Part I: ROI and Best Practices

Show me the ROI

Key Learnings

- **Customer Experience:**
You can't hide from a bad customer experience

- **Real-time:**
Personalization is no longer adequate for a superior customer experience; bring timeliness into the mix

- **Multi-channel:**
Don't adopt multi-channel CEM for the sake of doing it; do it the right way

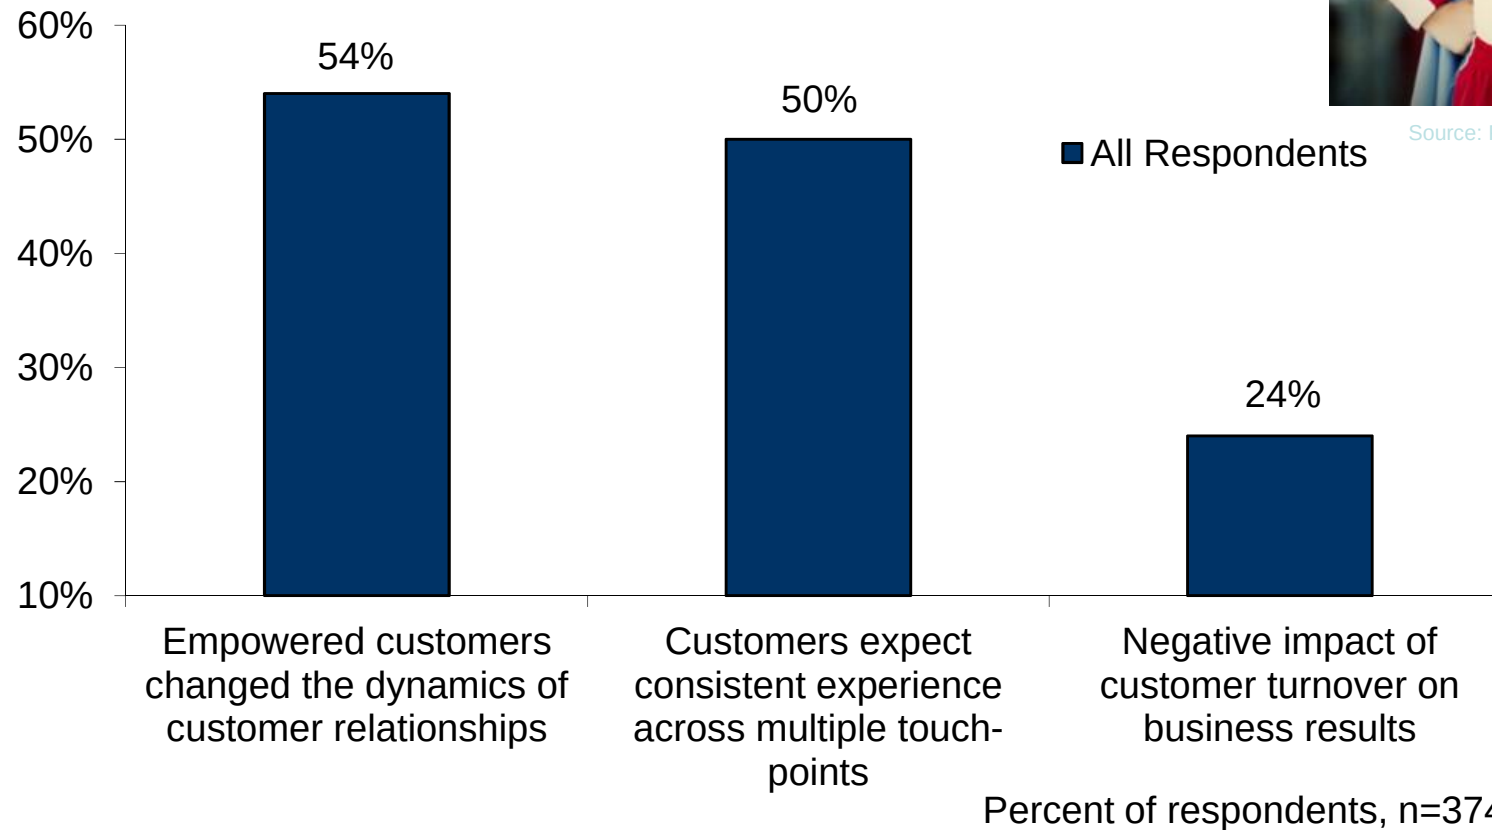

- **Content Management:**
When used contextually, content management is a game-changer

- **Consistency:**
Establishing consistency of customer interactions across the enterprise is not an option

