Real-World Applications

"We wanted to experiment and demonstrate Agile principles and practices across domains. By empowering each business domain, acknowledging specific contexts in domains, fostering sharing, and 'try and learn,' SAFe has helped us get on the right track to success."

—**Claire Charbit**, Program Management NWOW Agile Adoption, Air France-KLM

"Philips is continuously driving to develop high-quality software in a predictable, fast and Agile way. SAFe addresses this primary goal, as well as offering these further benefits: reduced time to market and improved quality, stronger alignment across geographically distributed multi-disciplinary teams, and collaboration across teams to deliver meaningful value to customers with reduced cycle time."

—**Sundaresan Jagadeesan**, Program Manager – I2M Excellence SW Development Program

"Continuous delivery improved quality, increased productivity, and improved the employee experience."

—**Ashish Pandey**, Technical Lead, CSIT Team

"SAFe brings so much more engagement, which has really been key for all parties. I wouldn't want to do it any other way."

—**Rajbir Bal**, Program Manager, Access Control
