1 Business Process Overview

SCE has a comprehensive process in handling various types of Complaints from customers.

If the complaint is resolved by the user during the call with the BP, an Activity will be created by the user manually in Hybris C4C documenting the call and no further action is required from the user. However, if the complaint is not resolved by the user, a Ticket will be created by the user manually in Hybris C4C and the Ticket will be routed to a lead or the appropriate person for action. If the person is unable to resolve the issue, they will route the Ticket to a supervisor or manager. If escalation is needed to Consumer Affairs, a BPEM will be created from the Ticket and routed to Consumer Affairs. In other cases, the user may submit a form from fetch which is routed to CS Information Governance team via a Ticket. Each person who worked on the issue will be responsible for manually creating a Activity to document the action they have taken..

All utility specific functions of the S/4HANA landscape, in concert with the Hybris C4C components are collectively referred to in this document as the SAP Customer Relationship and Billing solution, or simply CRB.

1.1 Current Pain Points for Southern California Edison

- Multiple systems are being used to conduct customer survey
- Many systems are being used to capture complaints, compliments and survey response
- Consumer Affairs Department does not have insight into complaints through all channels, limiting the ability to receive the escalation through the CPUC or to obtain the survey response from a customer resulting in duplicate complaints and unnecessary legwork. Additionally, this requires a lot of time manually researching issues in the system to pull together the history of the escalation.
- No 360 degree view of the issue reported by the customer
- No visibility of the escalation of a customer's issue across all business units as they occur, resulting in complaints to the regulators
- Outdated complaint code types / sub-types that don't align with our core business today and are complicating to update requiring IT involvement
- Trend analysis is currently a highly manual process to get to the root cause of a customer's experience

1.2 Responsible Parties

1.4 Terminology

Term/Acronym	Definition and SAP Equivalent (if applicable)
APSE	Accelerated (or Axon) Project Support Environment
BBP	Budget Billing Plan, equivalent to Level Pay Plans in SCE CSS
BDEX	SAP add-on functionality to support the processing of BPEM Cases
Billing Cycle	Is a group of contracts to be billed together via date-driven or regional criteria, it controls the billing cycle and is linked to the Meter Reading Unit. SAP equivalent term is the Portion.
Billing Document	A document that outlines the charges incurred for energy consumption for a specific contract. During the process of Billing, a billing document is generated for each contract on a contract account.
BMD	Business Master Data. The customer information which includes personal details, payment terms, dunning levels, billing rates and rate categories. The business master data objects are Business Partner, Business Agreement/Contract Account and Contract.
BP	Business Partner
BPD	Business Process Design (or Document)
BPEM	Business Process Exception Management
BWR	Basic Work Request. SAP equivalent is BPEM.
CA	Contract Account
CCRP	Customer Champion Recognition Program
Channel	Data object in SAP that holds the interval data. Intervals can be kwh, price, factor, etc. SAP equivalent is Profile.

Term/Acronym	Definition and SAP Equivalent (if applicable)
CIMS	Customer Information Management System in SharePoint
Clarification	A list of payments that could not be processed and require additional work in order to be posted.
Connection Object	Link between installation and postal regional structure. Usually a building, but can also be a piece of property or other facility, such as a fountain or construction site. The connection object corresponds to the functional location in plant maintenance (PM).
Customer	Any entity with a relationship with SCE. This term is usually used in reference to customers (both individuals and organizations) This can include employees and third party suppliers (banks and payment partners). SAP Equivalent is Business Partner (BP)
CRB	SAP Customer Relationship & Billing system. This is what is being implemented with the CSRP program.
CSR	Customer Service Representative
EAM	SAP Enterprise Asset Management
S/4HANA	SAP ERP Central Component (SAP) - The core SAP modules (FICO, WM, SD, EAM, HR). This term is commonly used to refer to the existing SAP modules implemented at SCE.
ERP	SAP Enterprise Resource Planning
IMG	SAP Implementation Guide - where configuration is performed
Level Pay Plans	SAP equivalent term is Budget Billing. Budget Billing allows customers to pay regular equal amounts over a yearly period.
PoD	Point of Delivery, an object in Installation
SCE	Southern California Edison
Summary Billing	Standard SAP functionality that enables the invoicing of multiple Contract Accounts under one Parent Contract Account (Consolidated Summary Billing). SAP equivalent is Collective Billing.
TMD	SAP Technical Master Data E.g. Connection Object, Premise and Device Location

Additional terms may be found in APSE [General Document # 32 CSRP Glossary](#)

2 Business Process Design

This section of the document contains the business process for handling Complaints.

There are 3 methods to log and track complaints in Hybris C4C and they are:

- Ticket: Is used by Front Office users such as CCC/BCD to assign an escalated call/complaint to another individual or group i.e. supervisor. Refer to BPD [to BPD CIM-CS-06 - Handle Customer Inquiries](#) for more information on Ticket.
- BPEM Case: Is used when the Front Office supervisor/manager is not able to resolve the complaint and requires the user to refer the complaint to Consumer Affairs. The BPEM Case is created from a Ticket. Refer to BPD [EM-01 - Exception Work Assignments](#) for more information on BPEM Case.
- Service Orders will be created when field personnel are required to go to the site to resolve the issue such as debris left by field personnel.

An Activity will be created manually by each individual who attempted to resolve the escalated call/complaint.

Ticket

When CCC/BCD/other front office user is not able to resolve a complaint, the complaint can be logged using a Ticket in Hybris C4C. User will locate the BP or Contract Account to create a Ticket (Figure 1: Ticket). User will select the Service Category, Priority, Employee or Group the ticket should be assigned to and enter the Subject of the complaint and documenting the complaint detail in the Description field.

The screenshot shows the 'New Ticket' form in the Hybris C4C system. The form is titled 'New Ticket' and has a breadcrumb trail 'Home > Walter Tester > New Ticket'. The form contains the following fields:

- ID: 371
- Type: Service Request (dropdown)
- Source: Manual data entry (dropdown)
- Employee: (empty field with a selection icon)
- Service Category: Resolve Bill Question (dropdown)
- Priority: Normal (dropdown)
- Agent: Tuan Howe Yap (dropdown)
- Subject: Billing issue (text field)
- Description: Customer complaint (text area)

At the bottom of the form, there are buttons for 'Save and Open' and 'Cancel'.

Figure 1: Create Ticket

The user will monitor the Tickets assigned to them via Ticket Monitoring Report in Hybris C4C (Figure 2: Ticket Monitoring Report). User is able to filter the search list based on various attributes such as Ticket Number, Status, Priority, etc. Refer [to BPD CIM-CS-06 - Handle Customer Inquiries](#) for more information.

Figure 2: Ticket monitoring report

If the user is able to resolve the issue logged in a Ticket, the user will update the Ticket status to completed and provide the resolution (Figure 3: Update Ticket). If the user is not able to resolve the issue, the user will document the action taken and escalate the Ticket to the next level person (lead or supervisor). If the Ticket needs further escalation, the use will create a BPEM within the Ticket to Consumer Affairs or other organization (e.g., RSO Billing).

Figure 3: Update Ticket

BPEM Case

When creating a complaint BPem case in Hybris C4C via Ticket, the user will select a specific complaint type (BPem Case Category), enter the complaint information and save the record. BPem cases will have a due date auto defaulted and this will be done via configuration. A user can document additional information related to the complaint in the BPem case in the field Long Text such as Ticket number, caller name, caller phone number and description of the complaint.

Priority for each of the BPem case (complaint category) is defaulted by the system and priority is not shown in Hybris C4C view. User is able to overwrite/update the priority in the S/4HANA through the change BPem case transaction (EMMAC2) in the right-click action menu within the BDEx exception management tool. BPem case tcode EMMAC2 or BDEx report after BPem is created.

If SCE decides to retire a complaint type in the future, this complaint type will not be available for users to select in the BPem case creation functionality in Hybris C4C. This can be done by deactivating the BPem Case Category in S/4HANA using Tcode EMMACAT3 and will be done by SCE IT. Historical BPem cases that used the retired type will still be visible to the user in Hybris C4C and S/4HANA and for reporting purposes. Governance will be established by SCE to review and approve removals and addition requests

Complaint related documents can be uploaded to any SAP object such as BP, Contract Account, Contract or Premise. Refer to BPD document [CIM-CS-09 - Manage Inbound Request](#) for more information.

Figure 4: Create BPem

Service Order

A Service Order can be created via Hybris C4C (Figure 5: Create Service Order).