Top Pressure: Empowered Customer

Source: Peter Whibley Blog

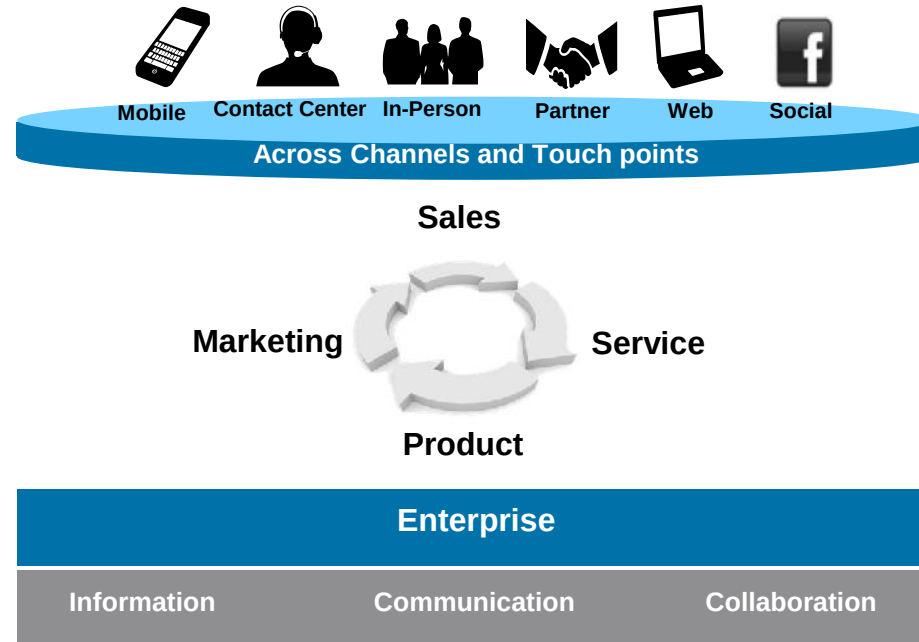

The New Normal: Multi-Channel CEM

6

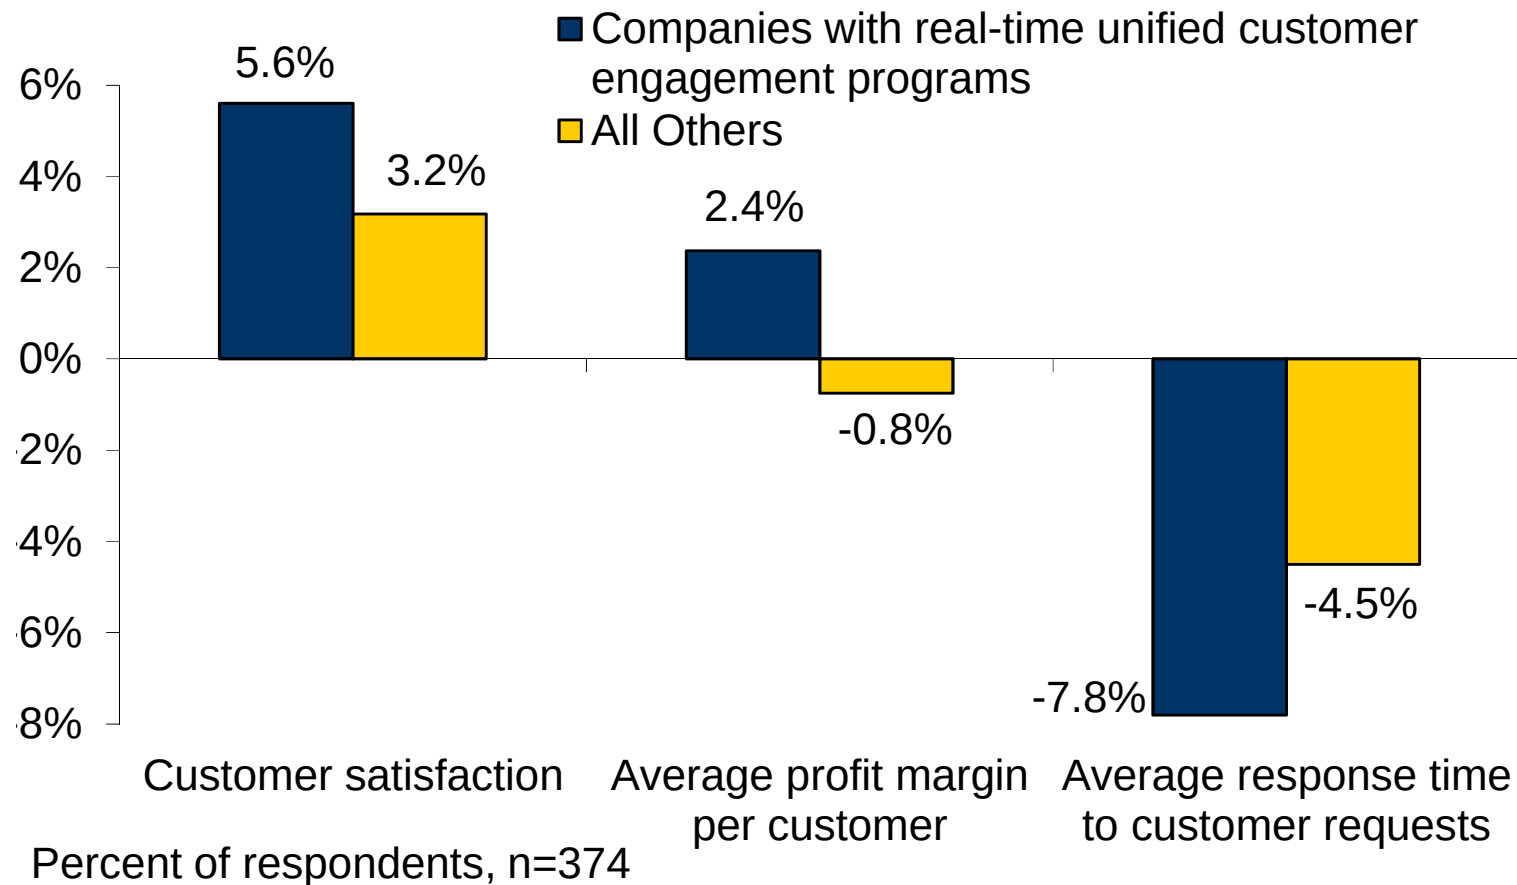

More than 65% of businesses today
use at least 6 channels to engage
their customers.

What is Real-Time Unified Customer Engagement?

- *"RUCE is an **enterprise-level** initiative where numerous organizational stakeholders (e.g. sales, marketing and customer service) work together to deliver **consistent** messages that address each buyer's needs through **multi-channel and multi-touch** interactions that are aimed at engaging buyers in a **relevant** and **timely** fashion."**

