1 Business Process Overview

Manage Customer Interactions process will define how to create and display an Activity or a BP Contact within SCE's SAP environment

An Activity can be recorded when a user or an SCE employee access details about a customer, regardless of whether or not the customer initiated the activity (e.g. SCE employee calls a customer) Activities will be captured manually by a Hybris C4C user upon client interaction. System executed processes (e.g. letters sent to the customer, dunning carried out, etc.) will create a BP contact automatically in S/4HANA.

The types of Activities/BP Contact that SCE has with its customers can be classified as:

- Customer interacting with a BCD representative
- Customer interacting with a CCC call center representative
- Customer interactions with SCE.com
- Customer interactions with IVR systems

1.1 Current Pain Points for Southern California Edison

- Notes aren't searchable – Since the subject line is free text the user must scan through the notes to find the right one
- CSS Notes aren't available in CRM, agents have to swivel between two systems

1.2 Responsible Parties

Contact	Contact Person
Southern California Edison Business Process Owner	Janet Covington

1.4 Terminology

Term/Acronym	Definition and SAP Equivalent (if applicable)
Activity	An Activity is defined as an event when an SCE employee or system interacts with the customer through a communication medium or performs an interaction associated with the customer's account. Each activity type includes notes feature that allows you to add more information, as necessary.
APSE	Accelerated (or Axon) Project Support Environment
BDEX	SAP add-on functionality to support the processing of BPEM Cases
Billing Cycle	Is a group of contracts to be billed together via date-driven or regional criteria, it controls the billing cycle and is linked to the Meter Reading Unit. SAP equivalent term is the Portion.
Billing Document	A document that outlines the charges incurred for energy consumption for a specific contract. During the process of Billing, a billing document is generated for each contract on a contract account.
BMD	Business Master Data. The customer information which includes personal details, payment terms, dunning levels, billing rates and rate categories. The business master data objects are Business Partner, Business Agreement/Contract Account, and Contract.
BP	Business Partner
BPD	Business Process Design (or Document)
BPEM	Business Process Exception Management

Term/Acronym	Definition and SAP Equivalent (if applicable)
BWR	Basic Work Request. SAP equivalent is BPEM.
BP Contact	This component logs and displays all BP contacts that are stored by this or by other components.
CA	Contract Account
Channel	Data object in SAP that holds the interval data. Intervals can be kwh, price, factor, etc. SAP equivalent is Profile.
Clarification	A list of payments that could not be processed and require additional work in order to be posted.
Connection Object	The link between installation and postal regional structure. Usually a building, but can also be a piece of property or another facility, such as a fountain or construction site. The connection object corresponds to the functional location in plant maintenance (PM).
CRB	SAP Customer Relationship & Billing system. This is what is being implemented with the CSRP program.
Customer	Any entity with a relationship with SCE. This term is usually used in reference to customers (both individuals and organizations) This can include employees and third-party suppliers (banks and payment partners). SAP Equivalent is Business Partner (BP)
EAM	SAP Enterprise Asset Management
ERP	SAP Enterprise Resource Planning
Hybris C4C	SAP Cloud for Customer Solution
IMG	SAP Implementation Guide - where configuration is performed
Level Pay Plans	SAP equivalent term is Budget Billing. Budget Billing allows customers to pay regular equal amounts over a yearly period.
S/4HANA	SAP ERP Central Component (SAP) - The core SAP modules (FICO, WM, SD, EAM, HR). This term is commonly used to refer to the existing SAP modules implemented at SCE.
Summary Billing	Standard SAP functionality that enables the invoicing of multiple Contract Accounts under one Parent Contract Account (Consolidated Summary Billing). SAP equivalent is Collective Billing.
TMD	SAP Technical Master Data e.g. Connection Object, Premise, and Device Location

Additional terms may be found in APSE [General Document # 32 CSRP Glossary](#)

2 Business Process Design

2.1 Manage Customer Interaction Details

Manage Customer Interactions process will define how to create and display an *Activity* or a *BP Contact* within SCE's SAP environment.

An interaction should be recorded when a user accesses details about a customer, regardless of whether or not the customer initiated the activity.

An interaction can be created either from Hybris C4C or from S/4HANA, where the following terminology is used:

- **Hybris C4C** – Activity
- **S/4HANA** – BP Contact

All BP Contacts created in S/4HANA will be visible in Hybris C4C, however, no change capability will be available. Activities will always be created in Hybris C4C by the users whenever they are interacting with the Customer. The creation of the Activity is initiated once the Customer has been confirmed and any activity occurs in the customer's account. An Activity will be linked to the Customer and/or another business object (E.g. Contract Account, Premise, etc.).