Figure 5: Create Service Order

User is also able to search for a specific or a list of Service Orders via S/4HANA Tcode IW38 (Figure 6: Service Order Listing). Refer to [BPD DF-WM-02 - Handle Field Orders - Manage Field Orders](#) for more information about IW38.

Figure 6: Service Order listing

2.1 Types of Complaints

Complaints can originate from the sources below.

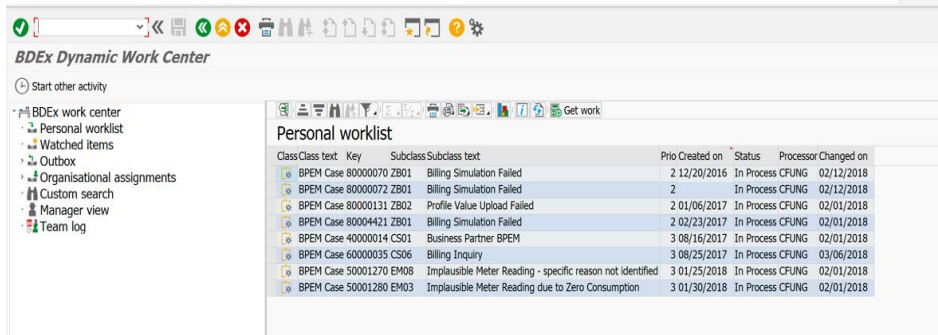

- Ticket/BPEM created from Front Office users
- Email
- US Mail
- Social Media
- CPUC Consumer Affairs branch (Customer Information Management System – CIMS)
- Local Public Affairs (LPA)/BCD Account Manager (AM)/BCD Account Coordinators
- Ethics and Compliance
- Phone calls
- IVR
- In Person visit
- Other correspondence
- Fax

2.1.1 Consumer Affairs Complaint

BPEM cases assigned to Consumer Affairs can only be viewable by Consumer Affairs or user with authorization.

Central view of BPEM cases

A central view for all BPEM cases created for complaints is available in S/4HANA via BDEx Dynamic Work Center (Tcode /BTI/BWC) by authorized users. Authorized user will be able to retrieve the Complaint BPEM case by clicking on the Get Work button within the DWC and see the list of BPEM cases that are assigned to him/her (Figure 7: BDEx Dynamic Work Center. Refer to *EM-01 – Exception Work Assignments for work assignment detail*). Authorized user is able to double click on the line item to see detail of BPEM case. User can call the BDEx Customer Centric Hub from the right-click menu of the BPEM case and proceed with the exception resolution process (Refer to BPD EM-02 – Exception Work Views ~~EM-01 – Exception Work Assignments~~ for more information). Complaint BPEM case ~~This~~ will be controlled using BPEM case authorization object 'CRT/UPD/DIS, B-EMMA-CAS' Activity and Authorization group configuration.

Figure 7: BDEx Dynamic Work Center

A standard BDEx daily report (BDEx BPEM Summary Report) is available by SAP Standard functionality in S/4HANA BDEx BPEM Summary Report (Figure 8: BPEM Summary Report). The code for this report can be executed by transaction `/BTR/PP_ASTROLABE` to execute report and `/BTR/PP_SUM` to display the report for users to get a count of the number of complaint BPEM cases that are created for a specific date, still outstanding and closed. Refer to BPD [EM-03 - Exception Management Analytics](#) for more information.

Figure 8: BDEx BPEM Summary Report

Users can also utilize S/4HANA BDEx BPEM Summary Report to extract the following information:

- Provide the number of BPEM cases for complaints that are being created. When a user double clicks on result list, the report will have information such as BPEM case number, created by, complaint type, person the BPEM case is assigned to, creation date & time, due date & time and Status.

The creation date and time in a BPEM case will be the date of when customer has reported the complaint to SCE (Figure 9: BPEM case). The System date and time will be populated by the system automatically and these fields are not visible to the user in Hybris C4C. These fields are available in S/4HANA via BDEx Dynamic Work Center or BPEM Summary Report.

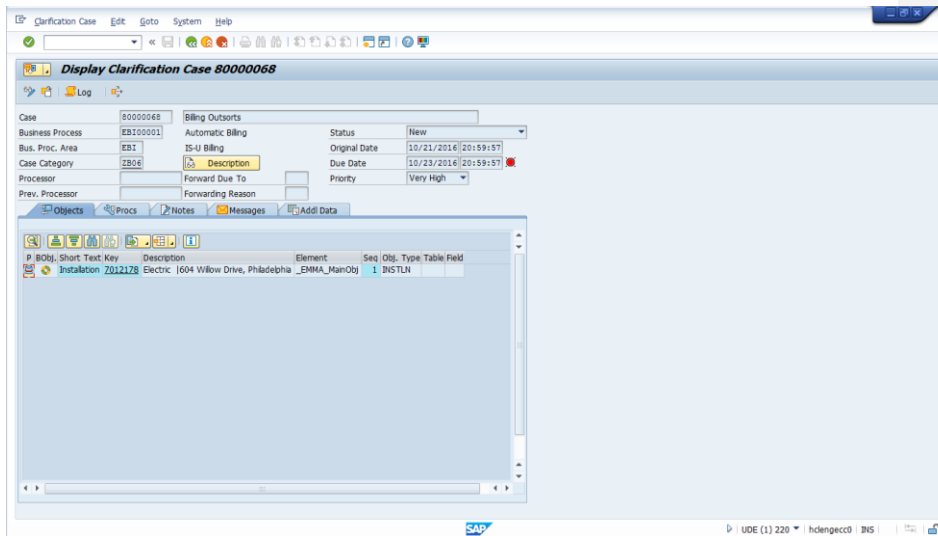

Figure 9: BPEM Case

Authorized users will be able to subscribe to a BPEM case using BDEx Watch List functionality, when BPEM case is completed, the subscriber will get an email notification. Refer BPD [EM-02 - Exception Work Views](#) for more information.

A user can subscribe to a complaint BPEM case. This user will be alerted when the complaint BPEM case is completed.

2.1.1.1 CPUC Complaint

A complaint filed by the CPUC can be formal or informal. Formal complaints are received directly from the CPUC to SCE's Regulatory Operations team and are handled by an attorney in SCE's Case Administration. Informal complaints are downloaded daily from a secure CPUC website by Consumer Affairs or received by phone call or email from the CPUC.

A BPEM case will be created in SAP Hybris C4C therefore entering CPUC Complaints into the Regulatory Information Management System is no longer required. By creating a BPEM case for a CPUC Complaint in SAP, there is a clear visibility in SAP for all types of complaints created. SCE will continue to submit the outcome/response to the CPUC via their system of record (currently CIMS).

It is necessary to identify a CPUC Complaint as formal or informal as they have different handling procedures as outlined in the SCE Business Process Article 4. To handle the differentiation, there will be three BPEM Case complaint categories configured. First is 'Complaint - CPUC Dispute - Informal' and second 'Complaint - CPUC Dispute - Formal' and third is 'Complaint - CPUC Dispute - Phone Call'. User will

create the BPEM cases with careful selection of category. (NOTE: CPUC reference number will be documented in the BPEM case long text for reference)

When the complaint is closed in the CPUC Customer Information Management System (CIMS) the BPEM CPUC Dispute will have to be closed by the user manually.

The CPUC Complaint BPEM case data can be exported to a file format via S/4HANA BDEx BPEM Summary Report. The user can edit the information in the exported file before sending to CPUC.

An Activity Type 'Complaint' will be created by a user manually via Hybris C4C's Activity functionality and the BPEM case number will be documented manually by user in the Activity.

2.1.1.2 Local Public Affairs

Complaints can be filed by Local Public Affairs via Local Public Affairs (LPA) or BCD Account Executive Managers (AEM). A BPEM Case category 'Complaint - Local Public Affairs' will be created by a LPA user manually to be worked on by Consumer Affairs user who attends to the complaint. . An Activity type 'Complaint' will be created by user manually via Hybris C4C on the account documenting the complaint detail. When complaints raised to BCD Account Managers are resolved no other transaction is required. If the complaint needs to be escalated, the Account Manager will create a Ticket in Hybris C4C to be routed to their manager for resolution.

Commented [HR1]: While the BPEM Case can be viewed by authorized users, I assume the activity will be viewable to all C4C users. Is that ok from a confidentiality perspective?

