit is to be waived, go to step 320. Otherwise, go to step 330.	Hybris C4C	Transfer Front Office User	
320	Remove Deposit amount Delete Security Deposit amount on the screen.	Hybris C4C	Transfer Front Office User	
330	Owner Allocation? If Move In is Not Owner Allocation, go to step 330. Otherwise, go to step 360.	Hybris C4C	System	
340	Determine & input Service fees Determine the fees required for the Move In.	Hybris C4C	Transfer Front Office User	
350	Service Establishment fees Service Establishment fees is required and defaulted on the screen.	Hybris C4C	System	

Formatted Table

Formatted Table

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
360	Gas & outside of business hour If Service type is Gas and Move In request is outside of business hour, go to step 370. Otherwise, go to step 380.	Hybris C4C	Transfer Front Office User	
370	Select outside business hour fees System defaults fees for outside business hour.	Hybris C4C	Transfer Front Office User	
380	Review Move In Review the information captured during Move In process before submitting the request.	Hybris C4C	Transfer Front Office User	
390	Safety message Go through safety message with BP.	Hybris C4C	Transfer Front Office User	
400	Submit Transfer Click Submit button to submit Move In.	Hybris C4C	Transfer Front Office User	
410	Fuse-up inspection required? If Fuse-up inspection is required, go to step 420. Otherwise, go to step 440.	Hybris C4C	Transfer Front Office User	
420	Set Billing Block Update Contract with Billing Block.	Hybris C4C	Transfer Front Office User	
430	Cancel Service Order Cancel the Service Order.	Hybris C4C – FOP	Transfer Front Office User	
440	Capture meter access information Meter access information such as lock gate, bad dog is captured.	Hybris C4C – FOP	Transfer Front Office User	
450	Capture Self-Certify Update Installation with Self-Certify.	Hybris C4C – FOP	Transfer Front Office User	
460	Auto transfer of Programs & Services Programs & Services that BP enrolled with are transferred to the new premise.	Hybris C4C	Transfer Front Office User	
470	Create Budget Billing Plan Budget Billing Plan is created.	Hybris C4C	Transfer Front Office User	

Formatted Table

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
480	Create Activity Record Create an Activity Record and document information in the long text.	Hybris C4C	Transfer Front Office User	
490	Move Out Contract is end dated Move Out Contract end date is updated.	ES21	System	
500	Move Out Document is end dated Move Out Document end date is updated.	EC50E	System	
510	Contract is created Contract for Move In is created.	ES21	System	
520	Move In Document is created Move In Document is created	EC50E	System	
530	Disconnection is required? If Disconnection is required, go to step 540. Otherwise, go to step 550.	S/4HANA	System	
540	Disconnection Document is created Disconnection Document is created for the move out premise.	EC86	System	
550	Reconnection is required? If Reconnection is required, go to step 560. Otherwise, go to step 570.	S/4HANA	System	
560	Create Reconnection Order Reconnection Order is created for the Disconnection Document for the move in premise.	EC86	System	
570	RSS Request required? If RSS request is required, go to step 580. Otherwise go to step 600.	S/4HANA	System	
580	Handle Remote Order The process of handle remote order.	S/4HANA	System	
590	Interface to RSS Interface to RSS for RSS request.	RSS	System	

Step	Description of Step	C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
600	Service Order required? If an initial read Service Order is required for non-smart meter, go to step 610. Otherwise, go to step 620.	S/4HANA	System	
610	Handle Field Order The process to handle Field Order.	S/4HANA	System	
620	Service fees required? If Service fees are required, go to step 630. Otherwise, go to step 640.	S/4HAHA	System	
630	Posting of Service fees Service fees are posted to BP account.	FPE1	System	
640	Auto transfer of deposit Security Deposit is transferred from old contract to new contract automatically.	S/4HANA	System	
650	Additional Security Deposit required? If Security Deposit is required, go to step 660. Otherwise go to step 670.	S/4HAHA	System	
660	Posting of Security Deposit Deposit is posted to BP account.	FPSEC1	System	
670	Budget Billing Plan required? If Budget Billing Plan is required, go to step 680. Otherwise, go to step 690.	S/4HAHA	System	
680	Budget Billing Plan is created Budget Billing Plan is created.	EK92	System	
690	CCA/DA? If Move Out/Move In is for CCA or DA, go to step 700. Otherwise, go to step 710.	S/4HAHA	System	
700	Process EDI Contract The process to handle EDI Contract enrolment/drop.	S/4HAHA	System	
710	End	N/A	N/A	