There are two ways an interaction can be created – *automatic* or *manual*:

- An interaction can be created automatically, for example, when a Customer performs activities through IVR or Self-service (described in *CIM-CS-13 - Manage Inbound Telephone Call – IVR* and *CIM-CS-10 - Manage Customer Self-Service*) or through the creation of correspondence (described in *CIM-CS-08 - Complaints, Claims, and Survey*). Creation of correspondence through Hybris C4C (*CIM-CS-11 – Manage Outbound Request*) will be created in S/4HANA as BP Contact.
- The process of creating an activity manually from Hybris C4C begins with the user interacting with the customer through various channels, phone call, e-mail, etc. Once the user confirms the customer account and upon verifying the contract account and or premise they can categorize the interaction by clicking on the Activities WorkCentre. This would open the Activity view in Hybris C4C where the user would select a category (E.g. MOVE IN – Create; *Figure 1*) for the activity from a drop-down selection list. The category dropdown list will categorize the Activity that was identified by the user during the interaction with the customer. It is important for the users to select the correct category as this will be helpful to search and sort the interactions with the customer.

Once the activity is saved, the notes field will be greyed out, thereby preventing someone from editing or deleting the notes. It is recommended that a new activity should be created each time there is an interaction with the customer. However, as a process improvement, additional notes can be added to an existing Activity if it makes sense to do so (Example: customer calls back the same day for same reason).

All Activities for the Customer are available for viewing by the user with the most recent Interactions at the top, as seen in *Figure 1*.

Notes

Figure 2 - Activity Fields

2.1.1 Activities Properties

An Activity is classified using the following characteristics: category, start date and time, owner (the user who created the record), territory ID, campaign ID, and the notes.

Category

In C4C Hybris Category is the only container to categorize an interaction with the customer, therefore it will merge Class and Action from the BP Contact. It will define the type of transaction between the business and the company and also the type of action carried out.

Direction

Type of action carried out for the business partner based on the class category.

Priority

Urgency level of the activity

2.1.2 BP Contact Properties

For back-office processes that are executed in S/4HANA, BP Contacts as shown in Figure 3 (the equivalent of an activity in Hybris C4C) will be created to identify the type of contact and method of contact with the Customer or system. BP contacts will be created using the following properties: Class, Action, Type, Direction, and Priority.

Class

Type of transaction between the business partner and the company. Examples of contact classes include dunning, billing, and marketing. The configured contact classes will be contained in the document [CIM-CS-12 - BP Contact Activities Categorization List](#).

Action

Type of action carried out for the business partner based on the class category. The configured actions will be contained in the document [CIM-CS-12 - BP Contact Activities Categorization List](#).

Type

Specifies how the business contact was initiated, for example, by letter, telephone, or via the Internet. The following types will be configured in S/4HANA:

- Phone
- Mail
- Email
- Web Chat
- Social Media
- SCE.COM
- Walk-In
- IVR

Direction

Type of action carried out for the business partner based on the class category. The following Directions will be configured in S/4HANA:

- Incoming
- Outgoing.

Priority

Urgency level of the BP Contact. The following Priorities will be configured in S/4HANA:

- Very Low
- Low, Average
- High
- Very High.

Hybris C4C will provide a view that will display all the BP Contacts from S/4HANA as per mention in section 2.4 General Assumptions.

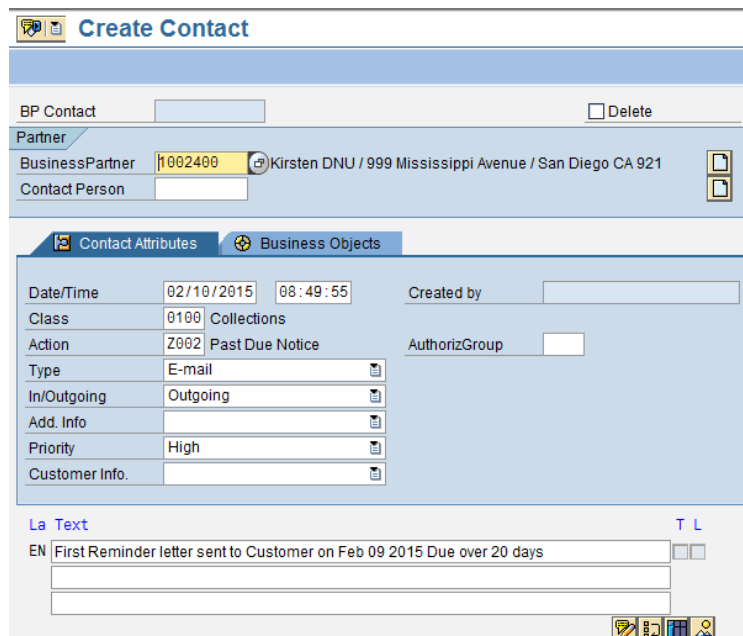

Figure 3 - BP Contact in S/4HANA

2.1.3 Activity Attachments

Activities allow the possibility of adding a local file, web link or a document from the library as an attachment to the activity as per displayed in Figure 4. Multiple files or links can be associated with each Activity.