2.1.1.3 Executive Complaint

An Executive Complaint is related to a complaint from BP about an experience they have had with SCE and the customer has communicated to an SCE executive or Board of Directors through email, phone call, LinkedIn, written correspondence, etc. The user will either create a BPEM case category of the issue type, (i.e. 'Complaint - Executive') and BPEM case will be routed to Consumer Affairs team to resolve the issue or the business analyst in Consumer Affairs will receive the direct correspondence through the Executive process and create the BPEM directly. Once the issue is resolved, Consumer Affairs team will update, close the BPEM case. User will create an Activity type 'Complaint' by user manually via Hybris C4C documenting the issue reported by the BP. Some executive complaints will be directed to CS Information Governance team due to potential non-compliance with TCPA or CANSPAM regulations. There are many reasons customers complain to SCE / EIX executives / Board of Directors. BPEM routing depends on the complaint type.

2.1.1.4 Social Media Inquiries

Inquiries/Complaints from BP via social media such as Twitter, Facebook and Yelp (or other future channels via social networks) are being handled by the Consumer Affairs team. The Consumer Affairs team will conduct the investigation by looking at the BP's account. Activity type 'Complaint' will be created by the user manually via Hybris C4C, or through the BDEX process (depending upon what system of record the Consumer Affairs team works out of) at the BP account when the inquiry/complaint is attended by Consumer Affairs team.

Media Relation hotline handles Media Inquiry from customer. A BPEM will be created in Hybris C4C via Ticket by them if the issue needs to be referred to Consumer Affairs team.

2.1.1.5 CCA/DA

When there is complaint related to CCA/DA, Front Office user will create a Ticket 'Complaint – CCA/DA'. If issue is unable to be resolved, Front Office user will create a BPEM case category 'Complaint – CCA/DA' via Ticket to Customer Choice Services.

2.1.2 General Front Office Complaint

2.1.2.1 SCE.COM or Mobile App is down

Front Office user will transfer the call to CCC Tier 2 when customer is experiencing issue with SCE.COM or Mobile App. If CCC Tier 2 is unable to resolve the issue, the CCC Tier2 will create a Remedy ticket outside of SAP and assign to SCE IT. An Activity will be created by the user.

2.1.2.2 Force onto eBill

If BP requests to opt out of eBill, the CSR is able to turn off this feature by removing the indicator via Hybris C4C FOP (tcode CAA2) and the BP will get a paper bill on next billing cycle. Refer to BPD [CIM-CS-07 Handle Bill Inquiries](#) for more information.

An Activity type 'Complaint' will be created by user manually via Hybris C4C documenting the request/complaint detail and resolution.

2.1.2.3 Program Related Complaint

The BP will file a Program Related Complaint. The user attends to this complaint and updates the BP's program accordingly via Hybris C4C. Refer to BPD [PP-CS-02-Program Enrollment and Delivery, De-Enrollment & Decommission Programs](#) for more information. An Activity type 'Complaint' will be created by user manually via Hybris C4C documenting the complaint filed by the BP.

2.1.2.4 Correspondence Inquiries / Complaints

A Complaint from BP could come from a Marketing Campaign Reply card, monthly bill, etc. Depending on the type of the complaint, a Ticket will be created by user. Depending on the issue topic, the user may create a BPEM case category 'Complaint – Other Correspondences' and Consumer Affair will attend to the BPEM. A Ticket or a BPEM Case is not required if the user is able to resolve the issue.

Activity type 'Complaint' will be created on Account documenting the complaint filed from BP.

2.1.2.5 Field Personnel and Employee

Complaint from BP can be on field personnel, SCE employee or SCE Contractor/vendor or anyone representing SCE. A ticket will be created and assign to employee's supervisor or user that handles SCE complaints for these specific areas.

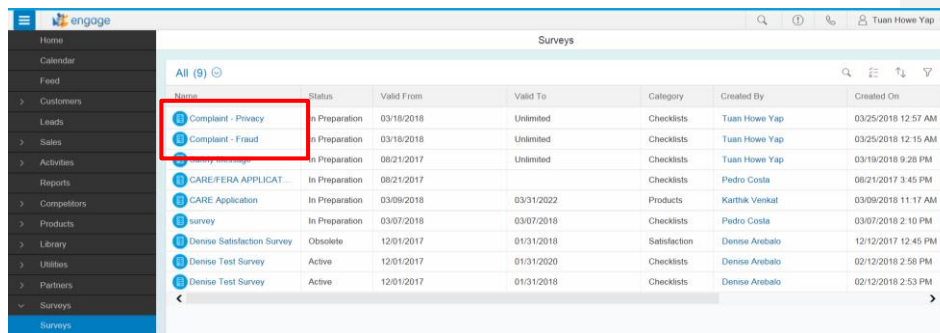

2.1.2.6 Trade Professional

Complaints from a BP can be related to the Trade Professional, or from a Trade Professional about SCE. Front office user will create a Ticket 'Trade Professional' to BCD and an Activity in C4C documenting the complaints for the BP or Trade Professional.

2.1.3 CS Information Governance (CSIG)

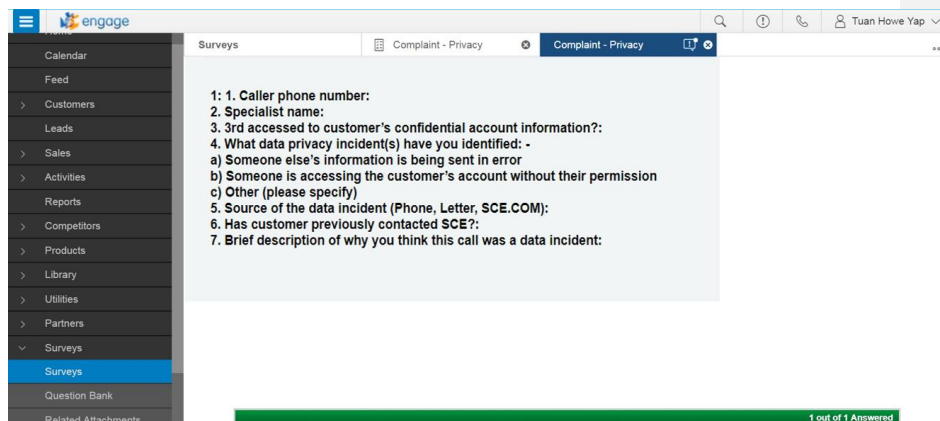

Complaints from a BP can be related to the Solar/3rd Party, Bill Scams/Fraud, Privacy and Misc. The user will create a BPEM case via Ticket to track the complaint.

Each type of CSIG complaint will have additional information that needs to be captured by the user. The user will navigate to Hybris C4C Survey to obtain the additional information to be captured in the Ticket (Figure 10). The user will copy the entire block of information (Figure 11) and paste the information into Ticket long text. The user will read out each question to the customer and capture the answers in the Ticket long text. The long text captured in the Ticket will be copied to BPEM long text automatically.

Figure 10: CSIG complaint

1. 1. Caller phone number:
 2. Specialist name:
 3. 3rd accessed to customer's confidential account information?:
 4. What data privacy incident(s) have you identified: -
 a) Someone else's information is being sent in error
 b) Someone is accessing the customer's account without their permission
 c) Other (please specify)
 5. Source of the data incident (Phone, Letter, SCE.COM):
 6. Has customer previously contacted SCE?:
 7. Brief description of why you think this call was a data incident:

Figure 11: CSIG complaint additional information

The user will also create an Activity in C4C documenting the complaints from the BP.

If CSIG needs to refer an issue to Consumer Affairs team, CSIG will reassign the BPEM case to Consumer Affairs team to work on.

2.1.3.1 Solar/ 3rd Party

Complaints from a BP can be related to solar companies or other 3rd parties acting on behalf of the BP without the BP consent. The user will create a BPEM case 'Complaint – CS Governance' and be routed and worked by the CS Information Governance team. Additional information will need to be captured for Solar/3rd Party. The user will navigate to Hybris C4C Survey functionality and initiate the Survey titled 'Complaint - Solar/3rd Party'. The list of additional information that is required to be captured in Solar/3rd Party will be shown in the survey. User will ask the BP the list of questions in the Survey and document the answer from the BP in the long text. The information in the survey is as below:

- Caller name:
- Caller phone number:
- 3rd party company name:
- 3rd party specialist name:
- 3rd party phone number:
- 3rd party accessed customer's confidential account info?:
- Did 3rd party create a 'My Account'?:
- Unauthorized my account email address:
- Unauthorized my account email address is deactivated?:
- Customer provided solar company SCE A/C # or copy of bill?:
- Did you note the account at the customer level?:
- Provide any other details about the call:
- What action took place: -
 - o My Account created:
 - o Impersonated a customer:
 - o Use of emergency help line:
 - o Use of SCE logo/ name/ impersonate SCE rep:
 - o Inappropriate sales practices:

User can copy the entire information in the survey and paste into the BPEM case long text to ensure no information will be missed.