2.10 3rd Party and SCE Legacy System Integrations

3 rd Party or SCE Legacy System Integration	Description of Integration and Required Change to 3 rd Party or SCE Legacy System	Estimated Complexity of 3 rd Party or SCE Legacy system change
RSS	Integration to RSS for Move In Service Request. This will be done via DF-WM-03 - Handle Remote Orders - Manage Remote Orders	N/A

2.11 Data Elements

The information that will be captured for the Move Out, Move Out Date Change, Move Out Reversal and Transfer (either as part of migration or in the course of normal processing) will be defined as the intent of use for this BPD.

2.11.1 Move Out Process

Move Out process consists of four different views and they are in the followings sequence:

- Customer & Premise
- Services
- Contract Account and Billing
- Review

Premise

Move Out Address	Move Out Date
	01/09/2018
External Premise ID	Move Out Reason
-	

Customer

Customer ID	Customer Name
1000056	Annie DNU

The following data elements will be used by the Move Out – Customer & Premise.

Field	Type	Comments
Move Out Address	Required	Premise for the Move Out location, search and select from drop down option

Field	Type	Comments
Move Out Date	Required	Contract end date
Move Out Reason	Required	Move Out reason, select from drop down option
Customer Id	Required	BP number, search and select from drop down option

1 Customer & Premise
2 Services
3 Contract Account and Billing
4 Review

Customer ID

The following data elements will be used by the Move Out – Review.

Field	Type	Comments
Customer and Premise	Display	BP number & name Premise address Contract Account number Move Out date
Mailing Address	Display	Mailing address information
Services	Display	Installation number Rate Category Service Order information
Meter Reading	Display	Not applicable to SCE, will be made hidden
Notes	Display	Long text

2.11.2 Move Out Date Change

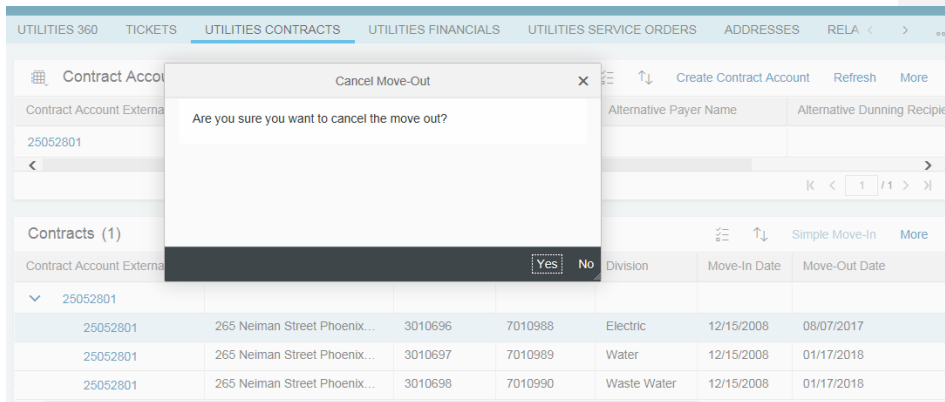

The screenshot shows a 'Change Move-Out' dialog box. The 'Move-Out Date' field is set to '01/17/2018'. The background table lists contracts with the following data:

Contract Account	Division	Move-In Date	Move-Out Date
25052801	Electric	12/15/2008	08/07/2017
25052801	Water	12/15/2008	01/17/2018
25052801	Waste Water	12/15/2008	01/17/2018

The following data elements will be used by the Move Out Date Change process.

Field	Type	Comments
Move-Out Date	Required	New Move Out Date

2.11.3 Move Out Reversal

Contract Account External	Contract Account Internal	Address	Contract Number	Division	Move-In Date	Move-Out Date

- Move Out Date Change

- Move Out Reversal
- Transfer

2.12.3 Activity Records

- Contract End created
- Contract End Change
- Contract End Reversal
- Transfer created

2.13 Exception Management Requirements

This section outlines a high level description of each BPEM Case or other user workflow items (such as "Tickets" used by Front Office) used to route work requests between business areas. The companion document for this section which outlines the detail of each case is documented in APSE on the [Exception Case Template General Document #8](#).