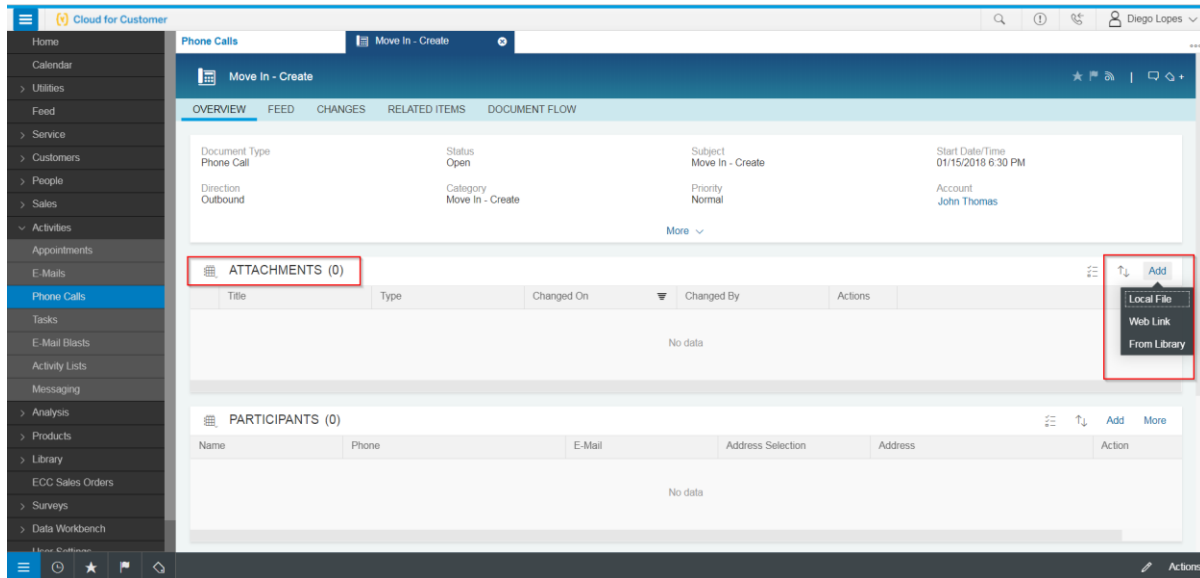

Figure 4 – Activity Attachments

2.1.4 Activity Search

Activities can be searched by navigating, e.g. to the Phone Calls view, as displayed in Figure 5. This view is configurable and the sections can be added or removed as well the filters in which is possible to return the listed activities.

Hybris C4C standard proposed search view.

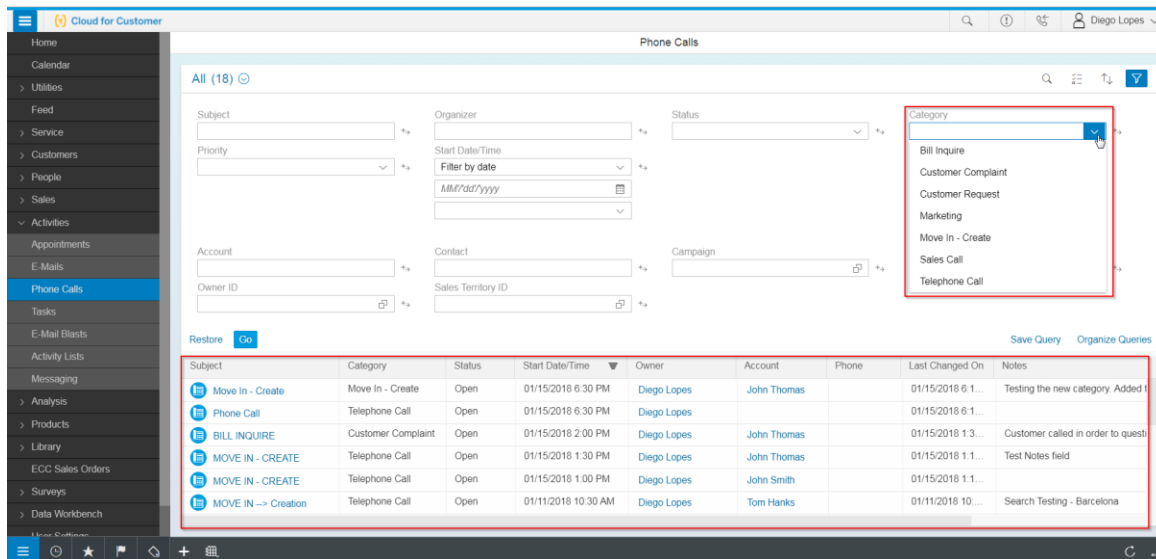

Figure 5 – Activity Global Search

2.1.5 Follow-up

Whenever a follow-up is required in order to give continuity to a certain Activity, the user may do so, by navigating to **Related Items** inside the Activity details. This section allows the user to create a follow-up for the following activities, for example, Appointment, Task, Phone Call, Service Ticket, etc.