Other information that is required when a BP reports Solar/3rd party issue such as Account number can be identified in the SAP object – Contract Account. Date BP reported incident to SCE, approximate time to call is the creation date and time of the Ticket.

An Activity type 'Complaint' will always be created by user manually via Hybris C4C on the BP account documenting the complaint details.

2.1.3.2 Bill Scam/Fraud

When a fraud case is reported by a BP, the user will create a BPEM case 'Complaint – CS Information Governance' and be routed and worked by the CS Information Governance team. Additional information will need to be captured for Fraud BPEM cases. The user will navigate to Hybris C4C Survey functionality and initiate the Survey titled 'Complaint – Bill Scam/Fraud'. The list of additional information that is required to be captured in Fraud will be shown in the survey. The user will ask the BP the list of questions documented in the Survey and document the answer from the BP in the long text. The information in the survey is as below:

- Caller name:
- Caller phone number:
- Customer contact by someone impersonating and SCE employee or SCE as a company:
- Impersonator name:
- Impersonator phone number:
- Caller ID phone number
- How much was customer asked to pay:
- Customer made payment (Yes/No):
- Where was the customer directed to go make payment:
- Method of payment:
- Credit card number:
- Law enforcement if contacted by customer:

Other information that is required when the BP reports fraud such as Account Holder Name, Residential or Commercial Account can be identified in the SAP object – BP master and Contract Account.

An Activity type 'Complaint' will always be created by user manually via Hybris C4C on the BP account documenting the complaint details.

2.1.3.3 Privacy

When a concern of privacy is reported by the BP, the user will create a BPEM case 'Complaint – CS Information Governance' and will be routed and worked by the CS Information Governance Team. Additional information will be captured when the Privacy is initiated. User will navigate to Hybris C4C Survey functionality and initiate the Survey titled 'Complaint - Privacy'. The list of additional information that needs to be captured in Privacy will be shown in the survey. The user will ask the BP the list of questions that is documented in the Survey and document the answer from the BP in the long text. The information in the survey is as below:

- Caller phone number:
- Specialist name:
- 3rd accessed to customer's confidential account information?:
- What data privacy incident(s) have you identified: -
 - o Someone else's information is being sent in error
 - o Someone is accessing the customer's account without their permission

- Other (please specify)
- Source of the data incident (Phone, Letter, SCE.COM):
- Has customer previously contacted SCE?:
- Brief description of why you think this call was a data incident:

Other information that is required for privacy such as Account number can be identified in the SAP object – Contract Account. Date BP reported incident to SCE, approximate time to call is the creation date and time of the Ticket.

An Activity type 'Complaint' will always be created by user manually via Hybris C4C documenting the complaint details.

2.1.3.4 Escalated Call Handling

Tickets will also be used to document the call escalation process within the CCC or BCD. If the CCC employee is unable to resolve the customer request or needs assistance to resolve the call, they will create a Ticket to their Lead. The Lead will provide the necessary guidance to the employee to resolve the call, resolve the call themselves with the caller or escalate the call to their Supervisor. If the Supervisor is unable to resolve the call, then at that point it may be escalated to another department or manager to resolve the call. Each employee who works on the escalated call will document their actions manually within an Activity record via Hybris C4C. BCD will leverage a similar process to escalate business customer issues within their organization.

All Tickets and BPEM cases created related to the call escalations will be reportable by leveraging self-service reports.

Escalated calls can include high bill disputes, Move In/Out disputes, Do Not Call, program related concerns, etc.

2.2 Process / Performance Improvement

- Single System or interfaces to provide a 360 degree view of the complaint via SharePoint and complaint via Ticket or BPEM case
- BPEM case is able to track the complaint from the moment it is logged till it is completed.

2.3 Prerequisites and Inputs

To create a BPEM case in Hybris C4C, a ticket must be created first.

A request to create a Complaint should require the following information:

- BP number is required when creating a complaint BPEM case. Other SAP objects are considered secondary.
- BP number is required when creating an Activity.
- Premise information is required when creating a Service Order.

2.4 General Assumptions

- Medallia will continue to be used to send surveys
- Medallia will continue to consolidate and host survey response such as After Call Survey and Voice or Customer. Medallia will also continue to be used to generate statistical report on survey response.
- Data that is currently extracted from DB2 (IVR) and SCE.COM will continue to be sent to Medallia to send survey to customers
- SCE will continue to use SharePoint to capture request for employee recognition program such as Customer Hero, Exception Neighbor and Star Behavior. The program in recognizing an employee remains unchanged.
- Claims will be handled outside of SAP
- Consumer Affairs team and Customer Choice Services will have access to BDEX to work on BPEM cases that assigned to them
- BCD Voice of Customer survey data will remain a manual report from BW and sent to CP&S for survey reasons

2.5 Business Process Hierarchy

This Business Process Hierarchy provides a listing of all scenarios/business processes, sub-processes, and SAP Transaction codes identified to support this process.

Level 1	Level 2	Level 3	Level 4
FO	Complaint	Create Ticket/BPEM case	Hybris C4C
FO	Complaint	Change Ticket	Hybris C4C
FO	Complaint	Display Ticket	Hybris C4C
FO	Complaint	Change BPEM case	EMMAC2
FO	Complaint	Display BPEM case	EMMAC2
FO	Complaint	Create Activity	Hybris C4C
FO	Complaint	Change Activity	Hybris C4C
FO	Complaint	Display Activity	Hybris C4C
BO	Complaint	Manage work queue in BDEX Dynamic Work Center	/BTI/BWC
BO	Complaint	360 view of BP activities and cases in Customer Centric Hub	/BTI/BDEX

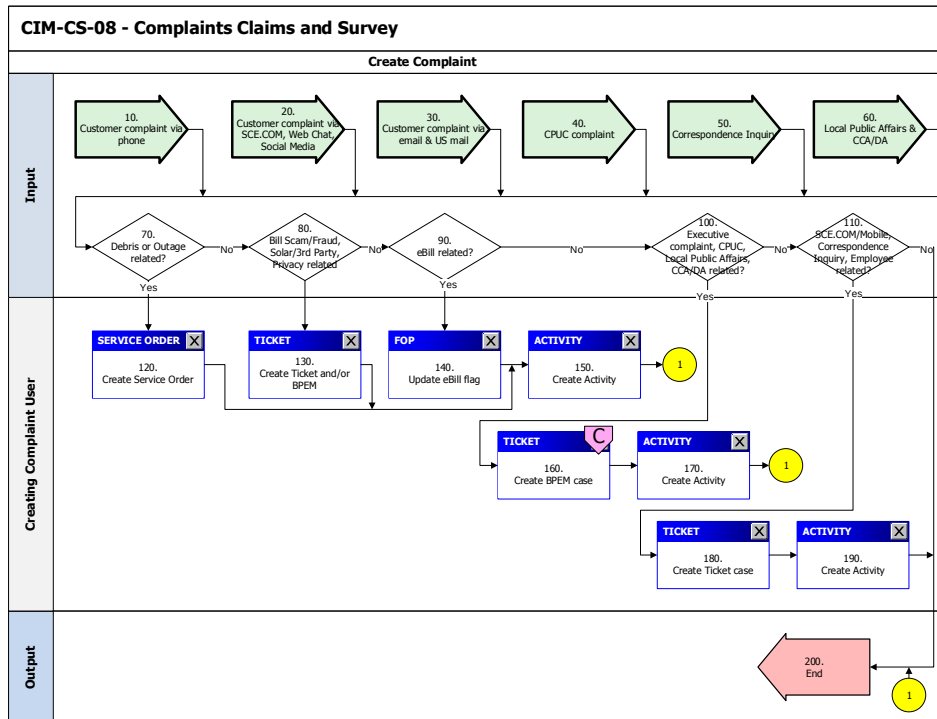

2.6 Process Flows

This BPD will cover Create Complaint and Manage Complaint. Each subsection where the process is detailed will have a process flow diagram for that process and a table detailing the steps that are taken within that process including processes handled outside of SAP.