User Exception Scenario / Description	User Group	Initiated by	Work Distribution
See attachment below			

Exception Cases -
CIM-CS-03 - Handle C

2.14 Process Risks and Mitigation

- If the Move out happens on one day and the Move in is not allowed to be scheduled until the following work day, then there may be a risk of unbilled usage over the time period when no one is responsible for the usage. Mitigation: Use the closing read at Midnight to allow the move out / move in to use the same read eliminating the risk of unbilled usage.
- If a move out is "forced out" by a move in, the current BP may be forced out in error. Mitigation: Confirm the premise for the move in is correct.
- For a non-smart meter move out, if the field personnel is unable to provide a final read, the Move out will be completed with the notation that no final read was obtained. Mitigation: RSO should be alerted on no final read in order to prepare final bill (system does not received final read for move out within 3 days).

2.15 Key Performance Indicators

The following have been identified as KPI's at Southern California Edison, along with the means of measuring each KPI and the current measurement statistic for each KPI:

Measured KPI	Description	Measurement Method	Current Statistic
Move Out	Number of SCE customers lost resulting from a change in address.	Report	

2.15.1 Key Metric Definition

The following have been identified as key metrics at Southern California Edison that require business rule for calculation:

Key Metric	Description	Business Rule	Reference
N/A			

3 Controls, Regulatory Rules, and Security

Requirement ID (from RTM)	"As-Is" Control Requirement	"To Be" Risk Statement	"To-Be" Control Activity"	Control Automation (manual, IT dependent-manual, automated)	Relevant technical identifier or RICEFW reference
N/A	N/A	Inappropriate meter device install or calibration may lead to incorrect usage data being processed	At the time of move-in, move-out, or transfer, SAP ISU triggers (1) a Remote Service Switch (RSS) request if installation has a Smart Meter, (2) a Service Order if the installation does not have a Smart Meter or if it consists in a disconnecting or reconnecting of service.	Automated (IT Automated Control)	E-CIM-CS-02

N/A	N/A	Inaccurate or incomplete business master data may lead to bad debt increase or revenue loss	Customer Service Metrics Group provides the error report to Back Office (Revenue Service Organization –RSO and the Customer Billing Operations - CBO) and IT Support groups. Back Office & IT Support groups review the the Master Data Template errors related to create/update business partner, create/update contract account, and residential and non-residential customer move-in/move-out, using transaction ECRMREPL in SAP ISU to ensure no error is blocking the creation/update of the business partner, the contract account or the move-in and move-out document, on a weekly basis (final frequency to be determined). An action plan is detailed in the review for each error older than 2 business days. (Step 150: Contract end date update. (Currently, the As-Is Process is that the IT & RSO groups receive the individual reports today and the RSO Metric Group PSS&I combines the report into a single report for action by IT & RSO. The Customer Service Metrics Group may be a new group in the future but currently the Customer Service Operations Division - CSOD - Professional Services Support & Integration - PSS&I – group executes the function described in this control).	ITDM	N/A
-----	-----	---	--	------	-----

New	N/A	Inaccurate or incomplete validation process with regard to recognition of business partners and 3rd party information may lead to revenue loss or fraudulent activities.	The front-office user (CCC/BCD Organizations) validates customer information (full customer name, and full address or contract account number or contract number for move-out, and Social Security Number (required for residential), Driver License and Tax ID for Move-out or Update Activity) before processing any action and the request is processed only if requester is the seller or sold-to party business partner, a person who has been defined as authorized by the sold-to-party business partner (e.g. authorized contact relationship to the business partner) or documentation exists for authorizing the requester has been obtained (e.g. business partner becomes deceased and caller is the executor or has a power of attorney for the business partner).	Manual	N/A
-----	-----	--	---	--------	-----