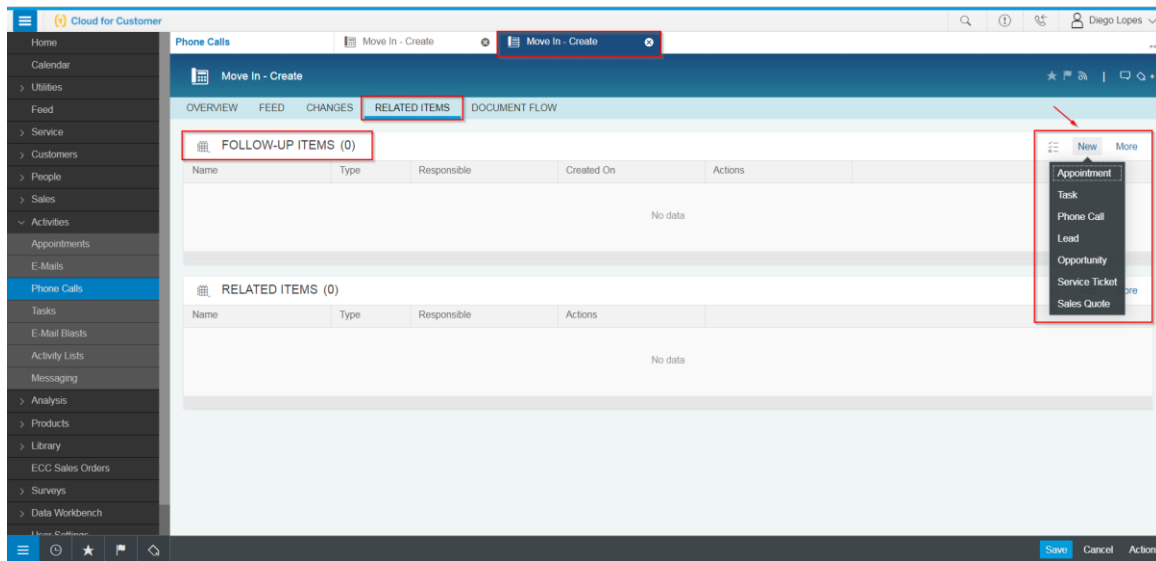

Figure 6 – Follow-up Items

2.2 Process / Performance Improvement

Greater visibility of all Activities for the Customer Activities can be searched by category, owner, and account.

2.3 Prerequisites and Inputs

A request to create or change Activity may originate via the following channels or systems:

- Technical Master Data
- Business Partner
- Contract Account
- Premise

2.4 General Assumptions

SAP is currently planning on adding a view that will allow displaying BP contacts from S/4HANA in Hybris C4C as of May 2018.

2.5 Business Process Hierarchy

This Business Process Hierarchy provides a listing of all scenarios/business processes, sub-processes, and SAP Transaction codes identified to support this process.

Level 1	Level 2	Level 3	Level 4
Back Office, Data Migration, Automatic Contact Creation	BP Contact Process	Create Contact	BCT0
Back Office	BP Contact Process	Change Contact	BCT1
Back Office, Migration, Automatic Contact Creation, Hybris C4C	BP Contact Process	Display Contact	BCT2
Activity Creation	Activities Process	Display Activities	Activities
Activity Search	Activities Process	Display Phone Calls (Search)	Phone Calls