2.6.1 Create Complaint

This process flow describes the process to create a complaint.

Process Flow Diagram

Process Flow Steps

Step	Description of Step	Hybris C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
10	Customer complaint via phone Customer file a complaint to SCE via phone.	N/A	N/A	
20	Customer complaint via SCE.COM, Web chat, Social Media Customer file a complaint to SCE via SCE.COM, Web chat and Social Media (Twitter, Facebook and LinkedIn)	SCE.COM	N/A	
30	Customer complaint via email & US mail Customer file for a complaint to SCE via email and US mail.	N/A	N/A	
40	CPUC complaint CPUC file a complaint to SCE via Regulatory Information Management System. Government file a complaint to SCE via LPA/BCD AEM.	N/A	N/A	
50	Correspondence Inquiry Customer complaint/inquire about the correspondence.	N/A	N/A	
60	Local Public Affairs & CCA/DA complaint Local Public Affairs file a complaint to SCE via LPA/BCD AEM or complaint about CCA/DA.	N/A	N/A	
70	Debris or Outage related? If complaint is debris or Outage related, go to step 120. Otherwise, go to step 90.	N/A	N/A	
80	Bill Scam/Fraud, Solar/3rd Party, Fraud, Privacy related? If complaint is Bill Scam, Solar/3rd Party, Fraud, Privacy related, go to step 150. Otherwise, go to step 90.	N/A	N/A	
90	eBill related? If BP complaints about account is defaulted to eBill and wanting to receive paper bill, go to step 140. Otherwise, go to step 100.	N/A	N/A	

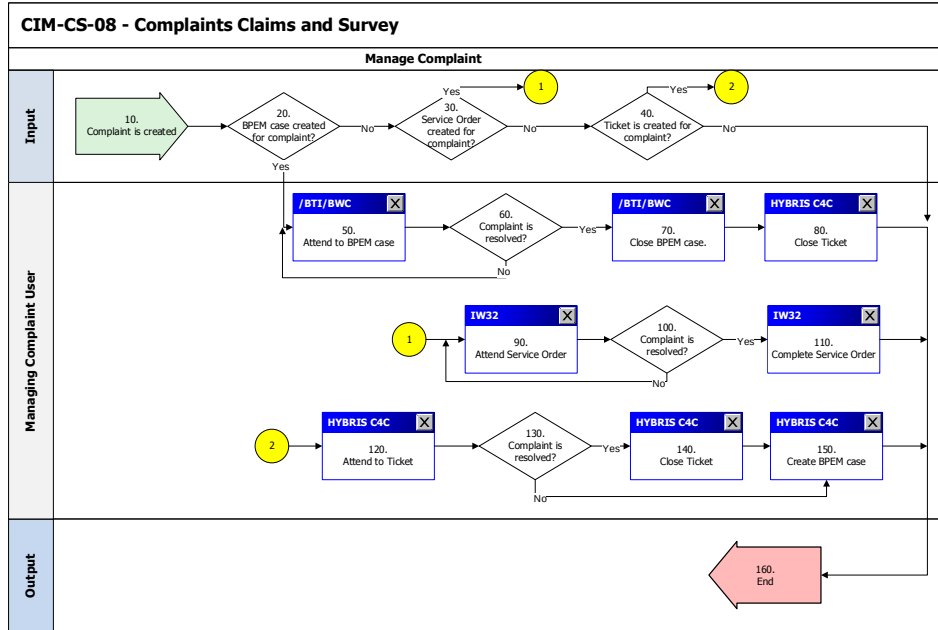

Step	Description of Step	Hybris C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
100	Executive complaint, CPUC, Local Public Affairs related? If complaint is Executive complaint, CPUC or Local Public Affairs related, go to step 160. Otherwise, go to step 110.	N/A	N/A	
110	SCE.COM/Mobile, Correspondence Inquiry, Employee related? If complaint is related to SCE.COM/Mobile, Correspondence Inquiry and employee related, go to step 180. Otherwise, go to step 200.	N/A	N/A	
120	Create Service Order User selects the specific Order Code to create a Service Order. Service Order will be routed to the Field Personnel to work on.	Hybris C4C	Creating Complaint User	
130	Create Ticket and/or BPEM case Create Ticket and or BPEM case for CSIG complaints.	Hybris C4C	Creating Complaint User	
140	Update eBill flag If BP complaints about account is defaulted to eBill and wanting to receive paper bill, CSR will remove eBill flag from BP Account.	Hybris C4C	Creating Complaint User	
150	Create Activity User creates Activity Record documenting the Work Order or CSIG complaint or BPEM case reference number and the detail of the complaint	Hybris C4C	Creating Complaint User	
160	Create BPEM case User selects the specific BPEM case category to create a BPEM case. BPEM case will appear in the work queue for a specific work group to be worked on.	Hybris C4C	Creating Complaint User	Control CS-1165 & Control CS-1185

Step	Description of Step	Hybris C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
170	Create Activity User creates Activity Record documenting the Work Order or BPEM case reference number and the detail of the complaint	Hybris C4C	Creating Complaint User	
180	Create Ticket User selects the specific Ticket category to create a BPEM case. Ticket will be assigned to specific employee to work on.	Hybris C4C	Creating Complaint User	
190	Create Activity User creates Activity Record documenting the Work Order or BPEM case reference number and the detail of the complaint	Hybris C4C	Creating Complaint User	
200	End			

2.6.2 Manage Complaint

This process flow describes the process in managing complaint.

Process Flow Diagram

Process Flow Steps

Step	Description of Step	Hybris C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
10	Complaint is created Complaint is created in SAP.	Hybris C4C	N/A	
20	BPEM case created for complaint? If BPEM case is created for the complaint, go to step 50. Otherwise, go to step 40.	N/A	N/A	
30	Service Order created for complaint? If Work Order is created for complaint, go to step 90. Otherwise, go to step 40.	N/A	N/A	
40	Ticket is created for complaint? If Ticket is created for the complaint, go to step 120. Otherwise, go to step 160.	N/A	N/A	

Step	Description of Step	Hybris C4C / T-Code	Role(s)	If step is relevant for a Control, add Requirement ID
50	Attend to Complaint User attends to BPEM case for complaint.	/BTI/BWC	Managing Complaint user	
60	Complaint is resolved? If complaint is resolved, go to step 70. Otherwise, go to step 50.	N/A	Managing Complaint user	
70	Close BPEM case User documents the complaint resolution in the BPEM case long text and update BPEM Case status to 'Closed'.	/BTI/BWC	Managing Complaint user	
80	Close Ticket Ticket associated with the BPEM case is closed.	Hybris C4C	Managing Complaint user	
90	Attend to Work Order User attends to the Work Order and goes to the premise.	IW32	Managing Complaint user	
100	Complaint is resolved? If complaint is resolved, go to step 110. Otherwise, go to step 90.	N/A	Managing Complaint user	
110	Complete Service Order User document the complaint resolution in the Work Order long text and update Work Order status to 'Completed'.	IW32	Managing Complaint user	
120	Attend to Ticket User attends to the Ticket for complaint.	Hybris C4C	Managing Complaint user	
130	Complaint is resolved? If complaint is resolved, go to step 140. Otherwise, go to step 150.	N/A	N/A	
140	Close Ticket Ticket is closed.	Hybris C4C	Managing Complaint user	
150	Create BPEM case Create a BPEM case via Ticket.	Hybris C4C	Managing Complaint user	
160	End			

2.7 3rd Party and SCE Legacy System Integrations

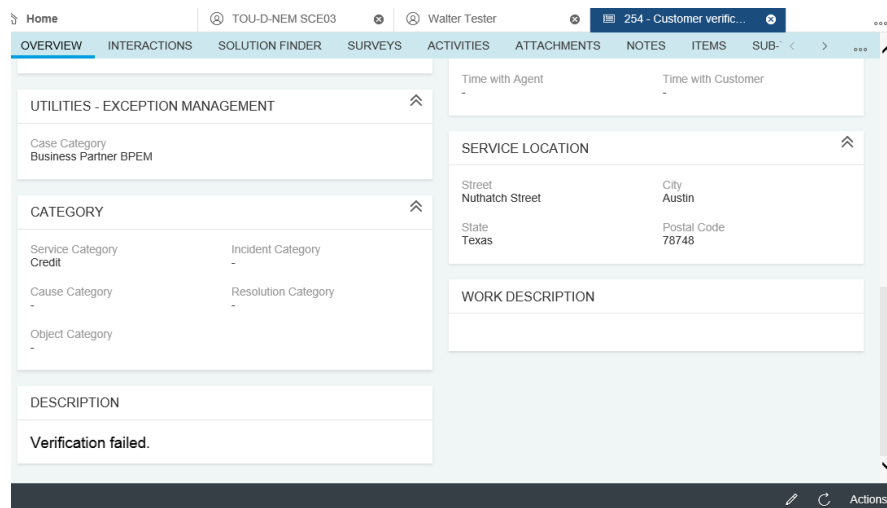

3 rd Party or SCE Legacy System Integration	Description of Integration and Required Change to 3 rd Party or SCE Legacy System	Estimated Complexity of 3 rd Party or SCE Legacy system change
IVR (DB2 & Genesys) and SCE.COM	Survey response from IVR and SCE.COM are downloaded to Medallia for report generation.	High

2.8 Data Elements

The information that will be captured for the Complaint (either as part of migration or in the course of normal processing) will be defined in this BPD.