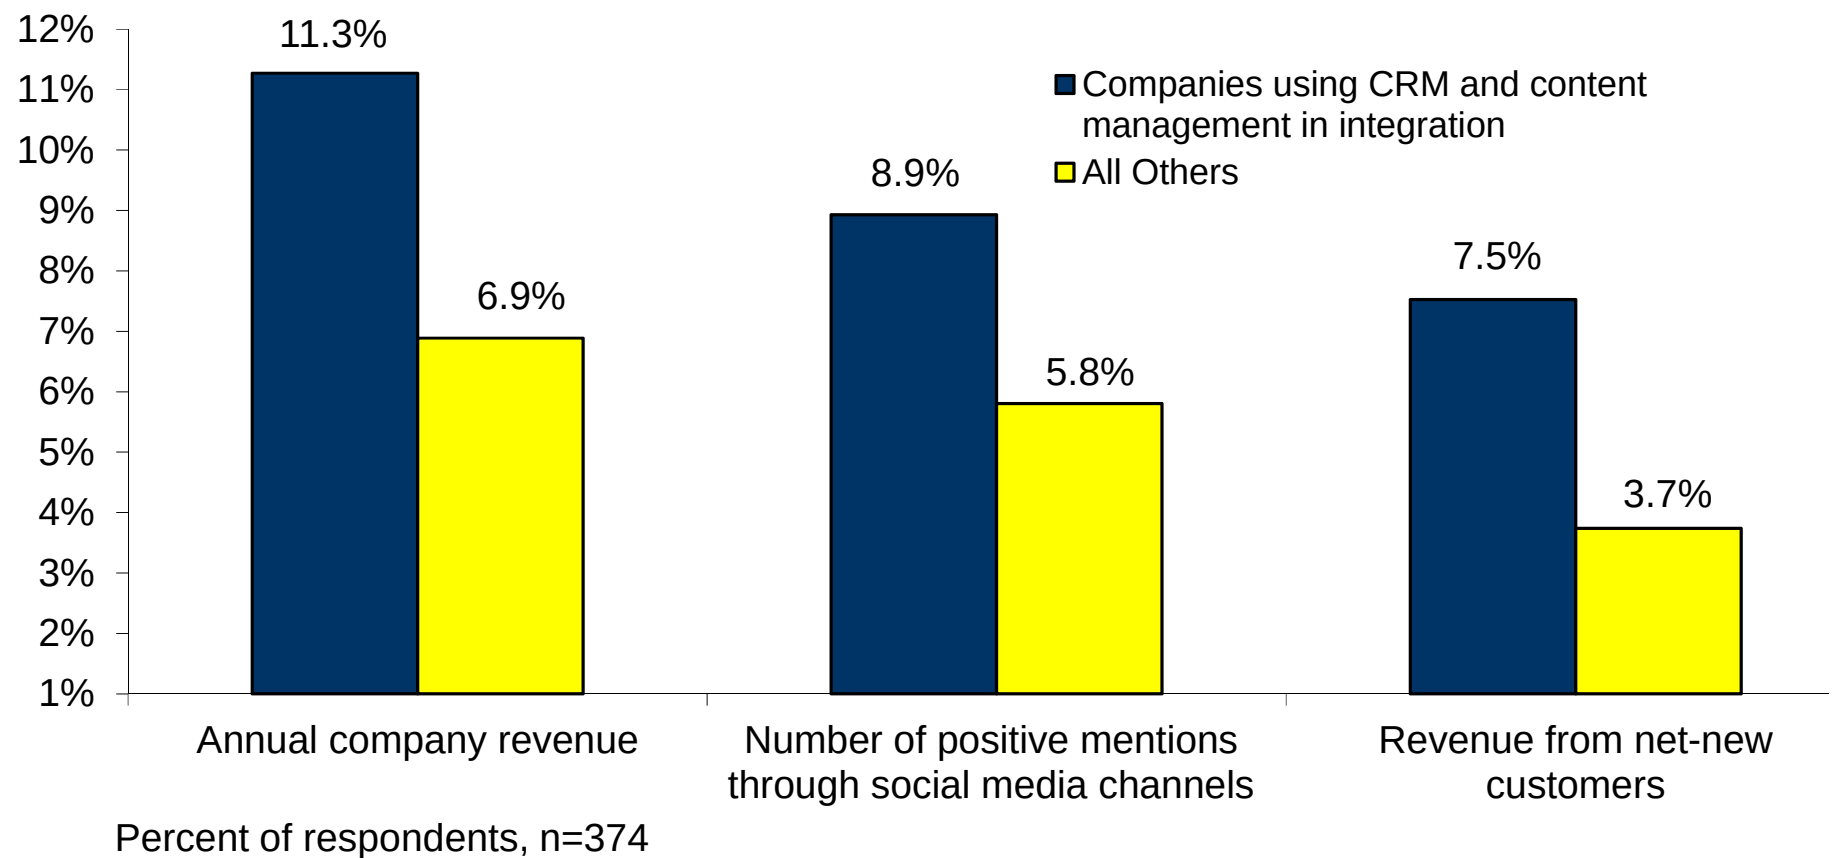

RUCE Users Enjoy Quantifiable Business Results

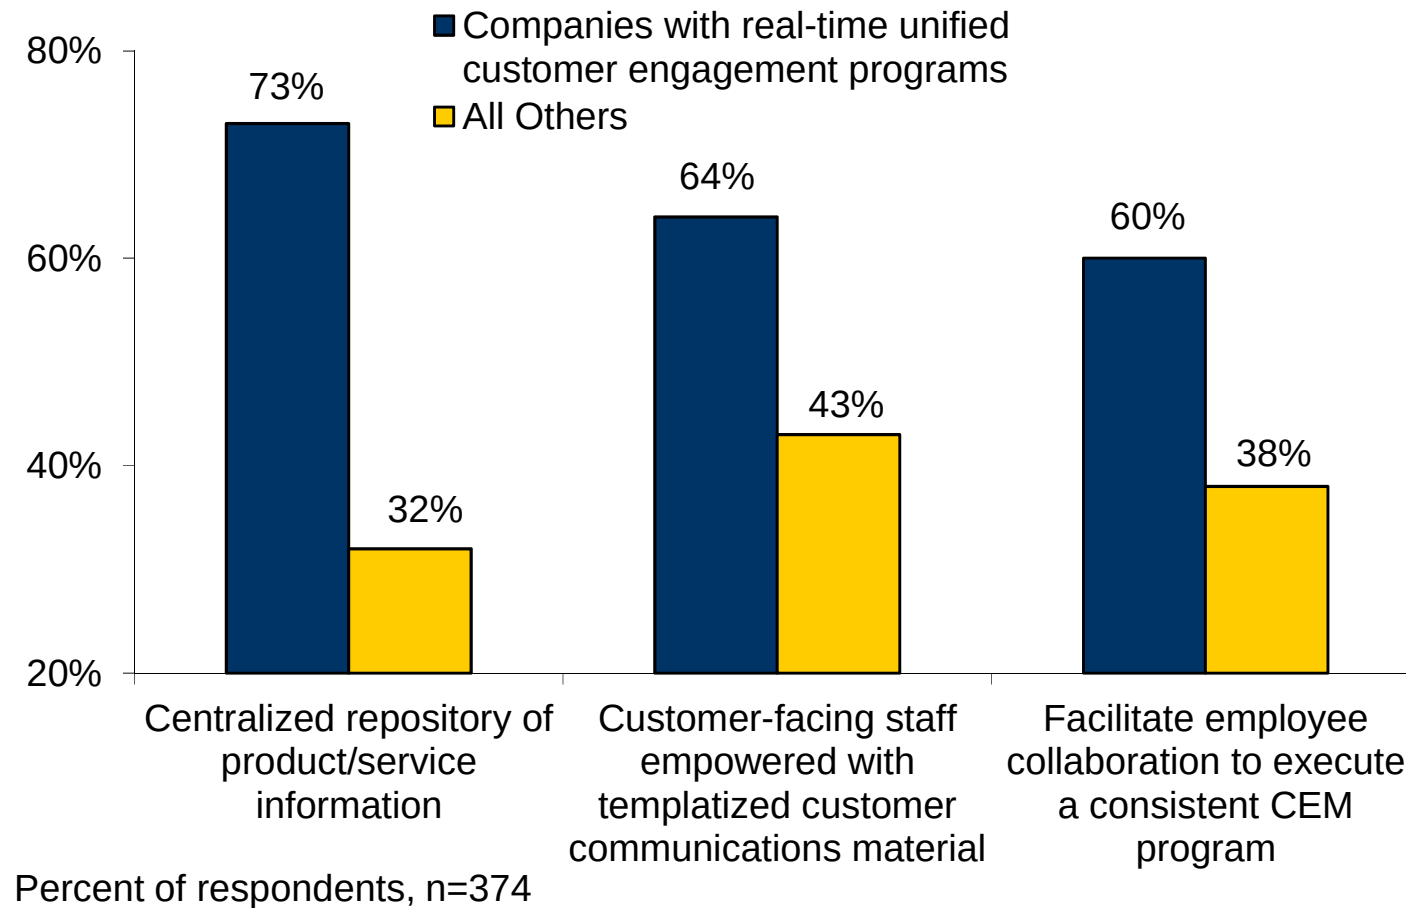

Another Look at the Impact of RUCE Programs

Current Performance	RUCE Users	All Others