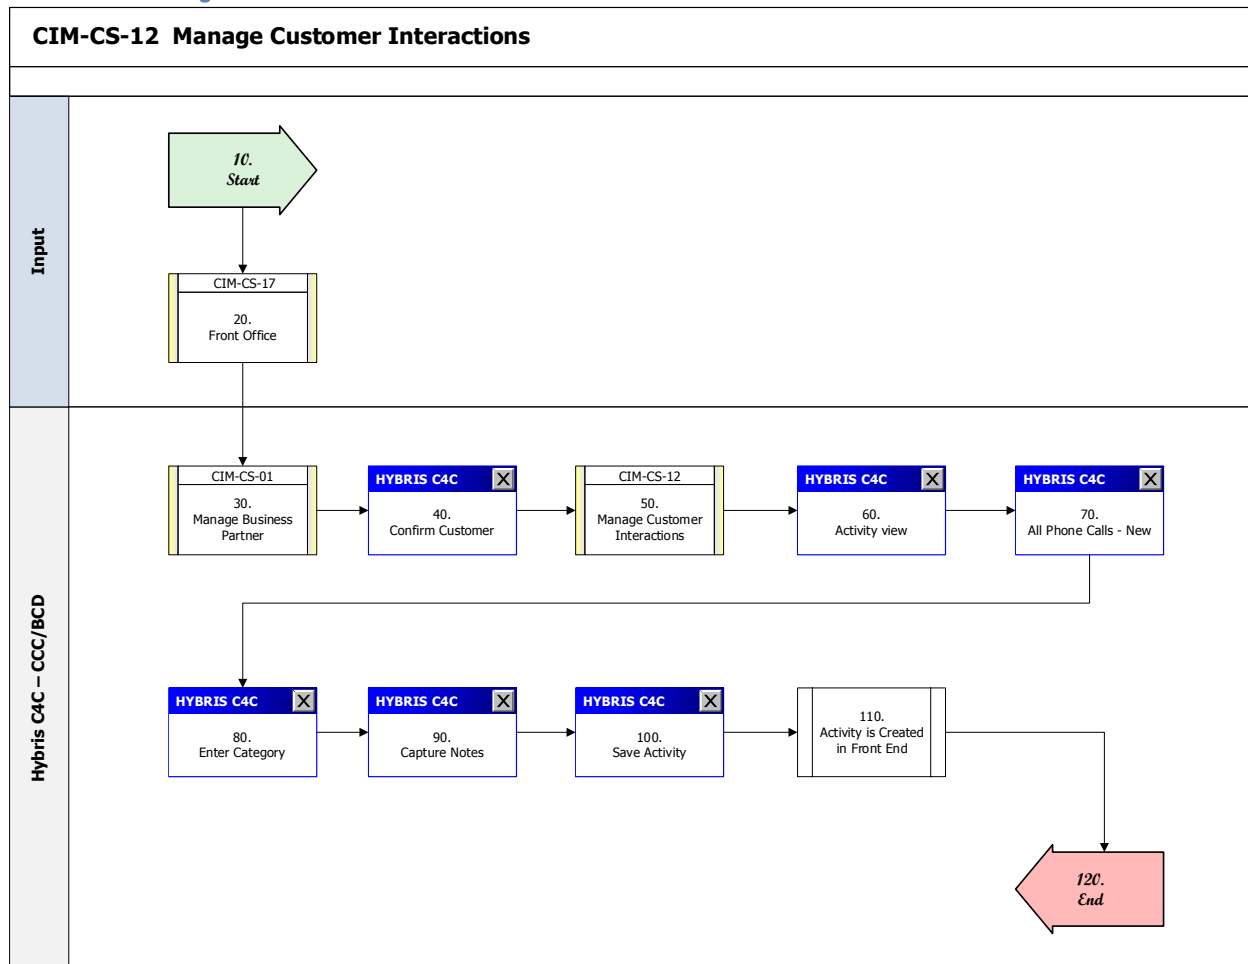

2.6 Process Flows

This BPD will cover the process involved in the creation of Activities via Hybris C4C. Each subsection where the process is detailed will have a process flow diagram for that process and a table detailing the steps that are taken within that process including processes handled outside of SAP.

2.6.1 Manual Creation

The below flow shows the manual creation of the Activity – one in which the user creates an Activity by clicking on the Activities facet after confirming the Customer.

Process Flow Diagram

Process Flow Steps

Step	Description of Step	Front Office	Role(s)
10	START	N/A	N/A
20	Front Office is opened.	Hybris C4C	Customer Interaction Management-Business Master Data
30	Customer calls, Agent searches for Customer by name in Utilities → Customer Search	Hybris C4C	Customer Interaction Management-Business Master Data
40	Agent confirms the customer by selecting Customer ID from the results returned.	Hybris C4C	Customer Interaction Management-Business Master Data

Step	Description of Step	Front Office	Role(s)
50	Agent navigates to the Activities tab.	Hybris C4C	Customer Interaction Management-Business Master Data
60	Activities View opens	Hybris C4C	Customer Interaction Management-Business Master Data
70	Agent clicks New in All Phone Calls section	Hybris C4C	Customer Interaction Management-Business Master Data
80	Agent enters the Category to categorize the type of activity that was interacted with the Customer	Hybris C4C	Customer Interaction Management-Business Master Data
90	Agent enters notes to give further details about the activity	Hybris C4C	Customer Interaction Management-Business Master Data
100	Agent clicks on Save.	Hybris C4C	Customer Interaction Management-Business Master Data
110	The Activity is successfully saved.	Hybris C4C	Customer Interaction Management-Business Master Data
120	END		

2.7 3rd Party and SCE Legacy System Integrations

3 rd Party or SCE Legacy System Integration	Description of Integration and Required Change to 3 rd Party or SCE Legacy System	Estimated Complexity of 3 rd Party or SCE Legacy system change
IVR	Possible use of shared functionality	
SCE.COM	SCE.COM is currently going through a modification in functionality	
Open Text	New Integration	
Bolt-on	New Integration	
Marketing Solution		

2.8 Data Elements

2.8.1 BP Contacts Data Elements

The following data elements will be used by the BP Contact.