2.8.1 Create Complaint BPEM case

The following data elements will be used by the BPEM case creation for complaint in Hybris C4C.

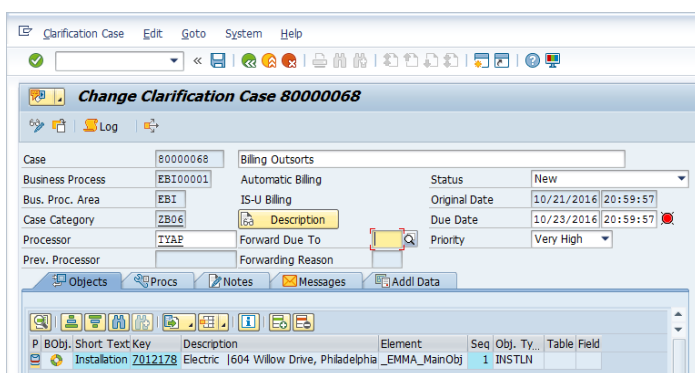

Field	Type	Comments
Case category	Required	Complaint type

Field	Type	Comments
Description	Optional	BPEM case long text
Service Category	Display	Category selected for the Ticket

2.8.2 Edit Complaint BPEM case

The following data elements will be used by the BPEM case Edit for complaint in Hybris C4C.

Field	Type	Comments
Case number	Required	BPEM case number
Status	Required	Status of the BPEM case
Priority	Required	Priority of the BPEM case
Due Date	Required	Due date of the BPEM case
Due Time	Required	Due time of the BPEM case
Processor	Required	Person assign to work on the BPEM case
Forward Due To	Optional	Required only when the BPEM is reassigned from one person to the other person. This contains forwarding reason.

2.8.3 Create Activity

The following data elements will be used by Activity creation in Hybris C4C.

Home
TOU-D-NEM SCE03

Notes
Customer Hero request is created

Save ^ Cancel

Field	Type	Comments
Subject	Optional	Description of the activity
Account	Display	BP name
Primary Contact	Optional	Primary Contact person name
Start Date/Time	Optional	Start Date/Time of the Activity
Direction	Required	Channel. Eg. Inbound, Outbound
Category	Required	Category of an Activity
Priority	Required	Priority
Status	Display	Status
Owner	Required	Creation user name
Campaign	Optional	N/A for SCE. Will be made hidden
Sales Territory	Optional	N/A for SCE. Will be made hidden
Notes	Optional	Activity long text

2.8.1 Create Ticket

The following data elements will be used by Ticket creation in Hybris C4C.

Field	Type	Comments
ID	Display	Ticket number
Type	Mandatory	Type of Ticket. 'Service Request' will be defaulted.
Source	Mandatory	Channel used to create ticket. 'Manual Data Entry' will be defaulted.
Employee	Optional	Person the ticket is assigned to
Service Category	Mandatory	Category of the Ticket
Cause Category	Optional	Sub category of the Ticket
Priority	Optional	Priority of the Ticket
Agent	Display	Person that created the ticket
Subject	Mandatory	Title of the Ticket. Free text field.
Description	Optional	Long text of the Ticket

2.8.2 Source Systems and Data Volumes

- Customer complaints handled:
 - o 4050 in 2015
 - o 4919 in 2016

- 4883 in 2017
- Customer claim handled:
 - Average of 12,854 claims a year

2.9 Cloud for Customer (Hybris C4C) Integration

2.9.1 Processes

- Ticket and BPEM case creation for complaint can be done via Hybris C4C views
- BPEM case change and display view will be available for user via Hybris C4C FOP.
- Activity record create, change and display view will be available for user via Hybris C4C views.
- Service Order creation and display will be available for user via Hybris C4C views.

2.9.2 Activity Records

[Refer to Customer Interaction BPD Call Disposition Type & Sub Type.](#)

2.9.3 Service Order

The following activities will result in a Service Order to be created:

- Complaint from BP on debris or mess left by field personnel
- Outage reported from BP

2.10 Exception Management Requirements

This section outlines a high level description of each BPEM Case or other user workflow items (such as "Tickets" used by Front Office) used to route work requests between business areas. The companion document for this section which outlines the detail of each case is documented in APSE on the [Exception Case Template General Document #8](#).

User Exception Scenario / Description	User Group	Initiated by	Work Distribution
Refer to attached worksheet.			

2.11 Process Risks and Mitigation

Risk Statement	Mitigation
N/A	

2.12 Key Performance Indicators

The following have been identified as KPI's at Southern California Edison, along with the means of measuring each KPI and the current measurement statistic for each KPI:

Measured KPI	Description	Measurement Method	Current Statistic
Complaint Resolution	Maintain < 10-day turnaround for escalated complaints	N/A	N/A
Customer Satisfaction (SCE & GC Services Blended)	> 90% (measured by the ACS)	N/A	N/A
G-4 AB&G Satisfaction for S1 Customers - Achieve ≥72%	N/A	N/A	N/A
G-5 BCD Channel Satisfaction for S1 Customers - Achieve ≥82%	N/A	N/A	N/A
SCE CSR Quality Assurance	>90% (measured by QA scores)	N/A	N/A
GCS Quality Assurance	>90% (measured by QA scores)	N/A	N/A
JD Power	Maintain 2nd Quartile	N/A	N/A
Customer Satisfaction (JD Power) Scores	Target: 2nd Quartile	N/A	N/A
SCE.com satisfaction	Target: > 66	N/A	N/A
VOC – Ease of Experience	Voice of the Customer measurement (measured on survey)	N/A	N/A
Call Quality Monitoring	Call monitoring QA score based upon agreed upon call standards.	N/A	N/A
Issues	Number of issues raised with Customer Issues Management	N/A	N/A
IVR - Customer Satisfaction	Customer satisfaction with IVR	N/A	N/A
PUC Complaints	Number of Public Utility Commission complaints	N/A	N/A

2.12.1 Key Metric Definition

The following have been identified as key metrics at Southern California Edison that require business rule for calculation:

Key Metric	Description	Business Rule	Reference
N/A			

3 Controls, Regulatory Rules, and Security

Requirement ID (from RTM)	"As-Is" Control Requirement	"To Be" Risk Statement	"To-Be" Control Activity	Control Automation (manual, IT dependent- manual, automated)	Relevant technical identifier or RICEFW reference
CONTROL-CS-1165	Expedited Complaint Procedure for Community Choice Aggregators (CCAs): SCE shall apply the expedited complaint procedure defined in Rules 24 through 29 ("Rules Regarding Enforcement Procedures") of the Code of Conduct and Expedited Complaint Procedure to complaints filed by Community Choice Aggregators (CCAs) against electrical corporations, including complaints alleging violations of the rules adopted in this decision. The Code of Conduct and Expedited Complaint Procedure pertaining to the consideration, formation and implementation of CCAs is included as Attachment 1 of this Decision, D.12-12-036. (See OP 3 of D.12-12-036).	Noncompliance or misinterpretation with regulatory and legislative requirements may lead to misstatements of financial statements, penalties, fines and/or prosecution	Whenever a BPEM case is created to document a CCA complaint, the Customer Choice Services Sr. Analyst logs the complaint in the CCA Log and tracks the CCA Complaint until resolved. The Sr. Analyst is also able to track the resolution status for "Expedited" CCA complaints via reports. ("Expedited" Complaints are validated complaints versus just inquiries.	ITDM – IT Dependent Manual	N/A
CONTROL-CS-1185	Maintain Log of All Community Choice Aggregator (CCA) Complaints: SCE shall maintain a log of all new, resolved, and pending complaints submitted in writing relating to services provided for the Community Choice Aggregator (CCA) and CCA customers. The log shall be subject to review by the CCA and the Commission, and shall include the date each issue was received; the customer's name, address, and Service Account ID number if the issue is in relation to a specific customer; a written description of the complaint; and the resolution of the complaint, or the reason why the complaint is still pending. See Rule 21 of The Code of Conduct and Expedited Complaint Procedure pertaining to the consideration, formation and implementation of Community Choice Aggregators (CCAs). (D.12-12-036, OP1 and Attachment 1, p. A1-9).	Noncompliance or misinterpretation with regulatory and legislative requirements may lead to misstatements of financial statements, penalties, fines and/or prosecution	Whenever a BPEM case is created to document a CCA complaint, the Customer Choice Services Sr. Analyst logs the complaint in the CCA Log and tracks the CCA Complaint until resolved. The Sr. Analyst is also able to track the resolution status for "Expedited" CCA complaints via reports. ("Expedited" Complaints are validated complaints versus just inquiries.)	ITDM – IT Dependent Manual	N/A