New	N/A	Inaccurate or incomplete validation process with regard to recognition of business partners and 3rd party information may lead to revenue loss or fraudulent activities.	The Quality Assurance team (CCC Organization) listens and scores on a monthly basis 5 calls per agent to ensure that Move-In, Move-Out or Update Activity requestors are validated by front office operator. (Validation of full customer name, and full address or contract account number or contract number for move-out, and Social Security Number (required for residential), Driver License and Tax ID) are required for Move-out or Update Activity). The callers are authorized requestors who are seller or sold-to party business partner, a person who has been defined as authorized by the seller or sold-to-party business partner, or requestors with documentation that authorizes the requester. BCD Operations – Data Governance & Data Quality - conducts annual contact certification to ensure communication methods with assigned business contacts are complete and accurate.	ITDM (IT Dependent Manual Control)	N/A
New	N/A	Contract will not be created and appears in the error monitoring queue.	When Installation is marked deleted, the Deleted checkbox will be checked and user will not be able select that Installation for Move In/ Transfer. This will eliminate user mistakenly select the deleted Installation for Move In. (Step 190 in Transfer process flow)	IT Automated Control	E-CIM-CS-02 - Capture Opt Out, Inspection Required and service fees

3.1 Security Considerations

Role	Transaction Code (T-Code)	T-Code Description	Authorization Attributes	SOD Conflicts (Yes/No) If SOD Conflicts Yes. Identify the 2 conflicting t-codes
CCC, BCD, RSO, Offline support, SCE.COM, IVR	Hybris C4C - Move Out	Hybris C4C Move Out Creation functionality		No
CCC, BCD, RSO, Offline support, SCE.COM, IVR	Hybris C4C - Move Out Date Change	Hybris C4C Move Out Date Change functionality		No
CCC, BCD, RSO, Offline support, SCE.COM, IVR	Hybris C4C – Move Out Reversal	Hybris C4C Move Out Reversal functionality		No
CCC, BCD, RSO, Offline support, SCE.COM, IVR	Hybris C4C – Transfer	Hybris C4C Transfer functionality		No
All users	Hybris C4C – Display Contract	Hybris C4C Contract Display functionality		No
CCC, BCD, RSO, Offline support, SCE.COM, IVR	EC55E	S/4HANA Move Out Creation functionality		No
CCC, BCD, RSO, Offline support, SCE.COM, IVR	EC56E	S/4HANA Move Out Change functionality		No
CCC, BCD, RSO, Offline support, SCE.COM, IVR	ES58E	S/4HANA Move Out Reversal functionality		No

All	EC57E	S/4HANA Move Out Display functionality		No

3.2 Custom Program/Transaction Codes

Please identify any custom programs/transaction codes that need to be developed for RICEFW objects.

- Is the custom program executed in the batch mode or dialogue mode
- Is the custom program assigned to an authorization group
- What is the custom transaction code for the custom program
- Should there be an authorization check made against any field in the custom program/custom t-code and if so what is the custom/standard authorization object used(For example does it have to be restricted to residential vs commercial customer)
- Does the custom programs/custom t-codes have any critical or sensitive customer information that needs extra security

Custom Program	Authorization Grp	Custom T-code	Authorization Object used in the authorization check statement
N/A			

3.3 Custom Table/Transaction Codes

Please identify any custom tables/transaction codes that need to be developed for RICEFW objects.

- Are there any customer sensitive/critical Z tables created?
- What is the authorization group assigned to the table?
- Is it just a maintenance or display only table?
- What is the Z transaction code for the custom table?

Custom Table	Authorization Grp Assigned	Custom T-code for the Table	Table Access (display/update)
N/A			

4 Technical Considerations

4.1 RICEF-W Assessment

All of the Forms, Reports, Interfaces, Conversion items, Enhancements and Workflows (RICEF-W) that have been identified for this BPD are detailed in the tables below and will represent the totality of all RICEF-W items documented at the time of sign-off of this BPD. Any RICEF-W items that are identified after this BPD receives final sign-off will only be managed within Southern California Edison's APSE environment and not within this document.