Field	Type	Comments
Business Partner Number	Required	This is the BP number associated with the Contact
Contact Type	Required	Channel that was used for the interaction

Field	Type	Comments
Contact Class	Required	First level for Contact categorization
Contact Action	Required	Sub Level for Contact Categorization
Date	Optional	Creation date of the BP Contact
Time	Optional	Creation time of the BP Contact

2.8.2 Source Systems and Data Volumes

Identify the historical amount, volume, and Southern California Edison source systems for data objects supporting this process. The expected annual growth rate is [percent growth]%, for another [number of records] to be added to SAP per annum.

2.9 Cloud for Customer (C4C) Integration

2.9.1 Processes

Activity creation will be done through the majority of the existing processes.

2.9.2 C4C Views

Activities View

2.9.3 Activities

All Activities, this BPD will provide a full list of all the possible Categories.

2.10 Exception Management Requirements

This section outlines a high-level description of each BPEM Case or other user workflow items (such as “Tickets” used by Hybris C4C) used to route work requests between business areas. The companion document for this section which outlines the detail of each case is documented in APSE on the [Exception Case Template General Document #8](#).

User Exception Scenario / Description	User Group	Initiated by	Work Distribution
N/A			

2.11 Process Risks and Mitigation

N/A

2.12 Key Performance Indicators

The following have been identified as KPI’s at Southern California Edison, along with the means of measuring each KPI and the current measurement statistic for each KPI:

Measured KPI	Description	Measurement Method	Current Statistic
N/A			

2.12.1 Key Metric Definition

The following have been identified as key metrics at Southern California Edison that require a business rule for calculation:

Key Metric	Description	Business Rule	Reference
N/A			

3 Controls, Regulatory Rules, and Security

Requirement ID (from RTM)	"As-Is" Control Requirement	"To Be" Risk Statement	"To-Be" Control Activity	Control Automation (manual, IT dependent- manual, automated)	Relevant technical identifier or RICEFW reference
N/A					

3.1 Security Considerations

Role	Transaction Code (T-Code)	T-Code Description	Authorization Attributes	SOD Conflicts (Yes/No) If SOD Conflicts Yes. Identify the 2 conflicting t-codes
N/A				

3.2 Custom Program/Transaction Codes

Please identify any custom programs/transaction codes that need to be developed for RICEFW objects.

- Is the custom program executed in the batch mode or dialogue mode
- Is the custom program assigned to an authorization group
- What is the custom transaction code for the custom program
- Should there be an authorization check made against any field in the custom program/custom t-code and if so what is the custom/standard authorization object used(For example does it have to be restricted to residential vs commercial customer)
- Does the custom programs/custom t-codes have any critical or sensitive customer information that needs extra security

Custom Program	Authorization Grp	Custom T-code	Authorization Object used in the authorization check statement
N/A			

3.3 Custom Table/Transaction Codes

Please identify any custom tables/transaction codes that need to be developed for RICEFW objects.

- Are there any customer sensitive/critical Z tables created
- What is the authorization group assigned to the table
- Is it just a maintenance or display only table
- What is the Z transaction code for the custom table

Custom Table	Authorization Grp Assigned	Custom T-code for the Table	Table Access (display/update)
N/A			

Risk Rating Please see Appendix for guidance on risk ratings (Very Low, Low, Moderate, High, or Very High) based on business impact should a breach occur in any of the three security	<table border="1"> <tr> <td>Confidential</td> <td>Integration</td> <td>Availability</td> </tr> <tr> <td>H, M, L</td> <td>H, M, L</td> <td>H, M, L</td> </tr> </table>	Confidential	Integration	Availability	H, M, L	H, M, L	H, M, L
Confidential	Integration	Availability					
H, M, L	H, M, L	H, M, L					
Additional Security Consideration:	Any Cybersecurity impact in addition to SAP system security: • Internet Facing Web Application? Yes/No, Details: • Internet Facing Application Programming Interface? • 3rd party Federated Authentication & Authorization, Single Sign-On? • Cloud Application (non-C4C)?						

4 Technical Considerations

4.1 RICEF-W Assessment

All of the Forms, Reports, Interfaces, Conversion items, Extensions/Enhancements and Workflows (RICEF-W) that have been identified for this BPD are detailed in the tables below and will represent the totality of all RICEF-W items documented at the time of sign-off of this BPD. Any RICEF-W items that are confirmed via change control after this BPD receives final sign-off, will be managed within Southern California Edison's APSE environment and not within this document.