Employee retention rate	77%	67%
Customer retention rate	72%	58%
Overall sales team attainment of quota	64%	48%

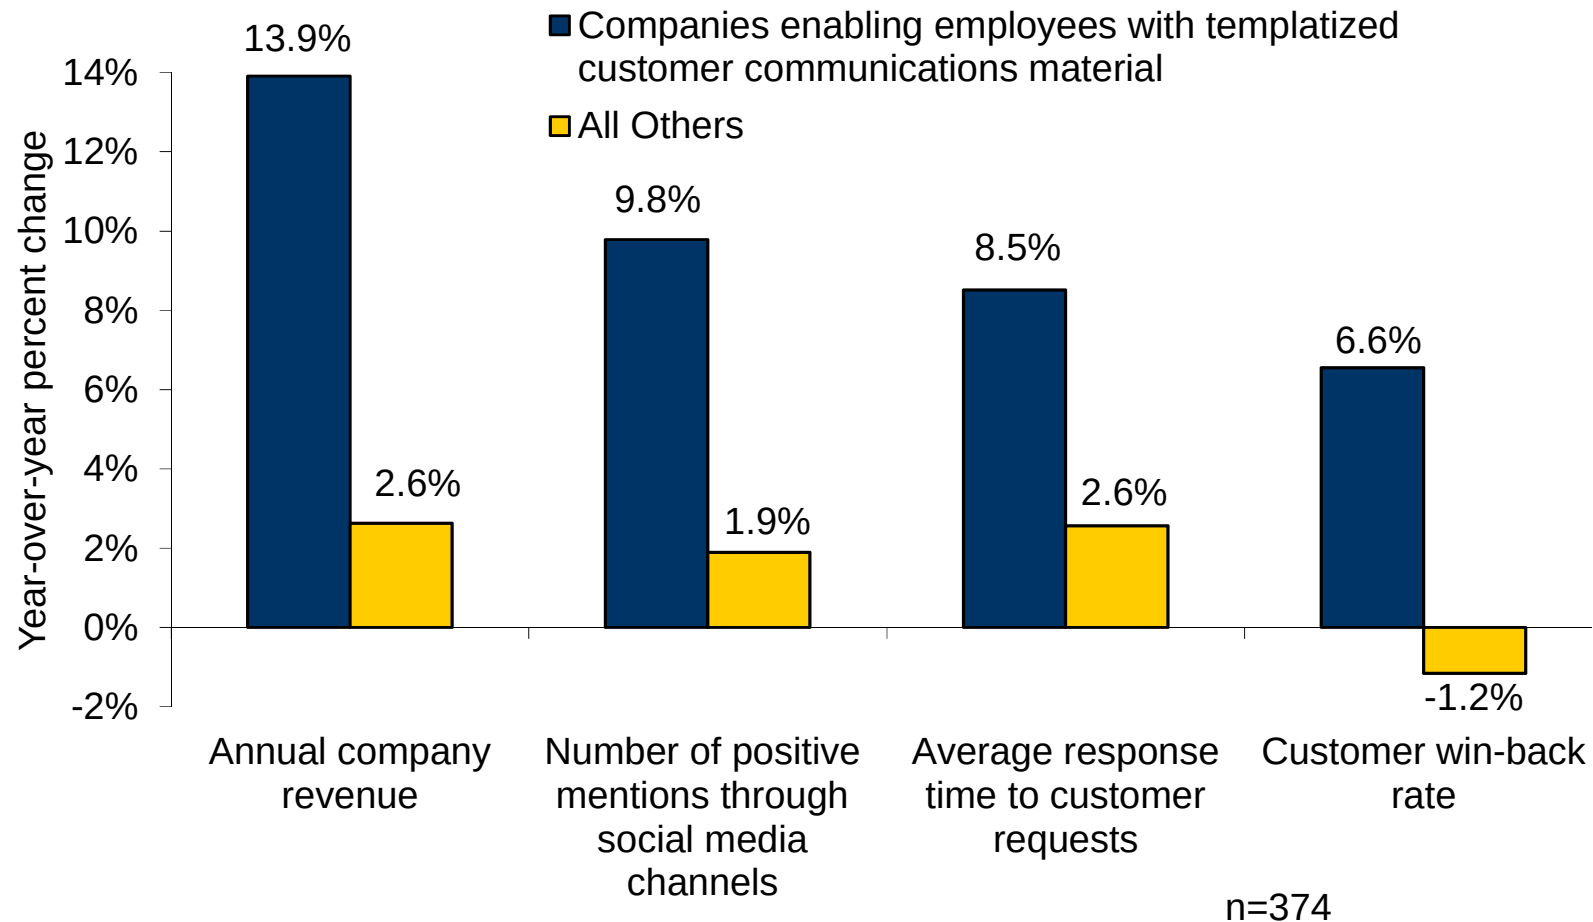

The Business Value of Integrating CRM and Content Management *(Annual Improvement)*