4.1.1 Reports

Description (include the Business Purpose)	Complexity	Reference ID
Provide the number of turn-offs created by each organization (e.g. CCC, RSO, GC, BCD etc.) and by channel (e.g. Phone, sec.com, IVR, web chat, etc.)	Complex	REP-CIM-CS-02-1 Number of TUON TUOF by Organization & Channel

4.1.2 Interfaces

Description (include the Business Purpose)	Complexity	Reference ID
N/A		

4.1.3 Conversion

Description (include the Business Purpose)	Complexity	Reference ID
Refer to BPD CIM-CS-02 Handle Customer Move In/Out – Contract New for conversion RICEFW item		

4.1.4 Enhancements

Description (include the Business Purpose)	Complexity	Reference ID
- Auto reverse for backdated move out, back dated move out change and move out reversal. - Ability to handle the billing implications of a changed/reversed move out (e.g. if bill needs adjustment) or changed/reversed move out (e.g. rules determine when agent can do the work versus when a case flows thru to back office for handling) - Ability to automatically reverse out billed and/or paid charges if backdating the turn off - If user perform a date change on turn off request and final bill is pending, system shall automatically cancel the final bill request and not send it to the BP - If user perform a date change on turn off request and final bill is sent, system shall automatically reverse the final bill - If user enter a cancel Move-out request and final bill is pending, system shall automatically cancel the final bill request and not send it to the BP - If user enter a cancel turn off request and final bill is sent, system shall automatically reverse the final bill	Complex	E-CIM-CS-03 - Move Out /Change/Reversal - Invoice Reversal
- Ability to automatically generate a service order to install a smart meter when an "Opt-out" contract is closed (move out) to replace a register read meter - Ability to create the required type of turn off WO (eg. Turn off with meter removal, removal & service, flow restrictor) - If turn off is completed, the system shall enable user to update the turn off date to future date and system shall auto issue the turn on work order for the same day to re-energize the premise if power is already off - If user reverses move out, system shall auto issue a reconnect order to be completed same day if premise power is currently off and required user to enter the access info and read the safety msg before completing the Work Order - If a user cancels a move-out, the system shall automatically cancel the turn-off order as well if one exists for that move-out If TOFF (turn off) and SDP (Summer Discount Program) /SDPO, then the A/C cycling device should automatically be turned off /set idle If customer does not acknowledge the safety message, the system shall create a work order (send to Click for scheduling) regardless of AMI or non-AMI meter RSS in eligible flag, if flagged, Move In/Move Out request will not be sent to RSS and a Turn On/Off WO will be created by system	Complex	E-CIM-CS-02 - Create Work Order during Move-In/Move-Out/Transfer
Ability for the system or agent to transfer the deposit from one contract to another.	Simple	E-CIM-CS-02 Transaction Launcher

Description (include the Business Purpose)	Complexity	Reference ID
Align the Move Out date to the Service Order or RSS Request when there is a Move Out date change	Simple	E-CIM-CS-02 - Align new Move-In date to Service Order
BP has opted out of CCA from the moving out premise and transferring within the same CCA territory, the system will not default the move in with CCA Product (Rate). BP has opted out of CCA from the moving out premise and transferring to a different CCA territory, the system will default the move in with CCA Product.	Medium	E-CIM-CS-02 Default CCA rate during Move In & Transfer
A warning message if the move out date is 12 months in the past of the current date. User is able to proceed.	Simple	ENH-CIM-CS-02-4-2 Move Out Date validation
Ability for system not to default CCA to move in customer when customer transfer within the same CCA territory when the customer has opted out of CCA.	Medium	ENH-CIM-CS-02-1-027 - Not to default CCA product for CCA opt out customer
Ability for system to default CCA to move in customer when customer transfer to different CCA territory when the customer has opted out of CCA.	Medium	ENH-CIM-CS-02-1-028 - Default CCA product for transfer to different CCA territory
If an account has an active MBL or CARE enrollment and requests to transfer service to a new location, the system shall automatically transfer the program to the new contract	Medium	ENH-CIM-CS-02-7-1 Auto transfer CARE & MBL from old premise to new premise
Ability to make the number of days between active service for MBL and CARE auto transfers to the same and configurable.	Medium	ENH-CIM-CS-02-7-1 Time frame for MBL/CARE turn on

4.1.5 Forms

Description (include the Business Purpose)	Complexity	Reference ID
Move Out notification from Open Text to BP via preferred channel.	Medium	F-CIM-CS-03 Thank You Notification
Move Out Date change notification from Open Text to BP via preferred channel.	Medium	F-CIM-CS-03 Move Out Date Change Notification
Move Out Reversal notification from Open Text to BP via preferred channel.	Medium	F-CIM-CS-03 Move Out Reversal Notification