4.1.1 Reports

Report Name & Description (List Requirements met by this Report)	Complexity	Reference ID
This will be a self-service report.		
R-CIM-CS-12 – A&R COE Performance Analytics	Complex	APSE #817
R-CIM-CS-12 – Account Coordinator Activities Tracking Report	Complex	APSE #818
R-CIM-CS-12 – Account Manager Interactions Report	Complex	APSE #819
R-CIM-CS-12 – CC COE Performance Analytics	Complex	APSE #826
R-CIM-CS-12 – Chronology DB	Simple	APSE #827
R-CIM-CS-12 – Daily Diagnosis	Simple	APSE #834
R-CIM-CS-12 – eChannel (User Performance)	Simple	APSE #835
R-CIM-CS-12 – IDSM COE Performance Analytics	Complex	APSE #840
R-CIM-CS-12 – OCT Channel Mix Data and On-Going Reporting	Medium	APSE #842
R-CIM-CS-12 – Offline support work	Simple	APSE #843
R-CIM-CS-12 – Rate COE Performance Analytics	Complex	APSE #845
R-CIM-CS-12 – SCE.com Interactions Report	Complex	APSE #847
R-CIM-CS-12 – Tier 2 reporting	Simple	APSE #848
R-CIM-CS-12 – Weekly Detailed Reports with Additional Fields	Simple	APSE #852

4.1.2 Interfaces

Interface Name & Description (List Requirements met by this Interface)	Complexity	Reference ID
N/A		

4.1.3 Conversion

Conversion Name & Description (List Requirements met by this Conversion)	Complexity	Reference ID
C-CIM-CS-12 - CONTACT	Medium	APSE #1134

4.1.4 Extension/Enhancements

Extension Name & Description (List Requirements met by this Extension)	Complexity	Reference ID
E-CIM-CS-12 - IR creation	Medium	APSE #1171
E-CIM-CS-12 - Create IR from outbound and inbound comm	Medium	APSE #1172
E-CIM-CS-12 - IR needs to be confidential	Complex	APSE #1173
E-CIM-CS-12 - IR custom search	Complex	APSE #1174
E-CIM-CS-12 - Auto populate Campaign ID	Complex	APSE #1175
E-CIM-CS-12 - IR custom view	Medium	APSE #1176
E-CIM-CS-12 - Interaction Record	Medium	APSE #800

4.1.5 Forms

Form Name & Description (List Requirements met by this Form)	Complexity	Reference ID
N/A		

4.1.6 Workflows

Workflow Name & Description (List Requirements met by this Workflow)	Complexity	Reference ID
N/A		

4.2 IDEX Considerations

N/A

4.3 Production System Cut-over Considerations

N/A

4.4 Other Considerations

N/A

5 Change Management

5.1 Change Impacts

Change Element Short Description	Change Impact Category	Audience Group(s)	Impact	Business Effort
In SAP, once an Activity note is entered, the note cannot be updated/changed in the front end user interface once it has been submitted. A front-end user will need to add another note in the same Activity once the Activity has been submitted if changes need to be made.	Process	CS-CSOD-CCC All; CS-CSOD-RSO All	Low	Low
The Back office user interface (UI) has the capability to overwrite the Activity notes. Users of Back office UI will need to be trained to not update the notes on the IR. They should add a separate note to the Activity which is similar to what they do today to retain the original note on the Activity.	Process; Decision Making	CS-CSOD-CCC All; CS-CSOD-RSO-Credit; CS-CSOD-RSO-BOM	Low	Low
All users will have a consolidated list of Activity types that can be used by multiple groups (e.g., CCC, RSO, BCD, Consumer Affairs etc.) so that there will be one comprehensive list for all Activities. Currently, CCC and BCD have their own disposition listing that is stored in the system that they use (e.g. CWO and Legacy CRM). Other organizations do not use Activities or dispositions. The Activities process and listing will be consolidated so that all users are using the same types. It can be used for reporting purposes.	Process; Benefit/Improvement	CS-CSOD-CCC All; CS-CSOD-RSO All; CS-CP&S-All; CS-BCD-All	Medium	Medium
In SAP, front-line users will be able to view current and historical Activities at the BP level. They will see the last 4 Activities in the general screen and can view other Activities on a separate screen. There will be a consolidated view of the Activities per account. BCD currently searches Activities by type/subtypes in CRM. Users will need to be trained on where to locate Activities in SAP.	Process; Benefit/Improvement	CS-CSOD-CCC All; CS-CP&S-All	Low	Low
In SAP, users will document the customer contact via an Activity. It is a comprehensive interaction history that can be used by all SCE users that interacts with the customer. It will also record contacts from sce.com as well as IVR. The status will automatically be coded as complete for each interaction with the ability to change the status. This provides a full view of the customer's touch points. Today an agent documents the contact in a disposition and through notes and it is only available to the CCC and IVR. This should enhance customer experience because agents will have access to all Activities at their fingertips.	Process; Culture Shift; Benefit/Improvement; Technology; Decision Making	CS-CSOD-CCC All; CS-CSOD-RSO All; CS-CP&S-All; CS-BCD-All	Medium	Medium

Below is a description of each:

Change Element Short Description: Describes the 'As-Is' scenario and what is changing.