Key Building Blocks for RUCE Initiatives

Customer-facing staff enabled with customized content *(Annual Improvement)*

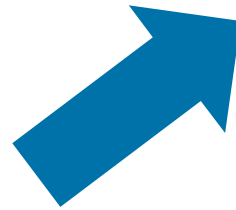

Example: Retail

How Do We Get Customers Into Our Stores?

3.4%

react to promotions in
mass mailings

70%

of targeted coupon
recipients use at
least one coupon

Roadmap to Customer Excellence

Best Practices for Achieving Excellence with SAP ECM

1 Engage more Profitably with Customers

- Leverage personal relevant information at touch points ranging from one-to-one contact to high volume mass-produced communication

2 Simplify and Automate Document Execution and Handling

- Streamline document-related business processes to lower cost and increase performance

3 Empower Business Users

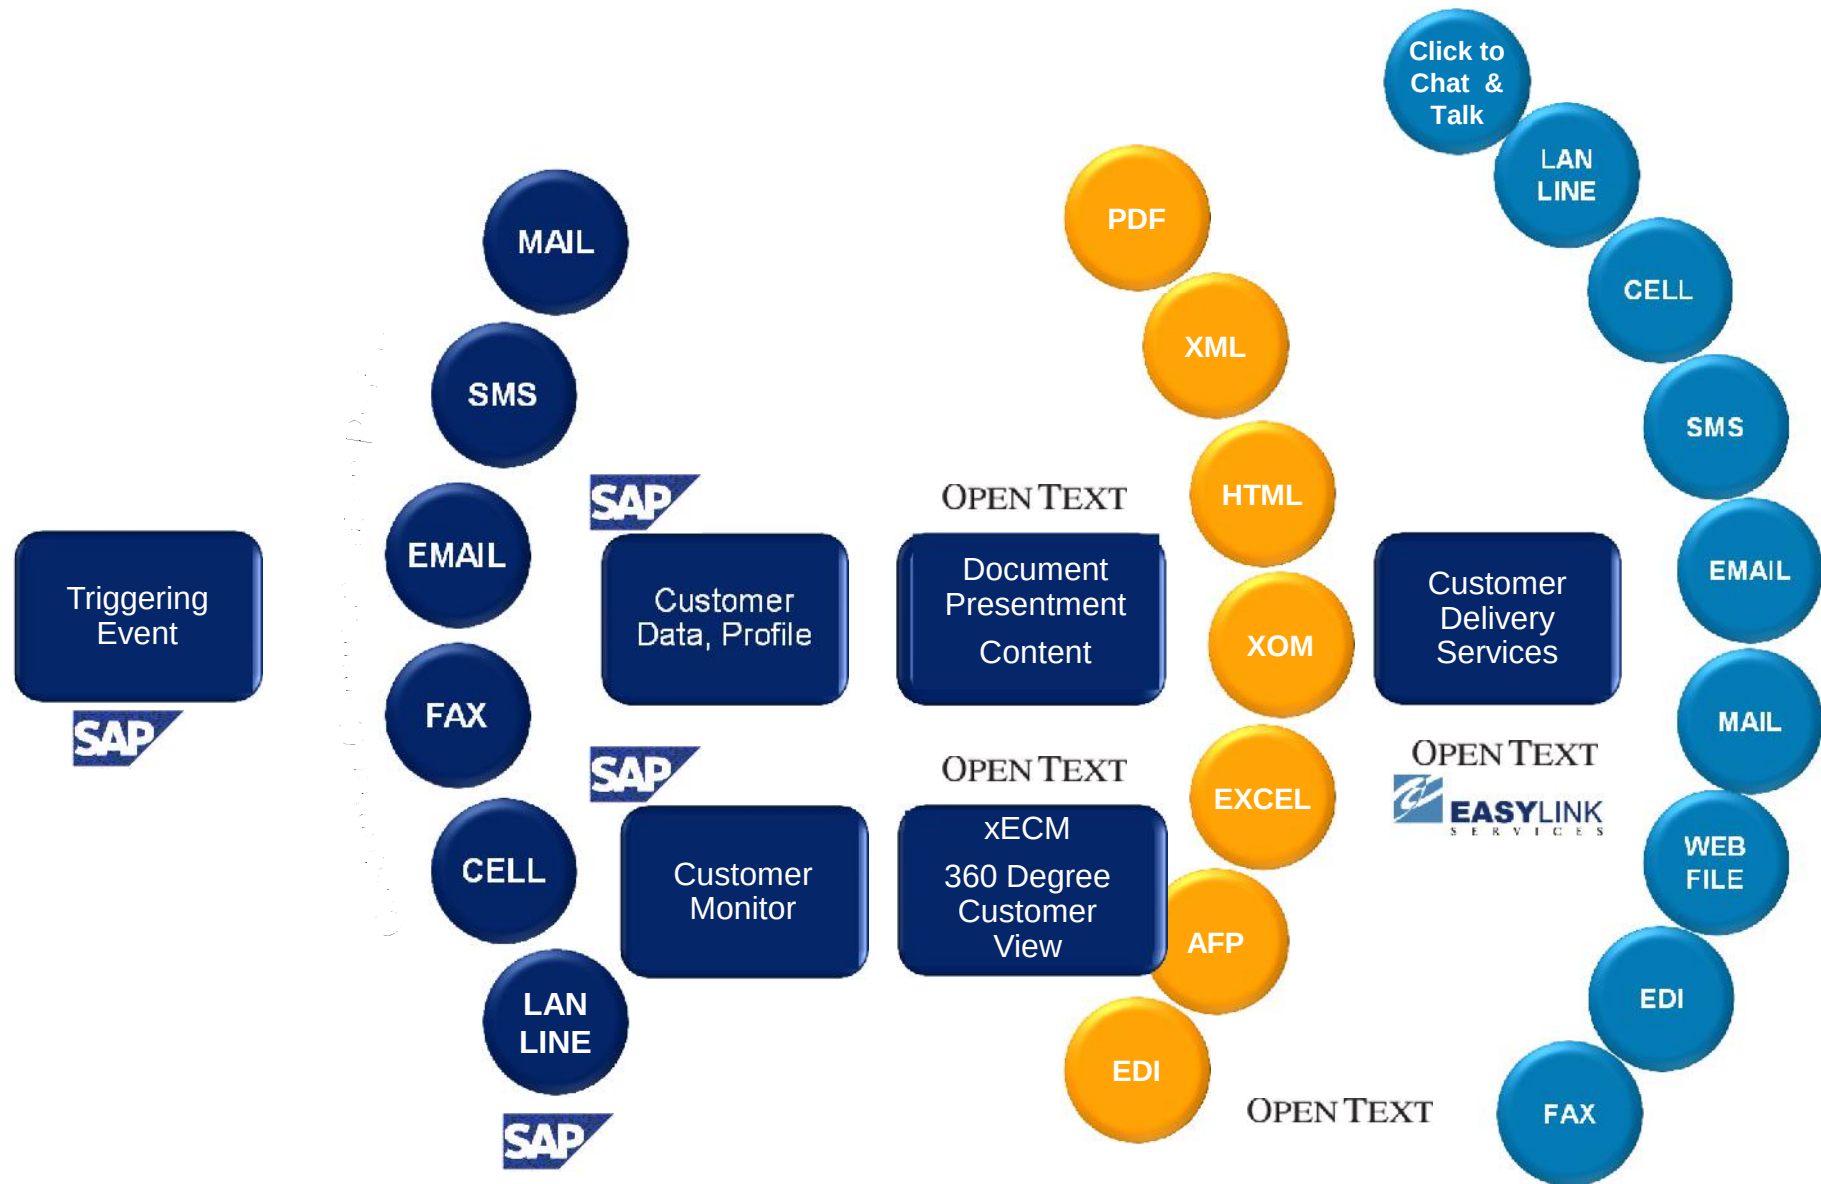

- Give business users hands-on control of the documents they need to run the business, and at the same remove IT dependency

4 Improve the Efficiency of Business Processes

- Whether communicating with customers and suppliers, triggering internal processes, or facilitating payment and revenue, business processes are an innate part of the organization