4.1.6 Workflows

Description (include the Business Purpose)	Complexity	Reference ID
N/A		

4.2 IDEX Considerations

- Upon completion of Move Out, IDEX will interface and provide the data to CCA/DA system for CCA/DA to drop the service from BP
- Upon completion of Move Out data change, IDEX will interface and provide the data to CCA/DA system for change of data
- Upon completion of Move Out reversal, IDEX will interface and provide the data to CCA/DA system to establishment of service to BP
- Upon completion of Transfer, IDEX will interface and provide the data to CCA/DA system to drop and/or establish service to BP

4.3 Production System Cut-over Considerations

- Contracts that are marked as deleted or having a move out date that is in the past or equal to system date will not be migrated over.
- Contracts having future dated move out date will be migrated over.

4.4 Other Considerations

N/A

5 Change Management

5.1 Change Impacts

Change Element Short Description	Change Impact Category	Audience Group(s)	Impact	Business Effort
The naming convention will change in SAP related to turn on/turn off services. Move in is an object vs turn on is a work order to connect the power (e.g. RSS, field turn on) as a result of the move in object. Move out is an object vs a turn off is a work order that disconnects the power as a result of the move out object. Move in/out adjustment is the change of date. Move in/out reversal is equal to move in/out cancellation. Process Start Stop is equivalent to Transfer in SAP	Process (177)	CS-CSOD-CCC All; CS-CSOD-RSO All; CS-BCD-All	Low	Low
Policy discussion regarding the level of access for different relationships and authentication requirements in regards to account activity. As part of the process, the frontline users may require to review relationships with the customer at the time of move in and move out. The relationships may need to be updated based on the conversation. Currently authorized callers can access all information and issue transactions without any differentiation.	Decision Making; Process; Culture Shift (465)	CS-CSOD-CCC All; CS-BCD-All	High	Medium

Change Element Short Description	Change Impact Category	Audience Group(s)	Impact	Business Effort
The user will need to manually reinstate the program if a move out reversal has occurred. An automation requirement is pending which will automatically reinstate the program. Currently enrollment of programs and rates needs to be completed by RSO users.	Process; Decision Making; Job Roles (183)	CS-CSOD-CCC All; CS-CSOD-RSO-BOM; CS-BCD-All	Medium	Medium
If the end date of the move out is changed or cancelled, the user will need to validate the mailing address. Since the mailing address is stored at the business partner level, it is recommended to validate the mailing address at the business partner screen (outside of the move out object) to verify if there are any impacts to the standard business partner address. If the address is set as "fixed", then the address is specific to that contract account. Currently the mailing address is visible within the turn off window and can be verified without having to access a separate screen because the mailing address is stored at the customer account level and does not impact any other business partner addresses.	Process (748)	CS-BCD-All; CS-CSOD-CCC All; CS-CSOD-RSO All; CS-CSOD-Consumer Affairs	Low	High

Change Element Short Description	Change Impact Category	Audience Group(s)	Impact	Business Effort
Front office users will create BPEM cases for transactions that need to be worked by back office users. BPEM cases will create visibility and traceability to the order that we do not have access today. Currently users will add a note and send an email to the appropriate parties. Users are not able to view if the email was sent properly or the status of the request or when the request was completed. It provides more visibility to front office of the request and can advise customers the status of their requests. Examples: streetlight requests, water flow restrictor, self certify sensitive	Benefit/Improvement Culture Shift Decision Making Process (782)	CS-BCD-All; CS-CSOD-CCC All; CS-CSOD-RSO All; CS-CSOD-Consumer Affairs	Medium	Low
Users can not cancel a move out request if a New party has a move in pending. They would only be able to change the date up to the new party in's move in request. To cancel the move out request, users will need to cancel the move in for the new party. Currently we are able to cancel the turn off request without having the cancel the new party in. Typically a new party in move in is not cancelled unless we hear from the business partner.	Process; Decision Making (783)	CS-BCD-All; CS-CSOD-CCC All; CS-CSOD-Consumer Affairs; CS-CSOD-RSO All	Low	Low

Below is a description of each:

Change Element Short Description: Describes the 'As-Is' scenario and what is changing.