Change Impact Category: Determined by asking the questions below.

1. **Staffing Levels** - Is the work effort increasing or decreasing (staffing levels), and how (e.g., task automation, new process/tasks)?
2. **Job Roles** - Will the responsibilities, authority, or required skills for a job or job roles change? Will people be reporting to new leaders? Will managers' responsibilities change?
3. **Compensation / Performance** - Will the changes have such an impact on roles of an individual that merits a change in how they are compensated or how their performance will be evaluated? What behaviors are rewarded and recognized?
4. **Organization Structure** - Is the ownership of the Process or Data changing (think departments, jobs, or roles, not individuals)?
5. **Decision Making** - Will any of the changes impact how decisions are made, by or between, business units/departments? Who makes them, how they determine the criteria for making a change?
6. **Culture Shift** - Will organizational value systems impact the way change happens or be impacted by the change? What are the underlying values of the organization that will directly influence the way change will be accepted and how much work will ultimately be required to ensure successful outcomes for the business?
7. **Location / Facilities** - Will the change impact the physical location where the process is being implemented or require changes to the facilities to enable the process to be effective?
8. **Process** - Any change to the current process (e.g. manual process becomes automatic, or vice versa)? Are there new processes being introduced or an old process being decommissioned? Is there a requirement to change an existing business rule or business policy? Will new business rule or policy need to be introduced and enforced or complied with?
9. **Regulatory/ Legal** - Are there any legal/regulatory requirements that might be impacted?
10. **Technology** - Are other applications impacted (e.g., going away, becoming read-only), or are there new requirements (e.g., new SW / HW, new version)?
11. **Benefit/Improvement** - Will there be an improvement or benefit to any of the stakeholders because of this change. (Be sure to include any pain points that are being alleviated)
12. **Other** - Are there emotional implications stemming from any of these changes (think of buy-in issues or fears)?

Audience Group(s): These are the affected departments, divisions etc...

Impact: The following were used to determine the impact:

Level	
HIGH	BUSINESS OUTCOMES: Drives change to cost, efficiency, customers.
	- JOB: More than 40% of individual's job will change and / or additional skills are required with significant changes to Job Documents. Examples include: - Shift from manually intensive role to using new tools and systems - Employee is going to be redeployed - High level of "technical or functional" changes needed for a particular group - Significant changes to culture & attitudes to get job done - Big shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) - RELATIONSHIPS: High level of "relational" changes for a particular group (e.g. reporting relationships, effective working relationships with customers, teams, and stakeholders etc.) - POLICIES/PROCEDURES: Processes, procedures, and/ or policies are not in place today and need to be defined. - REGULATORY REQUIREMENT: drive changes to the way we comply

Level	
MEDIUM 	• BUSINESS OUTCOMES: Limited change to cost, efficiency, customers. • JOB: 20-40% of individual's job will change and / or additional skills are required with significant changes to Job Documents, Examples include: • Employee job title or function is modified, resulting in minor to moderate changes to roles and responsibilities. • There will be some changes to the culture & attitudes • Shift from moderate technology use to using new tools and systems • Moderate level of "technical or functional" changes needed for a particular group • Moderate shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) • RELATIONSHIPS: Moderate level of "relational" changes for a particular group (e.g. reporting relationships) • POLICIES/PROCEDURES: Processes, procedures, and/or policies are inconsistent today and not defined or documented in many cases • REGULATORY REQUIREMENT: No impact.
Level	
LOW 	• BUSINESS OUTCOMES: No impact. • JOB: Less than 20% of individual's job will change and / or additional skills are required with significant changes to Job Documents. Examples include: • Employee job title or function is slightly modified with few, if any, changes to roles and responsibilities • There will be little change to the culture & attitudes • Shift from using some technology to new systems & tools • Light level of "technical or functional" changes needed for a particular group • Small shifts in accountability or reporting (autonomy, responsibility, decision making, etc.) • RELATIONSHIPS: No impact or light level of "relational" changes for a particular group (e.g. reporting relationships) • POLICIES/PROCEDURES: Processes, procedures, and/or policies are consistent, but not well documented, and will need to be documented/ Other minor changes to be made. • REGULATORY REQUIREMENT: No impact.

Business Effort: Initial assessment of the impact to the business High, Medium, Low