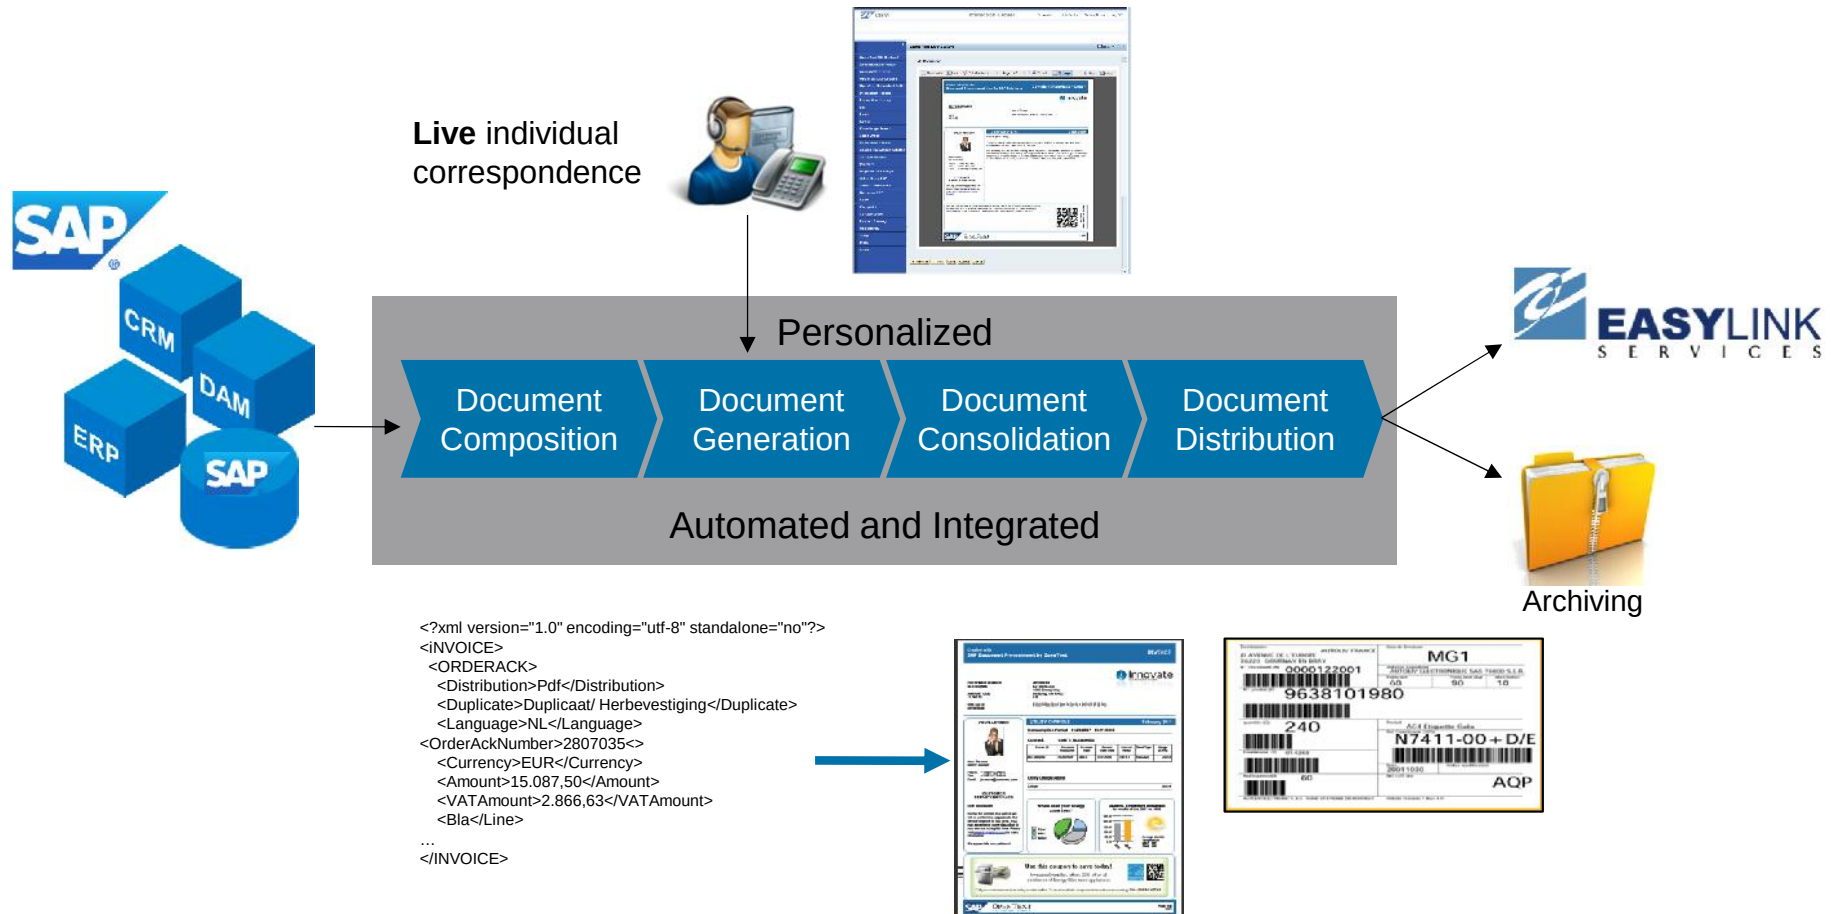

End-to-End Customer Communication

SAP Document Presentment by OpenText

Integrated, optimized, document communication

Improve customer experience: customized, proactive, 360 degree view

Improve operational efficiencies: automate document processes in real-time

CRM with Extended ECM Workspace

The screenshot displays the SAP Sales Professional interface, which integrates CRM and ECM functionalities. The interface is divided into several sections:

- Header:** Includes the SAP logo, "Sales Professional" title, and navigation links for "Personalize", "System News", and "Log Off".
- Left Navigation Panel:** Contains a sidebar with various modules such as Home, Worklist, Calendar, E-Mail Inbox, Account Management, Activities, Sales Cycle, Pipeline Performance, Billing, Sales Operations, Reports, and Dashboards. A "Create" section at the bottom lists options like Appointment, Interaction Log, Task, E-Mail, Contact, Lead, Opportunity, and Quotation.
- Main Content Area:**
 - Individual Account Details:** Displays the account information for "Jane Butterfield / PRINCETON NJ 08540-1318". It includes a "Full text Search" button and a "Business Workspace" section.
 - Content Filter:** A sidebar on the left of the workspace allows filtering by name, application, content type, document type, and modified date. It also features a "Pulse From Here" section showing recent activity, such as a post by Liz Armstrong about a minute ago regarding "Contract Butterfield.doc".
 - Standardized Folder Structure:** A central pane displays a list of folders and documents organized into a standardized structure. The folders include Account Management, Bills, Complaints, Contracts, Correspondence, Inquiries, Meetings, Meter Inspection, and Promotion. Each folder shows the number of items and the last modified date (01/20/2012 09:10 AM).

Real-Time Customer Communication

Keep your customers informed with voice, SMS, and email. Meet your regulatory requirements. Respond swiftly to unplanned events.