Change Impact Category: Determined by asking the questions below.

1. **Staffing Levels** - Is the work effort increasing or decreasing (staffing levels), and how (e.g., task automation, new process/tasks)?

2. **Job Roles** - Will the responsibilities, authority, or required skills for a job or job roles change? Will people be reporting to new leaders? Will managers' responsibilities change?
3. **Compensation / Performance** - Will the changes have such an impact on roles of an individual that merits a change in how they are compensated or how their performance will be evaluated? What behaviors are rewarded and recognized?
4. **Organization Structure** - Is the ownership of the Process or Data changing (think departments, jobs, or roles, not individuals)?
5. **Decision Making** - Will any of the changes impact how decisions are made, by or between, business units / departments? Who makes them, how they determine the criteria for making a change?
6. **Culture Shift** - Will organizational value systems impact the way change happens or be impacted by the change? What are the underlying values of the organization that will directly influence the way change will be accepted and how much work will ultimately be required to ensure successful outcomes for the business?
7. **Location / Facilities** - Will the change impact the physical location where they process is being implemented or require changes to the facilities to enable the process to be effective?
8. **Process** - Any change to the current process (e.g. manual process becomes automatic, or vice versa)? Are there new processes being introduced or an old process being decommissioned? Is there a requirement to change an existing business rule or business policy? Will new business rule or policy needs to be introduced and enforced or complied to?
9. **Regulatory/ Legal** - Are there any legal / regulatory requirements that might be impacted
10. **Technology** - Are other applications impacted (e.g., going away, becoming read-only), or are there new requirements (e.g., new SW / HW, new version)
11. **Benefit/Improvement** - Will there be an improvement or benefit to any of the stakeholders because of this change. (Be sure to include any pain points that are being alleviated)
12. **Other** - Are there emotional implications stemming from any of these changes (think of buy-in issues or fears)

Audience Group(s): These are the affected departments, divisions etc...

Impact: The following were used to determine the impact:

Level	
HIGH	- BUSINESS OUTCOMES: Drives change to cost, efficiency, customers. - JOB: More than 40% of individual's job will change and / or additional skills are required with significant changes to Job Documents. Examples include: - Shift from manually intensive role to using new tools and systems - Employee is going to be redeployed - High level of "technical or functional" changes needed for a particular group - Significant changes to culture & attitudes to get job done - Big shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: High level of "relational" changes for a particular group (e.g. reporting relationships, effective working relationships with customers, teams, and stakeholders etc.) - POLICIES/PROCEDURES: Processes, procedures, and/ or policies are not in place today and need to be defined. - REGULATORY REQUIREMENT: drive changes to the way we comply

Level	
MEDIUM 	- BUSINESS OUTCOMES: Limited change to cost, efficiency, customers. - JOB: 20-40% of individual's job will change and / or additional skills are required with significant changes to Job Documents, Examples include: - Employee job title or function is modified, resulting in minor to moderate changes to roles and responsibilities. - There will be some changes to the culture & attitudes - Shift from moderate technology use to using new tools and systems - Moderate level of "technical or functional" changes needed for a particular group - Moderate shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: Moderate level of "relational" changes for a particular group (e.g. reporting relationships) - POLICIES/PROCEDURES: Processes, procedures, and/or policies are inconsistent today and not defined or documented in many cases - REGULATORY REQUIREMENT: No impact.
Level	
LOW 	- BUSINESS OUTCOMES: No impact. - JOB: Less than 20% of individual's job will change and / or additional skills are required with significant changes to Job Documents. Examples include: - Employee job title or function is slightly modified with few, if any, changes to roles and responsibilities - There will be little change to the culture & attitudes - Shift from using some technology to new systems & tools - Light level of "technical or functional" changes needed for a particular group - Small shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: No impact or light level of "relational" changes for a particular group (e.g. reporting relationships) - POLICIES/PROCEDURES: Processes, procedures, and/or policies are consistent, but not well documented, and will need to be documented/ Other minor changes to be made. - REGULATORY REQUIREMENT: No impact.

Business Effort: Initial assessment of the impact to the business High, Medium, Low