3.1 Security Considerations

Role	Transaction Code (T-Code)	T-Code Description	Functional Restriction	Organizational Restriction
Consumer Affairs	/BTR/PP_ASTROLABE (tcode to run the report) /BTR/PP_SUM (tcode to display the report)	Customer Centric Hub	Display	
Consumer Affairs	n/BTI/BWC	BDEX Dynamic Work Center	Display	
Consumer Affairs	EMMAC2	BPEM case	Change	
CCC, GS Services, BCD, RSO, Consumer Affairs, LPA	Hybris C4C Ticket	BPEM case creation	Create	
CCC, GS Services, BCD, RSO, Consumer Affairs	Hybris C4C	Service Order creation	Create	
CCC, GS Services, BCD, RSO, Consumer Affairs, LPA	Hybris C4C	Service Order display	Display	
CCC, GS Services, BCD, RSO, Consumer Affairs, LPA	Hybris C4C FOP - IW38	List of Service Order created	Display	
All Users	Hybris C4C Activity	Create Activity	Create	
CCC, GC Services, BCD, RSO	CAA2	Contract Account – remove eBill field	Change	

3.2 Custom Program/Transaction Codes

Please identify any custom programs/transaction codes that need to be developed for RICEFW objects.

- Is the custom program executed in the batch mode or dialogue mode
- Is the custom program assigned to an authorization group
- What is the custom transaction code for the custom program
- Should there be an authorization check made against any field in the custom program/custom t-code and if so what is the custom/standard authorization object used(For example does it have to be restricted to residential vs commercial customer)
- Does the custom programs/custom t-codes have any critical or sensitive customer information that needs extra security

Custom Table	Authorization Grp Assigned	Custom T-code for the Table	Table Access (display/update)	RICEFW Reference ID
N/A				

3.3 Custom Table/Transaction Codes

Please identify any custom tables/transaction codes that need to be developed for RICEFW objects.

- Are there any customer sensitive/critical Z tables created
- What is the authorization group assigned to the table
- Is it just a maintenance or display only table
- What is the Z transaction code for the custom table

Custom Table	Authorization Grp Assigned	Custom T-code for the Table	Table Access (display/update)	RICEFW Reference ID
N/A				

3.4 Data Criticality and Cybersecurity Baseline Risks

Specify Data Classification /Special Handling or Regulatory Requirement <i>What is the classification of Data? Does it trigger any special regulations?</i> <i>Please select the classification / Sensitivity of the Data. This will help us Assess the Risk associated and remediation measures if any.</i>	<Select all that apply> ☐ PII - Personal Identifiable Information / Privacy Law ☐ CEII - Critical Energy Infrastructure Information ☐ FERC SOC (Standards of Conduct) ☐ NERC CIP Confidential ☐ Sarbanes-Oxley (SOX) financial reporting data ☐ SCE utility data accessible by affiliate companies (CPUC) ☐ PCI - Payment Card Industry Compliance ☐ Customer Information Service Request (CISR, CISR-DRP) ☐ Other <u><Please Specify></u> ☐ Internal ☐ Public ☐ Confidential
Please identify which business Group/Role will require access to the data and/or solution: <i>Please select the list of Busines Groups will have access to this Data / Process. This will help us Determine the Impact and Risk Spread. Will ensure efficient Risk mitigation measures.</i>	<Select all that apply> ☐ SCE Customer, Res./Comm. Customer; ☐ SCE OU, Business Function Organization Name: ☐ Vendor ☐ External business partner(s) & SaaS providers ☐ External on-shore contractors ☐ External off-shore contractors ☐ SCE Affiliate Company Employees ☐ SCE Employees, specify if they have Marketing Function responsibilities (e.g., ES&M) ☐ SCE contract workers

	☐ Regulatory Agencies ☐ Others <u><Please Specify></u>
How many of the SCE Customer, Employee, Vendors will use or affected by the Business Process? <i>To identify the Impact if services are adversely affected.</i>	100 100 - 1,000 1,000 - 10,000 10,000+.....
How much Information/data would be processed, received or tramitted by the Business Process? <i>The data volume that will be utilized by this process. Helps us in determining the Impact and criticality</i>	100 MB / GB 100 - 1,000 MB / GB 1,000 - 10,000 MB / GB 10,000+ MB / GB.....
Number of business transactions in average? <i>These are the number of transactions process by the application on average. The number of transactions help in understanding criticality and Impact.</i>	
Additional Security Consideration:	Any Cybersecurity impact in addition to SAP system security: • Internet Facing Web Application? Yes/No, Details: • Internet Facing Application Programming Interface? • 3rd party Fedrated Authentication & Authorization, Single Sign On?

4 Technical Considerations

4.1 RICEF-W Assessment

All of the Forms, Reports, Interfaces, Conversion items, Extensions/Enhancements and Workflows (RICEF-W) that have been identified for this BPD are detailed in the tables below and will represent the totality of all RICEF-W items documented at the time of sign-off of this BPD. Any RICEF-W items that are confirmed via change control after this BPD receives final sign-off, will be managed within Southern California Edison's APSE environment and not within this document.

4.1.1 Reports

Report Name & Description (List Requirements met by this Report)	Complexity	Reference ID
Ability to provide Chrono/history of account from Service Orders and IRs from a report.	Medium	REP-CIM-S-08-01 Report for Service Order and IR long text
Provide all complaints and compliments by Organization and agent	Medium	REP-CIM-CS-08-01 Complaints and compliments by organization and user
Ability for system to generate a statistical report on survey response	Medium	REP-CIM-CS-08-01 Statistical report on survey response
Ability to generate a report on a survey response and comment	Medium	REP-CIM-CS-08-02 Report on survey response detail information
Ability for system to extract Transactions, Interaction activities of BPs and provide to Voice Of The Customer Survey Tool for random survey. Filter by date range and business rules	Medium	REP-CIM-CS-08-03 Report to extract BP Transactions & Interaction Activities to Voice of the customer survey tool

4.1.2 Interfaces

Interface Name & Description (List Requirements met by this Interface)	Complexity	Reference ID
Ability to route a caller back to IVR to complete the survey when the agent ends the call.	Medium	INT - CIM-CS-08-01 Route caller back to IVR to complete survey
Voice of the Customer Survey Tool shall interface with C4C to create Interaction Records for assigned business customers based on survey results	Medium	INT - CIM-CS-08-02 Voice of the customer survey tool to create IR in C4C
Ability for system to interface with Voice Of The Customer Survey Tool to send survey to Assigned Business customers based on business rules.	Medium	INT - CIM-CS-08-03 Send survey to Assigned non residential customer via Voice of the customer survey tool
The survey tool (3rd party tool) shall send a response to a designated employee based on business rule when the survey response is completed	Medium	INT - CIM-CS-08-03 Notify employee on a survey response
Ability for system to record if the BP has previously received a survey with detail such as transaction date, transaction type, 3rd party name & indicator (eg Voice Of The Customer Survey Tool)	Medium	INT - CIM-CS-08-04 Received and store survey data from 3rd party and store in SAP
Ability for the system to provide transaction reference attributes (activity id, work order id etc.) as part of the survey response	Medium	INT - CIM-CS-08-04 Third party to provide transaction reference attributes for survey response