EasyLink Notifications Overview

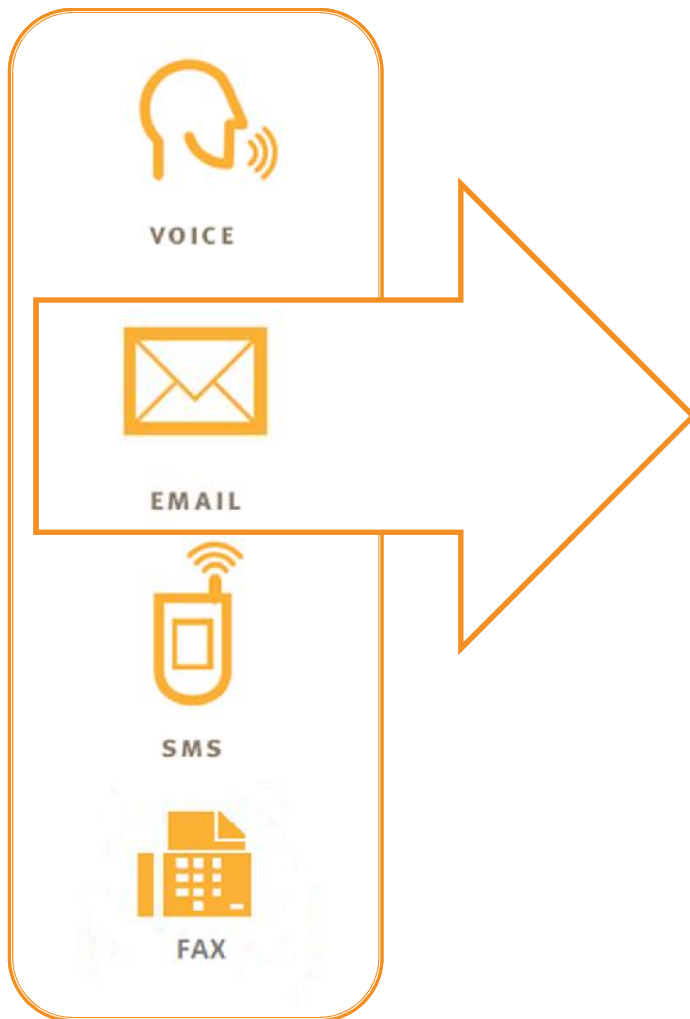

Voice Notifications

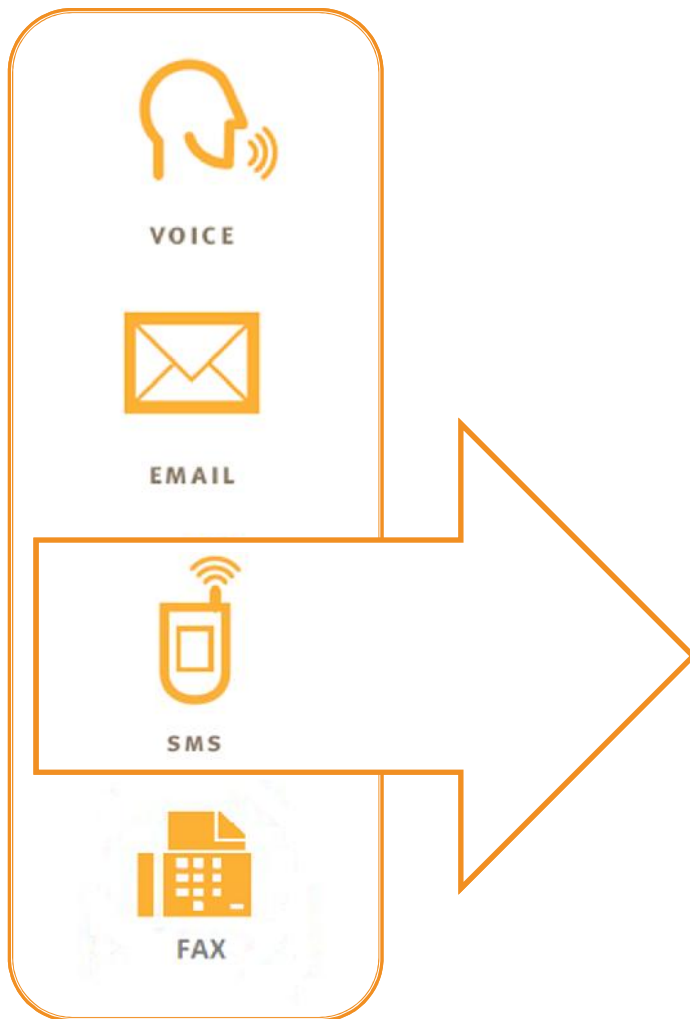

- 5.5m minutes per month
- Full Text to Speech engine
- 26+ Supported languages
- Hot Key Transfer to Agent
- Call Pacing/Timing
- Data Collection
- Delivery Scheduler
- TMZ Management
- Hour of Day Sensitive
- Cell Phone Blocking

Email Notifications

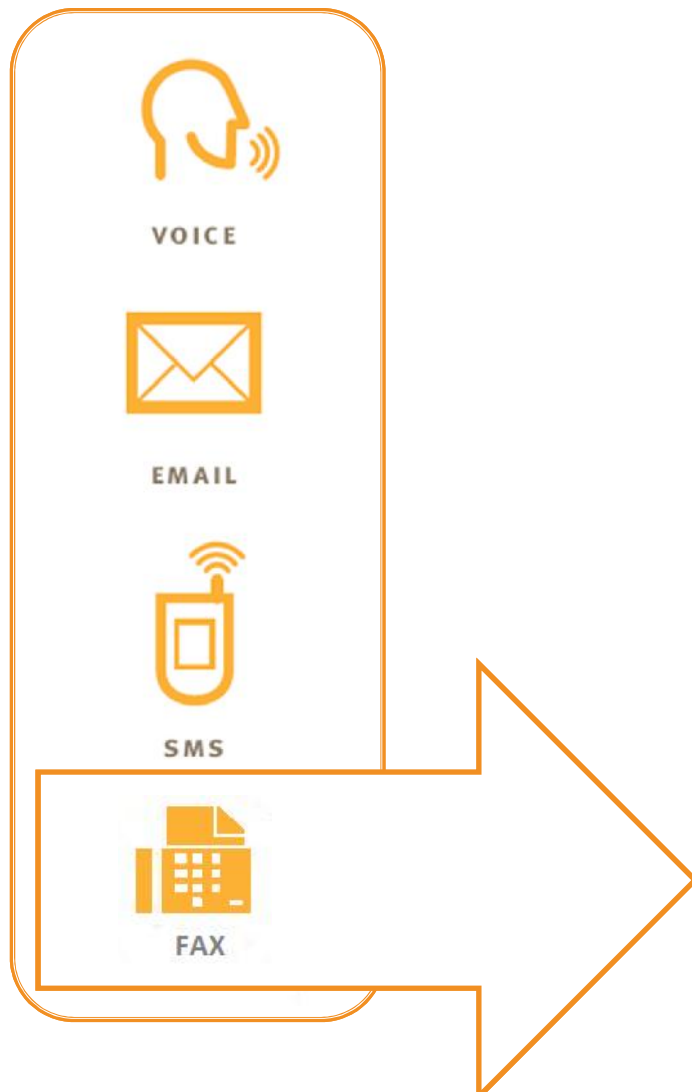

- Tracking of Open
- Tracking of Click-to Links
- Pull Service/Pull Files
- HTML, HTML-Lite, Text
- List Management
- Custom “From”

SMS Notifications

- Management of Opt-out lists
- One-way or Two-way (MT/MO)
- Shared, Random, Vanity SC's
- Data Collection
- Delivery Scheduler
- TMZ Management

Fax Notifications

- 2 Billion Faxes per year
- Global/Redundant Network
- Full Error Reporting
- Never busy network
- 47% of Enterprise Market
- Customizable retry logic
- 90% of Fortune 100

Why use a Cloud based service?

- Supports a single vendor, unified communications strategy
- 24x7x365 Customer Support
- Strong levels of redundancy and business continuity
- SLA's of 99.5%
- Compliance (SOC II, HIPAA, PII)
- No software or servers to manage

Customer Excellence with Real-time Unified Customer Engagement - Summary

- ✓ Better agility and faster time to market
- ✓ Consistent branding and targeted campaigns
- ✓ Increase campaign ROI and brand value
- ✓ Understand customers and interact effectively
- ✓ Increase revenues and reduce cost of sales
- ✓ Fast and informed customer interactions
- ✓ Improve efficiency and customer satisfaction