4.1.3 Conversion

Conversion Name & Description (List Requirements met by this Conversion)	Complexity	Reference ID
N/A		

4.1.4 Extension/Enhancements

Extension Name & Description (List Requirements met by this Extension)	Complexity	Reference ID
System to automatically default system date to end date on a complaint when the complaint status is closed or completed or canceled. User is able to overwrite the end date.	Medium	ENH - CIM-CS-08-01 Default End Date to BPEM
Ability for originator of note to edit own note for complaint (other users should not be able to edit someone else note)	Medium	ENH - CIM-CS-08-02 Ability for BPEM creator to edit BPEM long text

Extension Name & Description (List Requirements met by this Extension)	Complexity	Reference ID
Ability to mark complaint notes and/or responses to be private or confidential	Medium	ENH-CIM-CS-08-06 Authorization control to update BPDM long text
Ability for system to automatically prevent a disconnect if a customer filed for designated complaints	Medium	ENH-CIM-CS-08-07 Credit related complaint to create dunning lock
Ability for the system to extract the data for reporting purposes for Voice Of The Customer Survey Tool (eg. Medallia) Ability for the authorized user to modify the criteria for data extracts for survey purposes to Voice Of The Customer Survey Tool	Medium	ENH-CIM-CS-08-01 Download customer data from SAP
The system should be able to initiate a survey based on business rule	Medium	ENH-CIM-CS-08-05 Create survey based on business rules
BP should only receive a survey x time of the same type of transaction within a certain period	Medium	ENH-CIM-CS-08-02 Control on number of survey BP receives

4.1.5 Forms

Form Name & Description (List Requirements met by this Form)	Complexity	Reference ID
N/A		

4.1.6 Workflows

Workflow Name & Description (List Requirements met by this Workflow)	Complexity	Reference ID
N/A		

4.2 IDEX Considerations

N/A

4.3 Production System Cut-over Considerations

Complaint, compliment, claim and survey are not migrated over to SAP. They will remain stored in the legacy system. User will reference to the legacy system when BP calls SCE asking about complaint, compliment and claim created prior cut-over.

4.4 Other Considerations

N/A

5 Change Management

5.1 Change Impacts

Change Element Short Description	Change Impact Category	Audience Group(s)	Impact	Business Effort
A BPEM case can be issued to track and reports complaints related to solar/3rd party, bill scams/fraud, privacy, canned spam and TCPA. The BPEM case allows for follow up and visibility to the order until completion. Currently users completes a form in Portal that generates an email that goes to multiple parties. There is no visibility outside of a note regarding the outcomes of the skip tracer / fraud / compliance request.	Process,Benefit/Improvement,Regulatory/Legal (275)	CS-CSOD-CCC All,CS-BCD-All,CS-CSOD-Consumer Affairs, CS-CP&S-All	Low	Low
Users may create a ticket/BPEM case for all escalated calls following their internal process (eg. CCC process - lead and then can be forwarded to supervisor and then to manager prior to going to consumer affairs) for tracking purposes. This process efficiency allows to for better tracking of all escalated calls. Notes can be updated if escalation is moved forward so that other people can view what has already been offered to the customer and what was discussed. Today, if agents are not able to locate a supervisor, a callback if offered. The callback request is an email that is sent to a shared inbox. There is no tracking visibility on the escalated call (e.g. completion, follow up, manager call etc.) unless the agent reviews the notes.	Benefit/Improvement Process Culture Shift (516)	CS-CSOD-CCC All; CS-BCD-All; CS-CSOD-Consumer Affairs; CS-CSOD-RSO All	Medium	Medium

Change Element Short Description	Change Impact Category	Audience Group(s)	Impact	Business Effort
BPEM and ticket reporting capabilities may replace the use of databases to track and report on escalated volumes. Currently many organizations have databases to track and report escalations. The data that is manually entered is used for tracking volumes and types. SAP functionality will allow for visibility and multiple users can create reports as needed.	Benefit/Improvement; Culture Shift; Process (856)	CS-BCD-All; CS-CP&S-All; CS-CSOD-CCC All; CS-CSOD-Consumer Affairs	Medium	Medium
Non-escalated complaints related to data privacy, fraud, bill scams, and solar	Benefit/Improvement Process Job roles	CP&S-CS-IGO This may impact CSOD-CCC too	CP&S: High	CP&S: High

Below is a description of each:

Change Element Short Description: Describes the 'As-Is' scenario and what is changing.

Change Impact Category: Determined by asking the questions below.

1. **Staffing Levels** - Is the work effort increasing or decreasing (staffing levels), and how (e.g., task automation, new process/tasks)?
2. **Job Roles** - Will the responsibilities, authority, or required skills for a job or job roles change? Will people be reporting to new leaders? Will managers' responsibilities change?
3. **Compensation / Performance** - Will the changes have such an impact on roles of an individual that merits a change in how they are compensated or how their performance will be evaluated? What behaviors are rewarded and recognized?
4. **Organization Structure** - Is the ownership of the Process or Data changing (think departments, jobs, or roles, not individuals)?
5. **Decision Making** - Will any of the changes impact how decisions are made, by or between, business units / departments? Who makes them, how they determine the criteria for making a change?
6. **Culture Shift** - Will organizational value systems impact the way change happens or be impacted by the change? What are the underlying values of the organization that will directly influence the way change will be accepted and how much work will ultimately be required to ensure successful outcomes for the business?
7. **Location / Facilities** - Will the change impact the physical location where they process is being implemented or require changes to the facilities to enable the process to be effective?
8. **Process** - Any change to the current process (e.g. manual process becomes automatic, or vice versa)? Are there new processes being introduced or an old process being decommissioned? Is there a requirement to change an existing business rule or business policy? Will new business rule or policy needs to be introduced and enforced or complied to?
9. **Regulatory/ Legal** - Are there any legal / regulatory requirements that might be impacted
10. **Technology** - Are other applications impacted (e.g., going away, becoming read-only), or are there new requirements (e.g., new SW / HW, new version)
11. **Benefit/Improvement** - Will there be an improvement or benefit to any of the stakeholders because of this change. (Be sure to include any pain points that are being alleviated)

12. **Other** - Are there emotional implications stemming from any of these changes (think of buy-in issues or fears)

Audience Group(s): These are the affected departments, divisions etc...

Impact: The following were used to determine the impact:

Level	
HIGH 	- BUSINESS OUTCOMES: Drives change to cost, efficiency, customers. - JOB: More than 40% of individual's job will change and / or additional skills are required with significant changes to Job Documents. Examples include: - Shift from manually intensive role to using new tools and systems - Employee is going to be redeployed - High level of "technical or functional" changes needed for a particular group - Significant changes to culture & attitudes to get job done - Big shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: High level of "relational" changes for a particular group (e.g. reporting relationships, effective working relationships with customers, teams, and stakeholders etc.) - POLICIES/PROCEDURES: Processes, procedures, and/ or policies are not in place today and need to be defined. - REGULATORY REQUIREMENT: drive changes to the way we comply
Level	
MEDIUM 	- BUSINESS OUTCOMES: Limited change to cost, efficiency, customers. - JOB: 20-40% of individual's job will change and / or additional skills are required with significant changes to Job Documents, Examples include: - Employee job title or function is modified, resulting in minor to moderate changes to roles and responsibilities. - There will be some changes to the culture & attitudes - Shift from moderate technology use to using new tools and systems - Moderate level of "technical or functional" changes needed for a particular group - Moderate shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: Moderate level of "relational" changes for a particular group (e.g. reporting relationships) - POLICIES/PROCEDURES: Processes, procedures, and/or policies are inconsistent today and not defined or documented in many cases - REGULATORY REQUIREMENT: No impact.

Level	
LOW 	- BUSINESS OUTCOMES: No impact. - JOB: Less than 20% of individual's job will change and / or additional skills are required with significant changes to Job Documents. Examples include: - Employee job title or function is slightly modified with few, if any, changes to roles and responsibilities - There will be little change to the culture & attitudes - Shift from using some technology to new systems & tools - Light level of "technical or functional" changes needed for a particular group - Small shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: No impact or light level of "relational" changes for a particular group (e.g. reporting relationships) - POLICIES/PROCEDURES: Processes, procedures, and/or policies are consistent, but not well documented, and will need to be documented/ Other minor changes to be made. - REGULATORY REQUIREMENT: No impact.

Business Effort: Initial assessment of the impact to the business High, Medium, Low
